PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish

has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend- ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and

however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

The long-awaited 2nd edition of this best-selling research methods handbook is fully updated and includes brand new coverage of online research methods and techniques, mixed methodology and qualitative analysis. This edition includes two new contributed chapters: Professor Julie McLeod, Sue Childs and Elizabeth Lomas focus on research data management, applying evidence from the recent JISC funded DATUM project; Dr Andrew Shenton examines strategies for analysing existing documents. The first to focus entirely on the needs of the information and communications community, this handbook guides the would-be researcher through the variety of possibilities open to them under the heading research and provides students with the confidence to embark on their dissertations. The focus here is on the doing and although the philosophy and theory of research is explored to provide context, this is essentially a practical exploration of the whole research process with each chapter fully supported by examples and exercises tried and tested over a whole teaching career. Readership: Students of information and communications studies and archives and records management, and practitioners beginning a piece of research.

Psychologists have always been interested in interest, and so modern research on interest can be found in nearly every area of the field: Researchers studying emotions, cognition, development, education, aesthetics, personality, motivation, and vocations have developed intriguing ideas about what interest is and how it works. *Exploring the Psychology of Interest* presents an integrated picture of how interest has been studied in all the wide-ranging areas of psychology. Using modern theories of cognition and emotion as an integrative framework, Paul Silvia examines the nature of interest, what makes things interesting,

the role of interest in personality, and the development of peoples idiosyncratic interests, hobbies, and avocations. His examination reveals deep similarities between seemingly different fields of psychology and illustrates the profound importance of interest, curiosity, and intrinsic motivation for understanding why people do what they do. The most comprehensive work of its kind, *Exploring the Psychology of Interest* will be a valuable resource for student and professional researchers in cognitive, social, and developmental psychology.

What do we mean by creativity? What is the link between creativity and critical thinking? How can creativity and critical thinking be incorporated into classroom practice and what are the benefits for students? Creativity and critical thinking are central to effective teaching and learning and have a significant impact on students' attainment, engagement, attendance and behaviour. This book draws on recent research and policy to provide teachers with a clear framework for understanding creativity and critical thinking and practically demonstrates how they can be incorporated into classroom practice. Bringing together an expert team of contributors with a wide-range of experience of bringing creative approaches into the classroom the book includes: an analysis of the issues associated with creativity and critical thinking clear guidance on how schools can develop dynamic thinking and creative learning strategies and use them with all learners advice on using external agencies to bring the creative perspective into schools case studies alongside examples of current activities and practice in schools links to resources and organisations who can offer support. Providing clear guidance on the underpinning theory and policy and drawing upon current initiatives in schools, this book is essential reading for trainee and practising teachers that want to provide the best possible learning experience for their students.

Hasil belajar merupakan bagian terpenting dalam pembelajaran. Hasil belajar siswa pada hakikatnya adalah perubahan tingkah laku sebagai hasil belajar dalam pengertian yang lebih luas mencakup bidang kognitif, afektif, dan psikomotorik (Nana Sudjana 2009: 3). Hasil belajar merupakan hasil dari suatu interaksi tindak belajar dan tindak mengajar. Dari sisi guru, tindak mengajar diakhiri dengan proses evaluasi hasil belajar. Dari sisi siswa, hasil belajar merupakan berakhirnya pengajaran

dari puncak proses belajar Dimiyati dan Mudjiono (2006: 3-4). Kegiatan belajar dan mengajar sarannya adalah hasil belajar, jika minat dan fasilitas belajar baik, maka diharapkan hasil belajarnya juga baik. Adapun pengertian hasil belajar yang dikemukakan oleh Sudjana (1992:34) bahwa hasil belajar adalah kemampuan yang dimiliki oleh siswa setelah ia menerima pengalaman belajar. Istilah hasil belajar tersusun atas dua kata, yakni: "hasil" dan "belajar". Sedangkan menurut Slameto (2003:2) "Belajar adalah suatu proses yang dilakukan seseorang untuk memperoleh suatu perubahan tingkah laku yang baru secara keseluruhan, sebagai hasil pengalamannya sendiri dalam interaksi dengan lingkungannya. Menurut Sardiman, AM, (2014: 23) "belajar adalah perubahan tingkah laku, dan terjadi karena hasil pengalaman".

This lively collection of over 100 classroom activities allows teachers to exploit fully the language learning potential of extensive reading. The activities, contributed by teachers who have used them successfully in classrooms all over the world, introduce extensive reading to students, and link it with the rest of the language curriculum. Here is a wealth of ideas for encouraging students to read, and for using students reading experiences for further language practice and learning. These creative and enjoyable speaking, listening, role play, reading, writing, and vocabulary activities are suitable for students of all ages and levels. Each activity is clearly explained, together with a personal note from its author. This is a handbook for teachers of general language courses, or grammar, listening, speaking, writing, or reading courses. It is written for teachers both non-native and native speaking, and for teachers both novice and experienced. It will also be of interest to teacher-educators.

