Night Sky Notebook 8"x10" inches 110 prompted fill in pages Cute Matte Cover Happy observing! There are several approaches to recording observations in the night sky ranging from naked eye observations and interpretations to highly scientific observations using instruments. Night Sky Journal is great for beginning astronomers, and assumes only that the user has access to a telescope. There is space for to sketch observations using both low and high power in their telescopes. (Low power can give more of an overview of a celestial object while higher power can

zoom you in for more detail). Lots of space to jot the basic settings of their telescope and make notes about what they observed. Great for children, teamed with learning how to use a telescope and being outdoors can sketch what objects they saw in the sky, space to chart out stars they spotted, or to write down how watching the sky made them feel. For more seasoned astronomers and astrologers, sky notes could more focus on astrological movements and their meanings.

Consider adding Night Sky Journal to your learning shelf. If you have knowledge of the subject, think about issuing a challenge to your kids or student class to observe particular objects in the sky over a period of time or even integrate these pages with a learning worksheet that highlights special events in the night sky - eclipses, passing comets and so on....
