Since the first Congress in Zürich in 1897, the ICM has been an eagerly awaited event every four years. Many of these occasions are celebrated for historic developments and seminal contributions to mathematics. 2002 marks the year of the 24th ICM, the first of the new millennium. Also historic is

the first ICM Satellite Conference devoted to game theory and applications. It is one of those rare occasions, in which masters of the field are able to meet under congenial surroundings to talk and share their gathered wisdom. As is usually the case in ICM meetings, participants of the ICM Satellite Conference on Game Theory and Applications (Qingdao, August 2(02) hailed from the four corners of the world. In addition to presentations of high quality research, the program also included twelve invited plenary sessions with distinguished speakers. This volume, which gathers together selected papers read at the conference, is divided into four sections: (I) Foundations, Concepts, and Structure. (II) Equilibrium Properties. (III) Applications to the Natural and

Social Sciences. (IV) Computational Aspects of Games.

The critical care unit manages patients with a vast range of disease and injuries affecting every organ system. The unit can initially be a daunting environment, with complex monitoring equipment producing large volumes of clinical data. Core Topics in Critical Care Medicine is a practical, comprehensive, introductory-level text for any clinician in their first few months in the critical care unit. It

guides clinicians in both the initial assessment and the clinical management of all CCU patients, demystifying the critical care unit and providing key knowledge in a concise and accessible manner. The full spectrum of disorders likely to be encountered in critical care are discussed, with additional chapters on transfer and admission, imaging in the CCU, structure and organisation of the unit, and ethical and legal issues. Written by Critical Care experts, *Core Topics in Critical Care Medicine* provides comprehensive, concise and easily accessible information for all trainees. *The Final FRCA Short Answer Questions* Disha Publications

This is the first book developed specifically for the Final FFICM structured oral examination. It is written by two senior trainees who have recently passed the exam and is edited by a consultant intensivist with a special interest in education. The book is designed in the style of the SOE, and provides model answers which include summaries of the relevant evidence to guide trainees in their preparation for the exam. The 91 topics and questions therein are drawn from previous exam sittings, and are expanded further to ensure each topic is covered in detail. This text is a valuable revision aid to those studying for the Final FFICM, and will also prove useful to trainees revising for the Final FRCA, as it covers popular ICM topics that often come up in the

anaesthetic fellowship exams.
