In this immensely timely book, Andrew Yarrow brings the sometimes eye-glazing discussion of national debt down to earth, explaining in accessible terms why federal debt is rising (and will soon rise much

faster), what effects it may have on Americans if debt is not brought under control, why our government borrows, and what it will take to pay it all back. The picture Yarrow paints should concern all Americans. Specifically, he brings to light how rising Medicare, Social Security, and other spending on one hand, and insufficient government revenues on the other, make a mockery of fiscal responsibility. Deficits and debt, Yarrow asserts, are crowding out spending on needed investments in science, environment, infrastructure, and other domestic discretionary programs and could severely harm our nations and our citizens future. But he makes clear that this does not have to be a doomsday scenario. If we act in a bipartisan fashion to restore fiscal health, our legacy to the next generation can be much more than trillions of dollars of IOUs.

*Legitimizing Television: Media Convergence and Cultural Status* explores how and why television is gaining a new level of cultural respectability in the 21st century. Once looked down upon as a "plug-in drug" offering

little redeeming social or artistic value, television is now said to be in a creative renaissance, with critics hailing the rise of Quality series such as *Mad Men* and *30 Rock*. Likewise, DVDs and DVRs, web video, HDTV, and mobile devices have shifted the longstanding conception of television as a household appliance toward a new understanding of TV as a sophisticated, high-tech gadget. Newman and Levine argue that television's growing prestige emerges alongside the convergence of media at technological, industrial, and experiential levels. Television is permitted to rise in respectability once it is connected to more highly valued media and audiences. Legitimation works by denigrating "ordinary" television associated with the past, distancing the television of the present from the feminized and mass audiences assumed to be inherent to the "old" TV. It is no coincidence that the most validated programming and technologies of the convergence era are associated with a more privileged viewership. The legitimization of television articulates the medium

with the masculine over the feminine, the elite over the mass, reinforcing cultural hierarchies that have long perpetuated inequalities of gender and class. Legitimizing Television urges readers to move beyond the question of taste—whether TV is "good" or "bad"—and to focus instead on the cultural, political, and economic issues at stake in television's transformation in the digital age.

Every day, millions of employees watch their leaders sabotage themselves. They watch, they learn, and then they do it, too. Next thing you know, everyone's lost motivation, and nobody takes ownership. That's how organizations fail. This book will help you break the vicious cycle of self-handicapping leadership in your organization, stop the excuses, and unleash all the performance your team is capable of delivering. Phil and Jordan reveal how and why people handicap themselves even when they know better. Next, they offer real solutions from their own pioneering research and consulting. You'll find practical ways to strengthen accountability and self-awareness, recognize the "big picture," improve decision-making, deepen trust and engagement, develop talent, escape

micromanagement, and focus relentlessly on outcomes. Your colleagues can be far more effective, and so can you. In fact, it starts with you—right here, right now, with this book. Many leaders inadvertently create cultures of failure. They model and promote "selfhandicapping" actions, where people withdraw effort or create new problems, in order to maintain their own self-images of competence. Self-Handicapping Leadership shines the spotlight on this widespread and destructive phenomenon and presents real action plans for overcoming it.
