MCMAHON JOHNSON

Social Sciences, Grade 5 Ravenio Books
Pack a bag and prepare to go to some of the most interesting places in the 50 states. Learn about each state's flag, motto, fun fast facts, and more as you fill up your passport crisscrossing the country! From Native American history to

how immigration impacted the nation, you will explore some of the sites and stories that make this vast land remarkable. Did You Know: Montgomery, Alabama, was the site of the first citywide electric trolley system in 1886. Tennessee is home to the largest underground lake in the United States, the Lost Sea, discovered by a 13-year-old boy in 1905. Ohio was home to the first professional baseball team, the Cincinnati Red Stockings in 1869. Benny Benson, an orphan, designed Alaska's

distinctive state flag in 1927. Montana's Triple Divide Peak in Glacier National Park is the only place in North America that allows water to flow in three directions — the Pacific Ocean, the Atlantic Ocean, and Hudson Bay. Texas is the only state to have flags of six different countries fly over it, and it was an independent nation from 1836 to 1846.

Social Sciences, Grade 4 Guilford Publications

Effective science teaching requires

creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. *Science Teaching Reconsidered* provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

Practice, Assess, Diagnose Harper Collins

180 Days of Geography is a fun and effective daily practice workbook designed to help students learn about geography. This easy-to-use fifth grade workbook is great for at-home learning or in the classroom. The engaging standards-based

activities cover grade-level skills with easy to follow instructions and an answer key to quickly assess student understanding. Each week students will explore a new topic focusing on map skills, applying information and data, and connecting what they have learned. Watch students build confidence as they learn about location, place, human-environment interaction, movement, and regions with these quick independent learning activities. Parents appreciate the teacher-approved activity books that keep their child engaged and learning. Great for homeschooling, to reinforce learning at school, or prevent learning loss over summer. Teachers rely on the daily practice workbooks to save them valuable time. The ready to implement activities are perfect for daily morning review or homework. The activities can also be used for intervention skill building to address learning gaps.

Study and Master Geography Grade 10 CAPS Study Guide McGraw-Hill Education

Supplement your social studies curriculum with 180 days of daily practice! This essential classroom resource provides

teachers with weekly social studies units that build students' content-area literacy, and are easy to incorporate into the classroom. Students will analyze primary sources, answer text-dependent questions, and improve their grade-level social studies knowledge. Each week covers a particular topic within one of the four social studies disciplines: history, economics, civics, and geography. Aligned to the National Council for the Social Studies (NCSS) and state standards, this social studies workbook includes digital materials.

Study and Master Technology Grade 7 for CAPS Teacher's Guide Knowledge Quest
 Wherever there is greenery, photosynthesis is working to make oxygen, release energy, and create living matter from the raw material of sunlight, water, and carbon dioxide. Without photosynthesis, there would be an empty world, an empty sky, and a sun that does nothing more than warm the rocks and reflect off the sea. Eating the Sun is the story of a world in crisis; an appreciation of the importance of plants; a history of

the earth and the feuds and fantasies of warring scientists; a celebration of how the smallest things, enzymes and pigments, influence the largest things, the oceans, the rainforests, and the fossil fuel economy. Oliver Morton offers a fascinating, lively, profound look at nature's greatest miracle and sounds a much-needed call to arms—illuminating a potential crisis of climatic chaos and explaining how we can change our situation, for better or for worse.
