The Ancient Alien Theory: Part Three SAGE

Everyone has heard of Close Encounters of the Third Kind. But what about close encounters of the fatal kind? The field of UFOs is rife with unsettling examples of suspicious deaths. Accounts of accidents that might not have been accidents after all, abound.

Researchers and witnesses have vanished, never to be seen again. Conveniently timed heart attacks are reported. Out-of-the-blue suicides that, upon investigation, bear the distinct hallmarks of murder, are all too common. And grisly deaths at the hands of both extraterrestrials and government agents have occurred. Highlights of Close Encounters of the Fatal Kind include: The strange saga of the incredible melting man. The UFO-related death of the first U.S. Secretary of Defense, James Forrestal. The mysterious disappearances of military pilots and their connection to UFOs. The connections between national security and the

sudden deaths of UFO investigators. Getting too close to the cosmic truth about alien abductions, Roswell, and what the government really knows about UFOs can—clearly—be a deadly business. The government’s latest admission of the existence of Area 51 is barely the tip of a very big iceberg.

In 1945, the Japanese cities of Hiroshima and Nagasaki became the first and last victims of the atom bomb, the most destructive man-made force our planet has ever known. Or were they just the latest in a long line of Armageddon-level events? Is it possible that our civilization is, in reality, just one of many? Did previous cultures blossom, develop, and thrive, only to destroy themselves, tens or hundreds of thousands of years ago, with the same atomic technology? These are the controversial and thought-provoking questions at the heart of Nick Redfern’s *Weapons of the Gods*, which argues that many ancient civilizations cracked the secrets of the atom, only to become the victims of its awesome, terrifying power. Still others may have been destroyed by hostile aliens with their own nuclear arsenals. Where is the evidence? The answer is shockingly simple: it’s everywhere. It’s just a matter of knowing where to look for it, from the biblical cities of Sodom and Gomorrah and the ancient Pakistani culture of Mohenjo-daro, Pakistan, to the Lonar Crater in India and the revelations in the Ramayana and Mahabharata, two

ancient Sanskrit texts that describe nuclear warfare thousands of years ago.

As a student of American history, as a hunter, horseman, and former Marine, and as someone passionate about the West, Dan Aadland had long felt a kinship with Theodore Roosevelt. One day, on a single-footing horse, lever-action rifle under his knee, Aadland set out to become acquainted with TR as only those who shared his experiences could. In *Trace of TR* documents that quest, inviting readers to ride along and get to know Theodore Roosevelt through the western environment that so profoundly influenced him. Accompany Aadland as he rides the broad prairies in search of TR’s “prongbuck,” tracks elk through the rugged Big Horn Mountains, and pursues a glimpse of the grizzly in the Absaroka Wilderness. Along the way the author’s campfire musings and reflections on Roosevelt’s writings further deepen and enrich this unique examination of our twenty-sixth president. With the trill of the western meadowlark and the bugle of the elk, the creak of saddle leather and the scent of sage, Aadland’s journey takes readers into TR’s beloved Dakota Territory then and now, offering a kindred spirit’s moving, deftly drawn portrait of both the land and the man across the space of a century.

Are there 10,000-year-old secret societies that still exist today? Was there a race of giants that once inhabited the Americas? Did ancient Egypt and ancient China have heretofore undiscovered ties? *Lost Secrets of the Gods* delves into these ancient mysteries

and many more in articles by some of the world's most intrepid and knowledgeable researchers. The old paradigms of history are being radically transformed as we discover more evidence of little-known cultures and what they achieved. Many ancient cultures spoke and wrote of visitors that gave them knowledge and helped shape their societies. Who were they, and where did they come from? We now know that many ancient cultures had advanced knowledge of science, agriculture, and astronomy, only some of which has been rediscovered in the last 100 years. Were The Iliad and The Odyssey really about an epic struggle in pre-Celtic Europe? What happened to the Persian army that completely disappeared from Egypt 2,500 years ago? Did the ancients know how to create psychic guard dogs to protect sacred sites? There is much more to history than what has officially been recorded. *Lost Secrets of the Gods* reveals startling truths and asks fascinating questions traditional historians have long ignored.