Supported Literacy for Adolescents, written by nationally recognized experts, introduces an innovative and field-tested instructional framework for preparing secondary students to succeed academically in a fast-changing and globally networked world. Filled with examples from science, history, literature, and special education classrooms, the book shows how teachers can enable diverse students, including under-performers, to develop critical thinking and other essential competencies along with the "multi-literacy" tools needed to engage in twenty-first century content learning.

21st Century education is at the cross-roads. It can continue to be defined by a narrow scope, benefiting the median student who can muster moments of brilliance assisted by the technology he or she so easily wields, or it can salvage what was deemed noble by tradition and merge them with the modernistic tools and educational innovations of the new century. Education has reached a point where its students and parents have either seen the limitations of the system and accepted them, or have forged some external responses to them. These retorts can be seen in the following manifestations: the rise of after-school athletics, where sports are now played that have been deemed too aggressive for school, the explosion of tutoring centres who are capitalizing on the fact that process has been a small part of the curriculum and rudimentary skills are overshadowed by what can be best described as educational pulp, and finally, the growth of the independent/private schools and home schooling, where total abdication from public systems has come to rest. Comic books, robotics, industrial arts, instrumental music, cooking, camping, fine art, and other genuine experiential initiatives need to be examined by today's schools. The empty promises of video games and their ethereal claim to genuine experience has produced a significant student body that is resigned to mediocrity, and virtual encounters that provide neither the authentic feeling of victory, nor the reviled sting of true defeat. Students are looking for the genuine, in their teachers, lessons, and activities. 21st Century education by comic book or by hook will rest in the power of professional dynamism and the authentic teaching of practice, process, and prolonged proficiency.

One of the hottest topics in personal technology right now is eBooks and eReaders. (Amazon now reports selling more eBooks than printed books.) But, how can this technology apply to workplace learning and performance? Training groups have long published user guides and training manuals, but now eBooks can change the way we design and distribute these materials. This book explores the different formats of eBooks; covers the workflow of publishing eBooks using low-cost tools; and explores how the most popular eReaders can be leveraged for learning content in your organization.

Kata pengantar WARDAH INSPIRING TEACHER Kemajuan suatu negara bukan lagi ditentukan oleh seberapa banyak kekayaan alam yang dimiliki oleh negara tersebut, melainkan seberapa unggul sumber daya manusia yang terdapat di dalamnya. Disinilah Indonesia memiliki potensi yang sangat besar dengan jumlah penduduknya yang mencapai ratusan juta jiwa. Peluang yang besar ini juga memiliki tantangan yang besar pula, yaitu bagaimana sumber daya dengan jumlah yang besar ini dapat dimaksimalkan potensinya untuk bisa menjadi lebih unggul lagi. Pendidikan adalah faktor utama yang dibutuhkan sebagai penunjang untuk meningkatkan keunggulan sumber daya manusia di Indonesia. Pendidikan menjadi pondasi bagi segala aspek dalam kehidupan. Akan tetapi, cakupan di dalam dunia pendidikan sangat luas, sehingga membutuhkan keterlibatan dari berbagai pihak untuk dapat memberikan perhatian penuh untuk

mendukung pendidikan di Indonesia. Termasuk perhatian untuk para tenaga pendidik yang menjadi pembuka jalan masuknya pendidikan kepada kita dan kepada generasi selanjutnya. Tenaga pendidik dalam hal ini yaitu guru memiliki peran yang sangat besar dalam membawa perubahan untuk kemajuan pendidikan. Dari seorang guru akan lahir ratusan hingga ribuan pemimpin dan ilmuwan pembawa perubahan di masa depan yang memungkinkan terwujudnya peradaban yang lebih baik. Seperti berkembangnya Paragon hingga saat ini juga berkat jasa para guru dalam mendidik anak bangsa menjadi manusia yang baik dan berkualitas. Hal ini yang menjadi latar belakang Paragon sebagai korporasi, melalui program Wardah Inspiring Teacher, peduli terhadap pengembangan kapasitas dan kapabilitas guru-guru inspiratif di Indonesia. Paragon juga ingin mendorong korporasi dan organisasi dengan semangat yang sama untuk saling mendukung demi kemajuan kita bersama. Wardah Inspiring Teacher bukan hanya sebagai program pengembangan

untuk para guru di Indonesia, melainkan sebuah wadah untuk memberikan apresiasi dan sebagai ucapan terima kasih atas peran guru yang sangat besar untuk kemajuan negeri ini. Untuk melahirkan generasi yang inovatif dan memiliki growth mindset, selain keluarga, guru juga memiliki peranan yang penting. Untuk itu, kini saatnya para guru harus terus semangat, memiliki motivasi yang kuat demi kebermanfaatan ilmu yang dimilikinya, serta empati. Hal ini yang bisa mendorong para guru untuk selalu belajar tanpa henti dalam meningkatkan kapasitas dan memperkaya kemampuan diri untuk semakin memperkaya ilmu dan pengetahuan anak-anak didiknya. Selain itu, poin lain yang juga penting adalah berjejaring dan kolaborasi agar dapat saling menginspirasi. Salam hangat untuk guru keren Indonesia, Salman Subakat
