Penguin  
This book is based on a study of referees' reports and letters from journal editors

on reasons why papers written by non-native researchers are rejected due to problems with English grammar. It draws on English-related errors from around 5000 papers written by non-native authors, several hundred emails, 500 abstracts by PhD students, and over 1000 hours of teaching researchers how to write and present research papers. The exercises

include the following areas: active vs passive, use of we articles (a/an, the, zero) and quantifiers (some, any, few etc) conditionals and modals countable and uncountable nouns genitive infinitive vs -ing form numbers, acronyms, abbreviations relative clauses and which vs that tenses (e.g. simple present, simple past, present perfect) word order Exercise types are repeated for

different contexts. For example, the difference between the simple present, present perfect and simple past is tested for use in papers, referees' reports, and emails of various types. Such repetition of similar types of exercises is perfect for revision purposes. English for Academic Research: Grammar Exercises is designed for self-study and there is a key to all

exercises. Most exercises require no actual writing but simply choosing between various options, thus facilitating e-reading and rapid progress. The exercises can also be integrated into English for Academic Purposes (EAP) and English for Special Purposes (ESP) courses at universities and research institutes. The book can be used in conjunction with the other exercise

books in the series and is cross-referenced to: English for Research: Usage, Style, and Grammar English for Writing Research Papers English for Academic Correspondence and Socializing Adrian Wallwork is the author of around 30 ELT and EAP textbooks. Top 50 Grammar Mistakes Cambridge University Press With more than 50 years of teaching experience between them, Ilse Depraetere and Chad Langford present a grammar pitched precisely at advanced learners of English who

need to understand how the English language really works without getting lost in the complex specifics. Now fully updated and revised throughout, the second edition of this book pulls from linguistic theory all the relevant notions that will enable the language student to fully grasp English grammar. After introducing form and function, the authors cover verbs, nouns,

aspect and tense, modality and discourse. Readers are led through the underlying principles of language use, with the book presupposing only a basic grasp of linguistic terminology and focusing on the critical issues. Full of challenging exercises and supported by a companion website featuring an extensive answer key, a glossary and further exercises for study, this is the reference grammar of

choice for both native and non-native English speakers. English for Research: Usage, Style, and Grammar Cambridge University Press This book deals with the effects of three different learning contexts mainly on adult, but also on adolescent, learners' language acquisition. The three contexts brought together in the monograph include i) a conventional

instructed second language acquisition (ISLA) environment, in which learners receive formal instruction in English as a Foreign Language (EFL); ii) a Study Abroad (SA) context, which learners experience during mobility programmes, when the target language is no longer a foreign but a second language learnt in a naturalistic context; iii) the immersion

classroom, also known as an integrated content and language (ICL) setting, in which learners are taught content subjects through the medium of the target language—more often than not English, used as the Lingua Franca (ELF). The volume examines how these contexts change language learners' linguistic performance, and also non-linguistic, that is, it throws light on how motivation,

sense of identity, interculturality, international ethos, and affective factors develop. To our knowledge, no publication exists which places the three contexts on focus in this monograph along a continuum, as suggested in Pérez-Vidal (2011, 2014), with SA as 'the most naturalistic' context on one extreme, ISLA on the other, and ICL somewhere in between, while framing

them all as international classrooms. Concerning target languages, the nine chapters included in the volume analyze English, and one chapter deals with Spanish, as the target language. As for target countries in SA programmes, data include England, Ireland, France, Germany, and Spain in Europe, but also Canada, China, and Australia. While the

main bulk of the chapters deal with tertiary level language learners, a language learning population which has received less attention by research thus far, one chapter deals with adolescent learners. Carmen Pérez-Vidal, Sonia López, Jennifer Ament and Dakota Thomas-Wilhelm all served on the organizing committee for the EUROSLA workshop held at the Universitat

Expressions cover the grammar structure while loosely based on the subject. Ask them to expand the sentence. What came before, or how can you follow up? Why did they say what they said? 4
