 The testing and assessment of language competence continues to be a much debated issue in foreign language teaching and research. This book is the first one to address the testing of four important dimensions of foreign language education which have been left largely unconsidered: learner autonomy, intercultural competence, literature and literary competence, and the integration of content and language learning. Each area is considered through a theoretical framework, followed by two empirical studies, raising questions of importance to all language teachers: How can one test literary competence? Can intercultural competence be measured? What about the integrated assessment of content-and-language in CLIL and teaching? Is progress in autonomous learning skill gaugeable? The book constitutes essential reading for anyone interested in the testing and assessment of seemingly largely untestable aspects of foreign

language competence. "The title of this book is well chosen. Despite the apparent oxymoron, this collection of papers succeeds in addressing important issues of educational policy and theory with the precision born of empirical work combined with discussion of principles. This book will open new options for testers, for teachers and for those who make policy decisions." Michael Byram, School of Education, University of Durham, UK

A formal evaluation of students writing abilities is important for language teachers in order to assess the pedagogical needs of their students. While there has been a considerable body of work undertaken on assessing the writing abilities of native speakers, the issues surrounding the assessment of second language learners writing abilities are still emerging. At present, no one volume has explored these issues and their implications for language teaching practitioners wishing to evaluate their students writing. This book outlines in an accessible manner the major tenets of research in the field and provide language teachers with guidelines to design and develop suitable writing assessment tasks for their students.

This is the vocabulary list for New HSK 9! Is there any HSK 9? Yes, the initial Classification from 1992 to 2009. There are total 8000 vocabularies. New HSK (after 2009) which cut the vocabulary to 5000, just want to set a lower passing bar for students who take Chinese as second language or foreign language. There are around 100,000 vocabularies in comprehensive Chinese dictionary. The new HSK 5000 vocabularies only account for 5%, which is far from enough for students to continue their college in China taught in Chinese. For advance level oversea Chinese examinations like IB Chinese_A_Language_and_literature_HL, IB Chinese_A_Literature_HL, IB Chinese_B_HL, SAT Chinese, AP Chinese, Edexcel A LEVEL Chinese 9CN0-01,02,03 (OLD 6CN0), Edexcel AS Chinese 8CN0-01,02,03 (OLD 6CN0), CIE IGCSE First Language (0509), CIE IGCSE Second Language (0523), the vocabulary involved are far more than HSK 5000 vocabularies. Due to this, we continue to update our HSK 9 Vocabularies with the possible Best English Translation for your better understanding with our many years' experience in HSK and GCSE teaching since 2009! By referring oversea Chinese examinations and China Education Ministry official vocabulary list up to high school, similar to K12 in USA, we choose the highest level words (3569) as an addition to our HSK 6 Vocabularies. This publication highlights the need for test developers to provide clear explanations of the ability

constructs which underpin tests offered in the public domain. An explanation is increasingly required or if the validity of test score interpretation and use are to be supported both logically and with empirical evidence. The book demonstrates the application of a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components which reflect the practical nature and quality of an actual testing event. It examines Cambridge ESOL writing tasks from the following perspectives: Test Taker, Cognitive Validity, Context Validity, Scoring Validity, Criterion-related Validity and Consequential Validity. The authors show how an understanding and analysis of the framework and its components in relation to specific writing tests can assist test developers to operationalise their tests more effectively, especially in relation to criterial distinctions across test levels.
