Korlai Portuguese (KP), a Portuguese-based creole only recently discovered by linguists, originated around 1520 on the west coast of India. Initially isolated from its Hindu and Muslim neighbors by social and religious barriers, the small Korlai community lost virtually all Portuguese contact as well after 1740. This volume is the first-ever comprehensive treatment of the formation, linguistic components, and rapidly changing situation of this exotic creole. The product of ten years of research, Korlai Creole Portuguese provides an exciting, in-depth diachronic look at a language that is now showing the strain of intense cultural pressure from the surrounding Marathi-speaking population. Framed in Thomason and Kaufman's 1988 model of contact-induced language change, the author's analysis is enriched by numerous comparisons with sister creoles, apart from medieval Portuguese and Marathi. This book contrastively examines the following areas: phonemic inventories, phonological processes, stress assignment, syllable structure, paradigm restructuring, paradigm use, lexicon, word formation, semantic borrowing, loan translations, grammatical relation marking, pre- and postnominal modification, negation, subject and object deletion, embedding, and word order.

The aim of the book is to explain the constant success in the TOEFL (Test of English as a Foreign Language) of speakers of the Indian language, Konkani, who live in Goa and to the south of Goa. The evidence seems to point, although inconclusively, to historical and sociolinguistic factors, some of which pertain to India as a whole, while others are unique to the Konkani-speaking regions.

This is one of the earliest books to present a collection of writings on the effects of globalization on India and Indian society. The editors have assembled a team of eminent academics to present a series of critical discussions about important issues of economy and agriculture, education and language, and culture and religion, based on ethnographic case studies from different localities in India. Globalizing India is a major contribution to South Asian Studies, interrogating a topic of contemporary importance - both within the region and internationally.

Modern anthropology would be radically different without this book. Published in 1871, this first major study of kinship, inventive and wide-ranging, created a new field of inquiry in anthropology. Drawing partly upon his own fieldwork among American Indians, anthropologist Lewis Henry Morgan examined the kinship systems of over one hundred cultures, probing for similarities and differences in their organization. In his attempt to discover particular types of marriage and descent systems across the globe, Morgan demonstrated the centrality of kinship relations in many cultures. Kinship, it was revealed, was an important key for understanding cultures and could be studied through systematic, scientific means. Anthropologists continue to wrestle with the premises, methodology,

and conclusions of Systems of Consanguinity and Affinity. Scholars such as W. H. R. Rivers, Robert Lowie, Meyer Fortes, Fred Eggan, and Claude Lévi-Strauss have acknowledged their intellectual debt to this study; those less sympathetic to Morgan's treatment of kinship nonetheless do not question its historical significance and impact on the development of modern anthropology.
