Mastering the Case

Analysis CRC Press

A case is a description of an actual business situation. In the classroom students are expected to identify the problem, generate alternative solutions, evaluate the alternatives and make a decision that can be reasonably implemented. The case method which involves active participation by students in the classroom process is particularly valuable in providing students with the skills and knowledge needed to become a superior practicing manager. The case method of teaching has been in use in western business schools and management training programs for almost 100 years and has been widely adopted. But the case method

has only been introduced in China relatively recently. In this ground breaking study Jim Hatch and Fengli Mu conducted over 100 interviews with administrators, professors and students at China's top business schools focusing on the opportunities and challenges that this method presents. This book will be valuable to a wide variety of audiences including instructors who employ the case method in university and executive development programs, managers of human resource development departments, and multinational companies seeking insights into working with Chinese managers.

Doing Case Study

Research Notion Press
This book provides a basis for class discussion about the responsible conduct of social science research. These 16

brief research ethics cases describe situations in which ethical dilemmas arise and present the student with the opportunity to think through the different implications for researchers. The cases emphasize different types of ethical dilemmas involving faculty, students, participants, and stakeholders. Students can discuss what happened, why it was or was not unethical, and what should be the consequences for the actors. Included are the original cases complete with learning objectives, teaching notes, and questions for discussion.

How is it like studying in a graduate business school that deliver case study teaching

method? Are you planning to write your own case study for your graduate thesis? What are the practical details to consider when writing case study?The book is developed based on the author's experience when taking two years study in a graduate business school in the city of Jakarta. It was an executive weekend program with general management major at Binus Business School. Before participating in the program, the author found it was difficult for aspiring students to find information about "what is it going to like studying in a Graduate Business School?" Then, in early days on initial class sessions, students are struggling to adjust themselves to

a new way of teaching: case study teaching method. It is good if students can acquire this information early such as "how is the typical case study teaching method look like?". Moreover, later in the final year of their study following the completion of all required subjects, students may finally decide to develop a case study for their thesis. Some of them may wonder, "I have been exposed to hundreds of case studies during my study, and now I have decided that I want to write a case study by my own -- how do I start then?" Chapters in this book have been arranged as such, that it will practically give an illustration to aspiring students about studying in a graduate

business school, which adopts case method. Case study teaching method has been increasingly adopting by business schools around the world since its early application in Harvard Law School. Discussion within chapters are enriched with comments by graduates from Indonesian business schools such as IPMI Business School, Master of Management Gajah Mada Business School (MMUGM) , Magister Manajemen Agribisnis (MMA-IPB), Master of Management Universitas Indonesia (MMUI), Binus Business School (BBS), PPM Institute of Management (Sekolah Tinggi Manajemen PPM), and Prasetiya Mulya Business School. The authors

certainly hope that this book will be helpful for aspiring graduate business school students as well as for those ones pursuing their study. The book is intended to serve as an illustration on previous learning experience in business schools, and as a practical guide for students during their study in a graduate business school - especially ones that are adopting case teaching method. In addition, the book will benefit those students in their final year while writing a case study as their thesis. As more graduate business students choose to write case studies, the more local case studies are contributed to Indonesian education. Further, this book may also be useful for parents, who are

planning to send their children to business schools overseas. Graduate business schools in Indonesia can strongly be considered as feasible alternatives.

After all the hard work on your application, you're finally in to business school. Now what? The acceptance letter is just the beginning of your MBA experience. Even before classes start, you'll face all kinds of new challenges: financing your degree,

readjusting to homework, schmoozing recruiters. Now you can turn to this book, produced by Manhattan GMAT—one of the leading names in GMAT preparation—to ready you for the challenges you'll face as a newly-minted MBA candidate. *Case Studies & Cocktails* will be your go-to guide as you prepare to enter your MBA program and throughout your time at b-school. The authors—MBAs themselves—have drawn on their own experiences and interviewed current students for the inside scoop on every aspect of b-school, from telling the boss you're going back to school to balancing wine and cheese in one hand while networking.

The result is both a handbook for the social side of school and an academic primer on the material you have to master. The book even includes a glossary of need-to-know jargon, so you won't feel lost when classmates start slinging around acronyms.

Case Study Method in Leading Graduate Business Schools

Routledge

The Case Study method of teaching and learning, adopted by business schools and management centres globally, provides an important function in management education, but employing it effectively can often be a challenge. This book provides practical insights, tools and approaches for both case teaching and writing, drawing on perspectives from expert practitioners around the world. This book aims to critically examine different approaches to using case studies in group-based, participant-centred learning environments, exploring good practices for case teaching and learning. It provides guidance

for case writers on various approaches to structuring case data, presentational formats, and the use of technology in the construction of different types of cases. It also demonstrates the use of the case method as a tool for assessment, supporting students' own development of cases to showcase good practice in organisations. The final section of this book showcases some of the resources available, providing links and reviews of additional material that can support future case teaching and writing practice, including publication. The Case Study Companion is designed for lecturers using cases within their teaching across all management

disciplines, as well as those training for Professional Development and Management Education qualifications. It will also be useful for postgraduate, MBA and Executive Education students wanting to make the most of case studies in their learning and assessments.
