Smart. Funny. Fearless."It's pretty safe to say that Spy was the
most influential magazine of the 1980s. It might have remade

New York's cultural landscape; it definitely changed the whole tone of magazine journalism. It was cruel, brilliant, beautifully written and perfectly designed, and feared by all. There's no magazine I know of that's so continually referenced, held up as a benchmark, and whose demise is so lamented" --Dave Eggers. "It's a piece of garbage" --Donald Trump.

Visioning Technologies brings together a collection of texts from leading theorists to examine how architecture has been, and is, reframed and restructured by the visual and theoretical frameworks introduced by different 'technologies of sight' - understood to include orthographic projection, perspective drawing, telescopic devices, photography, film and computer visualization, amongst others. Each chapter deals with its own area and historical period of expertise, organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today. This book underlines the way in which architectural forms and design processes have developed historically in conjunction with the systems of sight we manufacture technologically and suggests this continues today. Paradoxically, it is premised on the argument that these technological systems tend, in their initial formulations, to obtain ever greater realism in our visualizations of the physical world.

"Animated by a luminous goddess at its center, the diva film provided a forum for denouncing social evils and exploring new models of behavior among the sexes...Dalle Vacche offers the first authoritative study of this important film genre of the cinema that preceded the First World War...Contrasting the Italian diva with the Hollywood vamp Theda Bara and the famous Danish star Asta Nielsen, Dalle Vacche shows how the diva oscillates between articulating Henri Bergson's vibrant life-force and representing the suffering figure of the Catholic mater dolorosa." -- Cover.

This volume provides a history of the most consequential 35mm motion picture camera introduced in North America in the quarter century following the Second World War: the Arriflex 35. It traces the North American history of this camera from 1945 through 1972—when the first lightweight, self-blimped 35mm cameras became available. Chronicle of a Camera emphasizes theatrical

film production, documenting the Arriflex's increasingly important role in expanding the range of production choices, styles, and even content of American motion pictures in this period. The book's exploration culminates most strikingly in examples found in feature films dating from the 1960s and early 1970s, including a number of films associated with what came to be known as the "Hollywood New Wave." The author shows that the Arriflex prompted important innovation in three key areas: it greatly facilitated and encouraged location shooting; it gave cinematographers new options for intensifying visual style and content; and it stimulated low-budget and independent production. Films in which the Arriflex played an absolutely central role include Bullitt, The French Connection, and, most significantly, Easy Rider. Using an Arriflex for car-mounted shots, hand-held shots, and zoom-lens shots led to greater cinematic realism and personal expression.

Eric Rentschler's new book, *The Use and Abuse of Cinema*, takes readers on a series of enthralling excursions through the fraught history of German cinema, from the Weimar and Nazi eras to the postwar and postwall epochs and into the new millennium. These journeys afford rich panoramas and nuanced close-ups from a

nation's production of fantasies and spectacles, traversing the different ways in which the film medium has figured in Germany, both as a site of creative and critical enterprise and as a locus of destructive and regressive endeavor. Each of the chapters provides a stirring minidrama; the cast includes prominent critics such as Siegfried Kracauer and Rudolf Arnheim; postwar directors like Wolfgang Staudte, Rainer Werner Fassbinder, Wim Wenders, and Alexander Kluge; representatives of the so-called Berlin School; and exponents of mountain epics, early sound musicals, rubble films, and recent heritage features. A film history that is both original and unconventional, Rentschler's colorful tapestry weaves together figures, motifs, and stories in exciting, unexpected, and even novelistic ways.

