*Indicator - definition of indicator by The Free Dictionary* The Encyclopedia Of The Indicator in·di·ca·tor / 'indi,kātər / • n. 1. a thing, esp. a trend or fact, that indicates the state or level of something: car ownership is frequently used as an indicator of affluence. 2. a device providing specific information on the state or condition of something, in particular: ■ a gauge or meter of a specified kind: a speed indicator. 3. Indicator | Encyclopedia.com indicator 1. a device to attract attention, such as the pointer of a gauge or a warning lamp 2. an instrument that displays certain operating conditions in a machine, such as a gauge showing temperature, speed, pressure, etc. 3. a device for indicating that a motor vehicle is about to turn left or right, esp two pairs of lights that flash when operated ...Indicator | Article

about indicator by The Free Dictionary Biology. Indicator, a genus of birds in the honeyguide family; Environmental indicator of environmental health (pressures, conditions and responses); Ecological indicator of ecosystem health (ecological processes); Health indicator, which is used to describe the health of a population; Indicator species, a species that defines a characteristic of an environment Indicator - Wikipedia indicator 1. a device to attract attention, such as the pointer of a gauge or a warning lamp 2. an instrument that displays certain operating conditions in a machine, such as a gauge showing temperature, speed, pressure, etc. 3. a device for indicating that a motor vehicle is about to turn left or right, esp two pairs of lights that flash when operated ...Market Indicators | Article about Market Indicators by The ...Chemical indicator, any substance that gives a visible sign, usually by a colour change, of the presence or absence of a threshold concentration of a chemical species, such as an acid or an alkali in a solution. An example is the substance

called methyl yellow, which imparts a yellow colour to an alkaline solution. If acid is slowly added, the solution remains yellow until all the alkali has ...Chemical indicator - Encyclopedia Britannica A pH indicator is a halochromic chemical compound added in small amounts to a solution so the pH (acidity or basicity) of the solution can be determined visually. Hence, a pH indicator is a chemical detector for hydronium ions (H<sup>3</sup>O<sup>+</sup>) or hydrogen ions (H<sup>+</sup>) in the Arrhenius model. Normally, the indicator causes the color of the solution to change depending on the pH. pH indicator - Wikipedia The Encyclopedia is a large and detailed study into the effectiveness of using the RSI to trade futures and foreign exchange contracts, as well as futures spreads and stocks. The Encyclopedia contains an analysis of the 33 most popular energy, agricultural, and metal futures, 20 currency pairs, and 15 futures spreads presented in more than 600 tables. The Encyclopedia's authors are two experts ...Buy The Encyclopedia of the Indicator RSI: Relative ...Indicator organism Indicator organisms,

sometimes called bioindicators, are plant or animal species known to be either particularly tolerant or particularly sensitive to pollution. The health of an organism can often be associated with a specific type or intensity of pollution, and its presence can then be used to indicate polluted conditions relative to unimpacted conditions. [Indicator Organism | Encyclopedia.com](#)

The [Encyclopedia of Technical Market Indicators](#) provides an alphabetical and up-to-date listing of hundreds of today's most important indicators. It defines what each indicator is, explains the philosophy behind the indicator, and of the greatest importance provides easy-to-understand guidelines for using it in day-to-day trading. A universal indicator is a test to measure the pH value of a liquid. The solution that is used has several chemical indicators in it. This means that the indicator is able to show different colours (and therefore pH value ranges). The drawback of this solution is that it cannot be used for titrations, which expect a well-defined change in color.

**Universal indicator Facts for Kids**

A key performance indicator, or KPI for short, is one gauge of how well your business is hitting its performance targets. Profit, sales growth, and employee retention are popular KPIs, but you can't really determine what appropriate KPIs are for your company until you do some goal-setting.
