Vertigo and dizziness rate among the most frequently occurring presenting complaints in neurology and in general medical practice. Since most patients do not have acute complaints at the time of examination, the clinician requires keen judgment in making a diagnosis, as patients often report confusing, real, or hypothetical causes of their problems. An improvement in the scientific understanding of vestibular physiology in recent years has led to the development of new diagnostic tests and more effective therapies. However, many of these advances have been slow to be adopted into routine clinical practice. Part of the Oxford Neurology Library (ONL) series, *Vertigo and Dizziness* helps clinicians improve their management of patients with these conditions. The text provides an overview of clinical vestibular physiology as well as of the latest developments in bedside examination, diagnosis/differential diagnosis, and state-of-the-art therapy. *Vertigo and Dizziness* serves as an essential clinical guide for neurologists, otorhinolaryngologists, and trainees in those disciplines, and for general practitioners and medical students.

For athletes in any sport: a guide to entering "the Zone" at will "The Zone" is that quasi-mystical state achieved only rarely by athletes, when everything flows effortlessly and you can do no wrong. Unfortunately, we enter the Zone seemingly at random, when it is least expected. The great hope of all competitors is to be able to summon the Zone at will. Toward this end, Back to the Zone breaks the Zone down into its many components and helps the athlete optimize each one: balance, absorption, clarity, feedback, concentration, control, loss of self-consciousness, imagination, positive thoughts, energy, self-esteem, meditation, and quiet mind. Ultimately, Damien Lafont shows us that reaching the Zone is more about freeing our mind from the unnecessary rather than learning new techniques and concepts. This is a short, clear, practical guide for athletes in all sports. With it the golfer or the baseball player, the runner or the swimmer, the tennis player or the cyclist will all reach new levels of performance, and will find themselves "in the Zone" more often.

"Every athlete must go beyond; transcend the barriers of pain, mind and fear. Here, they reach a holy land within themselves that gives the athlete the gift and power of feeling oneness—a connectedness. Every athlete and person has the ability to experience this grand unity and I applaud anyone who reads this book and is inspired to allow this true and natural experience for themselves." —Catherine Louise Birmingham, international equestrian rider, coach, and author of

Ride for Life: Three Golden Principles for Riders “Words often feel inadequate to describe the quasi-mystical state of ‘being in the Zone.’ Damien Lafont’s Back to the Zone remarkably achieves a new level of understanding, insightfully using the voices of those who experienced it, blending them as in a Bach fugue, as in a collective jazz improvisation. Reading this book, we feel closer to it, we feel it.” —Marco Iacoboni, professor, UCLA, and author of Mirroring People: The Science of Empathy and How We Connect with Others

This book offers an introduction to the key legal and ethical topics confronting Australian journalists and strategic communicators both at home and internationally and offers a suite of reflective techniques for navigating them. It starts by positioning morals, ethics, and the law in their historical and philosophical frameworks by tracing the evolution of free expression and professional media ethics. Media law and ethics are then contextualized in their modern international human rights framework. Readers are equipped with a skill set for reflecting on the law and ethics of professional media dilemmas – including mindful reflection, the Potter Box, journaling, concept mapping, and discussion. Such approaches are then applied to key topic areas, including free expression; reputation; confidentiality; privacy; justice; intellectual property; national security; discrimination and harassment; and conflicted interests. Each is examined in terms of its philosophical underpinnings, relationship to human rights, professional ethical context, international examples, legal principles, key Australian laws, legal cases, and strategies for applying reflective practice techniques. It concludes on a confident note – imploring communicators to engage in constructive and mindful strategic communication with the authority and confidence that results from a working knowledge of media law and ethics. This handbook is for professional communicators and students in all fields, but particularly in journalism, public relations, corporate communication, media relations, and marketing.