DivShooting with Soul is a glorious and beautiful book for anyone who loves to take pictures. Whether you are an aspirational photographer, artist, creative mom, or blogger, you will enjoy expanding your understanding of this medium by exploring 44 weeks of unique and reflective prompts and exercises aimed to demystify seemingly "œtechie" topics and enhance your creative self-expression. No matter what camera you own, an SLR, point and shoot, or even a camera phone, this book offers tips and methods for any device that snaps a photo. New technology is making it easier to share photography, and interest in photos is being fueled by the popularity of photo-based apps and social networking sites such as Pinterest, Instagram, Hipstamatic, Flickr, and tumblr blogs. Sharing photos with friends and family has become as easy as pushing a button, however, finding the right photos to take and

coming up with creative concepts for jaw-dropping photos remains something that needs to be explored and fostered. Shooting with Soul teaches successful photography methods through an approach that is very much like journaling. By putting deep thought and feeling into the process, and into the exercises, which focus on personal exploration and autobiographical information, you will become able to create images that are infused with soul and that connect you with your viewers more deeply, whether they are friends and family, a professional art audience, or followers of a blog or website.

Fables of content and undoing on the current state of architecture. In *How Architecture Got Its Hump*, Roger Connah explores the "interference" of other disciplines with and within contemporary architecture. He asks whether photography, film, drawing, philosophy, and language are merely fashionable props for architectural hallucinations or alibis for revisions of history. Or, are they a means for widening the site of architecture? Connah shows how these disciplines have not only contributed to new developments in architectural theory and practice, but have begun to insinuate new possibilities of space. Sometimes seamless, sometimes awkward like the hump acquired by the

camel in one of Rudyard Kipling's *Just So Stories*, these disciplines have had their own responsibilities and excesses grafted onto architecture, just as architecture has tried to shake off their limitations. Taking interference a step further, Connah also considers the implications of philosophical incongruity and architectural unrest. He asks how architecture loses its head, transcends the dead language it now entraps, and houses meanings it wants to contest. Hardly bleak questions, suggests Connah, for they point to ways for architecture to rescue itself.

The first comprehensive overview of an influential American photographer and filmmaker whose work is known for its intimacy and social engagement. Coming of age in the 1960s, the photographer Danny Lyon (b. 1942) distinguished himself with work that emphasized intimate social engagement. In 1962 Lyon traveled to the segregated South to photograph the civil rights movement. Subsequent projects on biker culture, the demolition and redevelopment of lower Manhattan, and the Texas prison system, and more recently on the Occupy movement and the vanishing culture in China's booming Shanxi Province, share Lyon's signature immersive approach and his commitment to social and political issues that concern those on the margins of society. Lyon's photography is paralleled by his work as a filmmaker and a writer. *Danny Lyon: Message to the Future* is the first in-depth examination of this leading figure in American photography and film, and the first publication to present his influential bodies of work in all media in their full context. Lead essayists Julian Cox and Elisabeth Sussman provide an account of Lyon's five-decade career. Alexander Nemerov writes about

Lyon's work in Knoxville, Tennessee; Ed Halter assesses the artist's films; Danica Willard Sachs evaluates his photomontages; and Julian Cox interviews Alan Rinzler about his role in publishing Lyon's earliest works. With extensive back matter and illustrations, this publication will be the most comprehensive account of this influential artist's work.

In the late fifteenth century, clocks acquired minute hands. A century later, second hands appeared. But it wasn't until the 1850s that instruments could recognize a tenth of a second, and, once they did, the impact on modern science and society was profound. Revealing the history behind this infinitesimal interval, *A Tenth of a Second* sheds new light on modernity and illuminates the work of important thinkers of the last two centuries. Tracing debates about the nature of time, causality, and free will, as well as the introduction of modern technologies—telegraphy, photography, cinematography—Jimena Canales locates the reverberations of this “perceptual moment” throughout culture. Once scientists associated the tenth of a second with the speed of thought, they developed reaction time experiments with lasting implications for experimental psychology, physiology, and optics. Astronomers and physicists struggled to control the profound consequences of results that were a tenth of a second off. And references to the interval were part of a general inquiry into time, consciousness, and sensory experience that involved rethinking the contributions of Descartes and Kant. Considering its impact on much longer time periods and featuring appearances by Henri Bergson, Walter Benjamin, and Albert Einstein, among others, *A Tenth of a Second* is ultimately an important contribution to history and a novel perspective on modernity.