Immortality of the Gods Del Rey
Close Encounters of the Fourth Kind: cases in which personal

contact between an individual or individuals is initiated by the "occupants" of the spacecraft. Such contact may involve the transportation of the individual from his or her terrestrial surroundings into the spacecraft, where the individual is communicated with and/or subjected to an examination before being returned. One might expect that a "scientific conference" devoted to people who have reported being kidnapped by "little green men" would be dismissed out of hand. But C.D.B. Bryan, the greatly admired journalist and author of *Friendly Fire*, did not dismiss it: the conference was to be held at the Massachusetts Institute of Technology and would have as its chairmen a Pulitzer Prize-winning Harvard psychiatry professor and a professor of physics from M.I.T. Bryan attended the conference throughout its five days. He approached the subject with no prior stand, no agenda, and an open (if slightly skeptical) mind. As the conference progressed, he was astonished by the quality of the stories told by the hundreds of men and women who came forward hesitantly and reluctantly with their utterly amazing—and utterly convincing—accounts of having been abducted and then examined aboard extraterrestrial spacecraft by spindly limbed, telepathic gray creatures with outsized foreheads dominated by huge, compelling, tear-shaped black eyes. What most astonished Bryan were the similarities found again and again in these accounts and the consistency of their details. It is here that the heart of the mystery lies: as the Harvard professor John E. Mack asked at the conference, "If what the abductees are saying isn't happening to them, then what is?" This question—and the possible answers—are at the center of this richly explicit, serious, and riveting book. Bryan recreates the conference. He interviews

ufology's most prominent psychiatrists, psychologists, hypnotherapists, researchers, physicists, physicians, and folklorists. He interweaves throughout the testimony of the abductees themselves, who tell us their stories in chilling detail. He presents, in depth, the Close Encounter experiences of two women whose stories he tells on the basis of both their spontaneous recollections of the events and their memories that were retrieved through sessions of hypnosis of which Bryan himself was a witness. Finally, Bryan examines the current theories—psychological, psychiatric, medical, parapsychological—that have been put forward by the unconvinced to explain the abduction phenomenon. Are the abductees suffering from some sort of false memory syndrome? . . . a multiple or dissociative personality disorder? . . . Are they fantasy-prone? Close Encounters of the Fourth Kind is a detailed, objective exploration—the most concrete to date—of one of the enduring and amazing mysteries of our time. It is a book that will equally fascinate believers and nonbelievers.

The devil goes by many names, and his tribe is legion. Throughout human history, we have been obsessed with the dark opposites of God and angels, light, and mercy. Whether it is our religious and sacred texts, folklore and myths of old, legends, fairy tales, novels, or the movies and television shows of today, the dark entities enthrall us, terrify us, and remind us of the dualities of life. But where did they originate? Are they real? Does every religion or region of the world include them? Exploring over two dozen religious traditions, myths, folkloric and spiritual traditions, the world of the supernatural, and the demons, the

Devil, and fallen angels in today's pop culture, Demons, the Devil, and Fallen Angels is a comprehensive resource of the many faces of the devil, his minions, ominous deities, and the darker side of nature and ourselves. From ancient demon worship to modern Satanism, the bloody era of the Inquisitions and later witch burnings to the Satanic Panic of the late-twentieth century, and secret occult societies to Hitler's involvement with demonology, this book covers it all. Readers will learn about the key figures in history associated with demons and the Devil, the worshiping of the dark forces, and the lives of Aleister Crowley, John Dee, and Anton LaVey, as well as well-known figures who were alleged Satanists, some of whom may surprise you! Also featured are dozens of examples of links between demons/fallen angels and aliens, cryptids, apparitions and poltergeists, and IDEs (interdimensional entities). Were the demons of the Bible possibly ancient alien visitors? Are alien abductions and poltergeists really demons in disguise? Is Slender Man a modern day demonic entity ... or totally fake? This fascinating look at Satan, evil spirits, and their 10,000-year history has 120 photographs, drawings, and illustrations to bring the portraits of over 200 demons and fallen angels to shivering life. Demons, the Devil, and Fallen Angels also includes a helpful bibliography and an extensive index, adding to its usefulness. It is a comprehensive, clear, and objective look at a subject that fills most people with fear and dread. Yet the presence of dark angels continues to remain a part of our human experience, our popular culture, and our spiritual understandings. Come and explore the shadowy side of existence and its integral part of our nature.

1969 was a momentous year for the world and especially America. It was a year when man first set foot on the moon and in an equally amazing feat, the New York Mets won baseball's coveted World Series. While earth shaking events were happening two hundred thousand miles from home or deep within the confines of Shea Stadium, men of every race, education and age group were fighting and dying 12,000 miles from home in America's most unpopular war, Vietnam. Today, 40 years later, writer, husband and Veteran Jack Manick reaches into his soul and resurrects the fear, tension, foreboding, laughter and terror that he and his fellow "Band of Brothers" felt as they walked the jungles and forests of the Central Highlands of Vietnam in 1969. While in the "Bush", he carried a pack, a medical aid bag, two knives, three grenades, a rifle, pistol and an unbreakable commitment to save the lives of his fellow soldiers, even at the cost of his own. The story of Jack "Doc" Manick and his fellow soldiers is one of survival...survival in a country laden with malaria, crawling with venomous snakes, scorpions, rats, giant centipedes and tigers and dominated by an enemy determined "Not to lose the War!" The language is as tough as the enemy who fought against him, as unrelenting as the blistering heat of the Dry Season and as depressing as the endless mud and mold of the Monsoon Season. Incoming invites you to lace up your jungle boots and take a walk with Jack through the jungles and the fields of dry grass in the Central Highlands of Vietnam in 1969.

