 Tulsian's Quick Revision for Financial Accounting is a self-study handbook. Loaded with practical questions, this book is a perfect revision text - comprises structured questions based on pattern and scheme adopted in examinations.  
 DSSSB PGT Commerce Question Paper with Answer - 2018 Lambers CPA Review  
 Underlying this book, first published in 1988, is the belief that it is insightful to examine accounting not as merely a technical process, nor as a technical process with social and political consequences, but as an activity which is both social and political in itself. One way of illuminating the social nature of accounting is through studying its cultural variations, for although accounting is a feature of modern industrial society the extent of its use

varies across cultures. This book examines the history of accounting and explores the complicated relationship between accounting and society.

**The Management Accountant** S. Chand Publishing

This anthology provides readers with a flavour of the development of cost accounting and emerging management accounting literature from 'The

Costing Renaissance' to 1952. Many of the issues which were prominent in the middle of the twentieth century are still pressing issues today and received important early treatments. However, a more balanced longitudinal coverage of the relevant material enables readers to trace the development of new attitudes to problems which had been recognized early on and to become aware of the fact that different issues tended to dominate the literature as time went by. The selection bias has favoured material which was covered for the first time or in a new way.
