"This book is a message from autistic people to their parents, friends, teachers, coworkers and doctors showing what life is like on the spectrum. It's also my love letter to autistic people. For too long, we have been forced to navigate a world where all the road signs are written in another language." With a reporter's eye and an insider's perspective, Eric Garcia shows what it's like to be autistic across America. Garcia began writing about autism because he was frustrated by the media's coverage of it; the myths that the disorder is caused by vaccines, the narrow portrayals of autistic people as white men

working in Silicon Valley. His own life as an autistic person didn't look anything like that. He is Latino, a graduate of the University of North Carolina, and works as a journalist covering politics in Washington D.C. Garcia realized he needed to put into writing what so many autistic people have been saying for years; autism is a part of their identity, they don't need to be fixed. In *We're Not Broken*, Garcia uses his own life as a springboard to discuss the social and policy gaps that exist in supporting those on the spectrum. From education to healthcare, he explores how autistic people wrestle with systems that were not built with them in mind. At the same time, he shares the experiences of all types of autistic people, from those with higher support needs, to autistic people of color, to those in the LGBTQ community. In doing so, Garcia gives his community a platform

to articulate their own needs, rather than having others speak for them, which has been the standard for far too long.

*Measurement and Statistics for Teachers* deftly combines descriptive statistics and measurement in the classroom into a student-friendly, practical volume. Based on a course taught by the author for the past 25 years, this book offers to undergraduate education students a clear account of the basic issues in measurement and details best practices for administering performance assessments, interpreting test scores, and evaluating student writing. This second edition includes updated pedagogical features, timely discussions of student assessment, state standards (including NCLB), and an expanded focus that

incorporates the needs of Early Childhood, Elementary, and Secondary teachers.

\* One of Inc.com's "6 Books You Need to Read in 2020 (According to Bill Gates, Satya Nadella, and Adam Grant)"\* Adam Grant's # 1 pick of his top 20 books of 2020\* One of 6 Groundbreaking Books of Spring 2020 (according to Malcolm Gladwell, Susan Cain, Dan Pink, and Adam Grant). A former rocket scientist reveals the habits, ideas, and strategies that will empower you to turn the seemingly impossible into the possible. Rocket science is often celebrated as the ultimate triumph of technology. But it's not. Rather, it's the apex of a certain thought process - a way to imagine the unimaginable and solve the unsolvable. It's the same thought process that enabled Neil Armstrong to take his giant leap for mankind, that allows spacecraft to travel millions of miles through outer space and land on a precise spot, and that brings us closer to colonizing other planets. Fortunately, you don't have to be a rocket scientist to think like one. In this accessible and practical book, Ozan Varol reveals nine simple strategies from rocket science that you can use to make your own giant leaps in work and life -- whether it's landing your dream job, accelerating your business, learning a new skill, or creating the next breakthrough product. Today, thinking like a rocket scientist is a necessity. We all encounter complex and unfamiliar problems in our lives. Those who can tackle these problems -- without clear guidelines and with the clock ticking -- enjoy an extraordinary advantage. Think Like a Rocket Scientist will inspire you to take your own moonshot and enable you to achieve liftoff.

Authored by three of the nation's leading experts on the first-year experience, this Concise Edition of Your College Experience continues a 20-year tradition of straightforward, realistic, and intelligent coverage of the skills students need to succeed in college. Each edition is revised based on information uncovered during exhaustive research, surveys on the First Year Experience, and course outcome measurements. Gardner, Jewler, and Barefoot outline the strategies students need to sharpen their skills in note taking, reading, memorizing, writing, and test-taking; enhance social relationships; get to know themselves better by exploring their values; learn vital information about staying healthy; connect to information on career planning; and more!

An Introduction to Epidemiology Routledge  
A historical survey of the western humanities in a single-volume text.

*Adventures in the Human Spirit* provides a balanced introduction to the major arts, philosophy, and religion. Appropriate for students with little background in the arts and humanities, this single-volume text approaches the humanities by focusing on principal events, styles, movements, and figures. The seventh edition engages students with new chapter-opening spreads, a refreshed color palette, and a clear pedagogical structure. New author Margaret Manos maintains the late Philip E. Bishop's approachability to understanding western humanities, bringing the past to life. The new edition continues to contain Bishop's coverage of music, religion, literature, philosophy, and science. MyArtsLab is an integral part of the Bishop program. Key learning applications include Closer Look tours, Art 21 and Studio Technique videos, and 360-degree architectural panoramas and simulations. A better teaching and learning experience This program will provide a better teaching and learning experience - for you and your students. Here's how: Personalize Learning - MyArtsLab is an online homework, tutorial, and assessment program. It helps students prepare for class and instructor gauge individual and class performance. Improve Critical Thinking - Key Topics at the beginning of each chapter and critical thinking activities throughout help readers build critical thinking and study skills. Engage Students — Global Perspectives and Key Concept boxes provide a wonderful engaging student experience. An electrifying biography of one of the most extraordinary scientists of the twentieth century and the world he made. The smartphones in our pockets and computers like brains. The vagaries of game theory and evolutionary biology. Nuclear weapons and self-replicating spacecrafts. All bear the fingerprints of one remarkable, yet largely overlooked, man: John von Neumann. Born in Budapest at the turn of the century, von Neumann is one of the most influential scientists to have ever lived. A child prodigy, he mastered calculus by the age of eight, and

in high school made lasting contributions to mathematics. In Germany, where he helped lay the foundations of quantum mechanics, and later at Princeton, von Neumann's colleagues believed he had the fastest brain on the planet—bar none. He was instrumental in the Manhattan Project and the design of the atom bomb; he helped formulate the bedrock of Cold War geopolitics and modern economic theory; he created the first ever programmable digital computer; he prophesized the potential of nanotechnology; and, from his deathbed, he expounded on the limits of brains and computers—and how they might be overcome. Taking us on an astonishing journey, Ananyo Bhattacharya explores how a combination of genius and unique historical circumstance allowed a single man to sweep through a stunningly diverse array of fields, sparking revolutions wherever he went. *The Man from the Future* is an insightful and thrilling intellectual biography of the visionary thinker who shaped our century.

The definitive social history of tuberculosis, from its origins as a haunting mystery to its modern reemergence that now threatens populations around the world. It killed novelist George Orwell, Eleanor Roosevelt, and millions of others - rich and poor. Desmond Tutu, Amitabh Bachchan, and Nelson Mandela survived it, just. For centuries, tuberculosis has ravaged cities and plagued the human body. In *Phantom Plague*, Vidya Krishnan, traces the history of tuberculosis from the slums of 19th-century New York to modern Mumbai. In a narrative spanning a century, Krishnan shows how superstition and folk-remedies, made way for scientific understanding of TB, such that it was controlled and cured in the West. The cure was never available to black and brown nations. And the tuberculosis bacillus showed a remarkable ability to adapt - so that at the very moment it could have been extinguished as a threat to humanity, it found a way back, aided by authoritarian government, toxic kindness of philanthropists, science denialism and medical apartheid. Krishnan's original reporting paints a granular portrait of the post-antibiotic era as a new, aggressive, drug resistant strain of TB takes over. *Phantom Plague* is an urgent, riveting and fascinating narrative that deftly exposes the weakest links in our battle against this ancient foe.
