Excerpt from The Fundamentals of Accounting What the Accountant Edits. Just as the editor must get into the hands Of the public at frequent intervals information with regard to the news Of the world or with regard to some special field Of activity or learning, SO the accountant must get into the hands of the business man at reasonably frequent intervals such informa tion as has: been 'enumerated. Usually there are several persons in the employ Of a business whose task 15 in part to prepare informa tion for the general manager, but usually such information 15 either not in the particular shape most useful for the manager or is not SO correlated with other information as to bring out the larger facts that the manager needs to know. It is the task Of the accountant to put the information in the desired Shape and to correlate various kinds Of information, or, as we commonly say, edit the informa tion. Because the accountant must prepare information for the general manager or other Officer, he usually occupies a more or less confidential position, and

Often is a vice-president of a corporation. He must have the knack Of preparing information in shape for use by others, he must have sufficient imagination to see what sort Of information the various officials will desire, and he must have sufficient power Of analysis to see how to get the sort Of information that will enable the operating Officers Of the business to tie up the various parts Of the business with each other and with the outside business world and he should provide them with such information even if they have not realized the need Of such par ticular information. It is his task, in a sense, to foresee what information about the business will be later required and to see that such information will be available at the proper time. He must anticipate the need for information, SO that he may have his lines laid before the occurrence Of the event, for the procurement Of that information as soon as the event happens. This is just the task Of the editor Of a newspaper or a magazine, for he not only tells people what they already wish to know, but he gives them what they are glad to know, though they had not previously known that they needed to know it. Adapted from the successful US edition, Fundamentals of Intermediate Accounting by Kieso, Weygandt & Warfield, this text provides students with a thorough examination and explanation of concepts in financial accounting such as the conceptual framework, presentation of financial statements (and the major reporting issues related to assets), liabilities, equity, revenues and expenses. In response to the internationalisation of accounting standards, the diversity of students' backgrounds and the professional opportunities a study of commerce presents, this text offers a unique comparative analysis of the financial reporting requirements under the jurisdictions of IASB, FASB and AASB. The text provides students with an understanding of financial accounting reporting requirements globally that equips them with an international perspective on financial reporting procedures and issues. Accounting is the language of business and a qualification in accounting is seen as an international 'professional passport' for graduates. This text is ideal for commerce programs whose objective is to deliver an international context to the study of accounting. As the majority of financial accounting reporting principles covered in the text are discussed within the conceptual frameworks of Australia, the United States and International Accounting Standards, students will learn how to account for and appreciate accounting events on a global level. The text is ideal for the second course in financial accounting under the undergraduate program, Master of Professional Accounting, or subjects on international financial reporting.

This text discusses and presents accounting principles and concepts in lay man's terms using simple day-to-day terminologies. Definitions are always amplified by examples familiar to students. The steps in the accounting process are discussed using the same illustration problems from chapter to chapter so that the student can connect the relationship of the steps in the accounting process. Being a basic accounting textbook, the book will provide students with a solid and strong basic accounting knowledge to better equip them to tackle more advanced accounting courses. Accounting, as a field of study is profressive; accounting knowledge is learned in stages; what is learned in basic accounting is used and applied in more advanced accounting courses. Consequently, if a student has a weak basic accounting foundation, he will have difficulty succeeding in more advanced accounting courses.

A revision of Financial Accounting and Reporting, this text is suitable for an introductory financial accounting course at either the undergraduate or MBA level. The book assumes no prior financial accounting exposure on the part of the student. The book does assume that the instructor is interested in positioning financial accounting as an important element in managing a business

enterprise and in communicating that enterprise's performance to interested constituencies. The text adopts a business-context, user-orientation outlook as a central emphasis and places moderate emphasis on the procedural aspects of financial accounting. At either the undergraduate or the MBA level, instructors have the flexibility to pitch their use of the text with some slight alterations to the basic emphases. They can do this through their selection of end of chapter assignments. These assignments provide an array of choices, from the purely conceptual to the purely procedural, and in between. Moreover, instructors can go into more of the technical details of a topic if they choose by incorporating the chapter appendices. An instructor's manual is available simply contact [shirley\\_grall@mcgraw-hill.com](mailto:shirley_grall@mcgraw-hill.com) for a copy.

Fundamentals of Cost Accounting provides a direct, realistic, and efficient way to learn cost accounting, integrated with new technology learning tools. Fundamentals is short (approximately

700 pages) making it easy to cover in one semester. The authors have kept the text concise by focusing on the key concepts students need to master. The Decision opening vignettes and Business Application boxes show realistic applications of these concepts throughout. All chapters conclude with a Debrief that links the topics in the chapter to the decision problem faced by the manager in the opening vignette. Comprehensive end-of-chapter material provides students with all the practice they need to fully learn each concept. McGraw-Hill Connect Accounting a digital teaching and learning platform for homework completion and review that helps improve student performance over a variety of critical outcomes while aiding instructor grading and assessment efficiency. Housed within Connect, SmartBook is an adaptive study tool that helps identify specific topics and learning objectives individual students need to study. As students read, SmartBook assesses comprehension and dynamically highlights where they need to focus more. The result is that students are more engaged with course content, can better prioritize their time, and come to class ready to participate. End-of-Chapter Material helps you apply the concepts in accounting and, in more comprehensive material, analyze the information to form business decisions. Assignable material includes exercises, problems and test bank material. Based on your instructor settings, you can receive instant feedback on your work either while working on an assignment or after the assignment is submitted for a grade.
