NTIS Alert Springer Science & Business Media

In the last few years, the quantity of books and papers on the political, economic and legal problems of the exploration and use of the sea and marine resources has considerably increased. But the status and activities of international organizations related to maritime shipping, fisheries, scientific research in the World Ocean and the protection of the marine environment have not yet, as a whole, been represented in the scientific and reference literature. It would be fair, though, to mention that some general information on marine international organizations may be found in the Yearbook of International Organizations, Brussels, 1979; in Annotated Acronyms and Abbreviations of Marine Science Related International Organizations, U. S. Department of Commerce, 1976; and in the UN Annotated Directory of Intergovernmental Organizations Concerned with Ocean Affairs, 1976. Voluminous information on organizations engaged in problems of the exploration and use of the sea is given in International Marine Organizations by the well-known Polish scientists Lopuski and Symonides, 1978. Meanwhile the increasing volume of practical work related to the participation of governmental and scientific bodies as well as individual scientists and specialists in these

organizations, the necessity of long-term planning in this field, and the perspectives of the development of these organizations, make necessary a special publication depicting the structure and many-sided activities of such international bodies. This book is the first one in which the most complete information on the main marine international organizations is presented.

Resources in Education PIANC

From the sinking of the British passenger liner Athenia on September 3, 1939, by a German U-boat (against orders) to the Japanese surrender on board the Missouri on September 2, 1945, War at Sea covers every major naval battle of World War II. "A first-rate work and the best history of its kind yet written".--Vice Admiral William P. Mack, U.S.N. (Ret.). 30 photos.

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

The Municipal Journal Dangerous Cargoes in Port

This book is the first general treatment of Canadian maritime law to be published since 1916. This comprehensive text covers the whole of modern shipping law, including admiralty jurisdiction and

procedure; ownership of ships; maritime mortgage and liens; insurance; carriage of goods; environmental issues; and limitation of liability.

Administration & Management

A weekly review of politics, literature, theology, and art.

Computerworld

This is the 15th annual edition of the Bibliography of Nautical Books, a reference guide to over 14,000 nautical publications. It deals specifically with the year 2000.