Many successful parents have spent their lives creating a financial bonanza for themselves, as well as their children and grandchildren. What they didn't plan for are the unintended consequences that increased wealth brings. These include issues like entitlement and loss of work ethic among the rising generation, and increased potential for upsets, disputes, and strained relationships that can often progress to separation and even lawsuits. Richard M. Del Monte, CFP®, CWC, wealth consultant and author of *ENDLESS INHERITANCE: Moving from Feuding to Flourishing in Your Affluent Family* aims to help affluent families prepare for and prevent the destructive forces that wealth brings, and help them resolve all their conflicts, prepare the heirs to handle the wealth they will inherit, and create a scenario in which money becomes a tool to unleash and achieve the family's greatest potential, now and in future generations. Seventy percent of affluent families fail at passing on wealth through the second generation, meaning the kids either squander all the money or wind up fighting with or suing each other. Written as a guide, *ENDLESS INHERITANCE: Moving from Feuding to Flourishing in Your Affluent Family*, outlines how to prepare the rising generation of a wealthy family—not just to inherit worldly goods, but to be engaged and contributing members of the family, to appreciate their shared history, resolve conflicts quickly before they escalate, and to be able to handle the responsibilities and opportunities that come with wealth. As a wealth consultant, asset manager, and trained specialist in family dynamics, Richard M. Del Monte outlines a plan of action supported by resources and exercises to empower parents and children alike to start the often difficult conversations needed to overcome poor relationships, lack of trust, and entitlement. The book addresses financial planning aspects wealthy families should consider, as well as the family's interpersonal relationships and training that need to be addressed to ensure their wealth and family harmony last for generations.

A Handbook of Practical Logic and Clear Thinking In lively, straightforward prose, Patten lays out some general principles of clear thinking . . . then, chapter by chapter, examines various forms of false reasoning to which we might fall victim . . . Patten doesn't minimize the mental effort required to master clear thinking, but his own clear writing and down-to-earth tone make it as painless as it can be to strengthen your ability to reason and see the faults in the reasoning of others. - Publishers Weekly Want to sort out the claims of experts, pseudo-experts, scam artists, and liars alike? Want to protect yourself from the dangers of the ubiquitous nonsense and outright frauds that assault you from every side? Want to become acquainted with the pleasurable activity of discovering truth while enhancing your sophistication as a thinker? In this erudite yet entertaining handbook on critical thinking, Dr. Bernard M. Patten uses neuroscience, psychology, and psychiatry to teach you to do all this and more. He shows you that clear thinking is not just fun but also keeps you out of trouble, makes you more efficient, helps you develop and maintain prosperity, and generally gives you an edge in both your personal and business life. A Board Certified neurologist and a lecturer in formal, informal, and symbolic logic at Rice University, Dr. Patten has the scientific background as well as the philosophical training to give readers the most reliable and current information on how the brain thinks, learns, and remembers. By means of multiple (and sometimes startling) contemporary examples and insights, the author exercises your mind as an exercise machine might exercise your muscles. Each exercise is specifically formulated with the neuropsychology of learning in mind (repetition, tied association, visual images, distribution of tasks in time, modularity, etc.), so the reader acquires valuable knowledge quickly and painlessly. Emphasizing practical usefulness in real-life situations and evidence-based analysis, Dr. Patten examines: investment frauds and other scams' groupthink' the psychology of belief' content analysis' hidden meanings' negotiation strategies He also gives careful attention to the rules of clear thinking, discusses the reality principle, explains inductive and deductive logic, exposes traditional fallacies, and elucidates truth tables, syllogisms, and symbolic logic. Fast, fact-filled, and fun, this superb self-help guide to better thinking teaches you to take control of your own destiny by accurately determining the truth value of statements and behaviors in many contexts. Bernard M. Patten, M.D., now retired, was formerly the chief of the Neuromuscular Disease Division, vice chairman of the Department of Neurology, and attending neurologist at the Baylor College of Medicine. He now lectures in clear thinking, mental gymnastics, logic, and neuroscience at Rice University and the Women's Institute of Houston. He is