Each of us are alive for a very limited time. Or are we? What if we could live not just for a century, but for millennia? What if there

were a way for us to never die? Is such a thing even remotely possible? It may not only be feasible; it may very well have been achieved in the distant past. Ancient aliens may well have uncovered the secrets behind slowing, and ultimately completely stopping, the aging process. History is filled with accounts of fantastic beings, powerful gods, and half-human/half-alien entities that had extraordinarily long lifespans. Many such stories are now largely dismissed as nothing more than the stuff of legend, folklore, and mythology. But what if the accounts are all too real? Highlights of Immortality of the Gods include: The story of the legendary Anunnaki, how they achieved everlasting life, and why they shared their secrets with Noah, Methuselah, and other biblical figures. The saga of Gilgamesh, a long-lived part-human, part-extraterrestrial Sumerian ruler who was obsessed with immortality. A study of the claims that one of the reasons for the 2003 invasion of Iraq was to uncover the millennia-old secrets of white powder gold, a manna-like substance that supposedly rejuvenates cells and tissue.

(Applause Books). "Morton has written the definitive book on this innovative movie by Steven Spielberg...Meticulous research of this caliber is not found in other books on Close Encounters. Fans will find Morton's take informative and fascinating." Library Journal. Steven Spielberg's 1977 masterpiece used all of the power and magic of cinema to tell a story of man's first meeting with extraterrestrial beings. Renouncing the fear and pessimism of the day, writer/director Spielberg boldly envisioned this as a peaceful, spiritual event full of hope and possibility. This awe-inspiring message made a powerful impact on audiences

desperate for something to believe in. The film was a massive box-office hit and revolutionized the movie industry; along with Star Wars, it helped to create the modern blockbuster and ushered in a new era of hi-tech effects. Based on in-depth research and the recollections of many of the film's principal creators, *Close Encounters* is the first book to chronicle the making of this classic film from its inception through its tumultuous production to its many releases in "special" editions. The book features new interviews with star Teri Garr, producer Michael Phillips, photographic effects supervisor Douglas Trumbull, production designer Joe Alves, and several cinematographers, screenwriters, and special-effects legends. John Hill, Jerry Belson, Hal Barwood, and Matthew Robbins; and special effects legends Richard Yuricich, Robert Swarthe, Dennis Muren, Scott Squires, Greg Jein, and Rocco Gioffre.

From the dawn of humanity, the desire to control the thoughts, behaviors, and actions of others has been a pervasive one. From the use of coercive persuasion by ancient Egyptians and the Knights Templar to today's claims of electronic harassment and microwave "bombing," we have always been at the mercy of those who wish to reprogram our thoughts and reshape our

beliefs. *Mind Wars* includes fascinating stories of: Ancient attempts at mind control using spell casting, potions, and rituals. Cults and the use of mental reprogramming. More modern mind-control techniques, from hypnosis, drugs, and electroshock to radiation and psychic driving. The inside story of the quest for a real Manchurian Candidate—MKUltra and the CIA connection. The brave new world of electronic harassment, "voice to skull" technology, and gang-stalking. The inner frontier of the human mind is the last bastion of privacy. But are we really in control of our own minds? The answer may shock you!

Foreign Object Debris and Damage in Aviation discusses both biological and non-biological Foreign Object Debris (FOD) and associated Foreign Object Damage (FOD) in aviation. The book provides a comprehensive treatment of the wide spectrum of FOD with numerous cost, management, and wildlife considerations. Management control for the debris begins at the aircraft design phase, and the book includes numerical analyses for estimating damage caused by strikes. The book explores aircraft operation in adverse weather conditions and inanimate FOD management programs for airports, airlines, airframe, and engine manufacturers. It focuses on the sources of FOD, the categories of damage caused by FOD, and both the direct and indirect costs caused by FOD. In addition, the book provides management plans for wildlife, including positive and passive methods. The book will interest aviation industry personnel, aircraft transport and ground operators, aircraft pilots, and aerospace or aviation engineers. Readers will learn to manage FOD to guarantee air traffic safety with minimum costs to airlines

and airports.
