"Intense and elegiac...devastatingly agile." —New York Times Book Review The year is 1968. The world is changing, and sixteen-year-old Jon Mosher is determined to change with it. Racked by guilt over his older brother's childhood death and stuck in the dead-end town of Brewster, New York, he turns his rage into victories running track. Meanwhile, Ray Cappicciano, a rebel as gifted with his fists as Jon is with his feet, is trying to take care of his baby brother while staying out of the way of his abusive, ex-cop father. When Jon and Ray form a tight friendship, they find in each other everything they lack at home, but it's not until Ray falls in love with beautiful, headstrong Karen Dorsey that the three friends begin to dream of breaking away from

Brewster for good. Freedom, however, has its price. As forces beyond their control begin to bear down on them, Jon sets off on the race of his life—a race to redeem his past and save them all. Mark Slouka's work has been called "relentlessly observant, miraculously expressive" (New York Times Book Review). Reverberating with compassion, heartache, and grace, Brewster is an unforgettable coming-of-age story from one of our most compelling novelists. This book presents state-of-the-art information on both the scientific and clinical aspects of the Millon Clinical Multiaxial Inventory, a test that uniquely assesses both personality pathology and psychopathology. The book presents original contributions from major researchers/clinicians who have published seminal papers on the MCMI and who are recognized authorities in their specific areas. Clinical examples of the MCMI with a variety of clinical populations are provided, and many chapters summarize the research in that area as well as present clinical illustrations of the MCMI with actual cases. The book provides the reader with the most accurate information on the MCMI -- a test that has made exciting advances in the assessment of personality and psychopathology. The scientific and clinical status of this instrument is presented with a variety of clinical populations, including major psychiatric disorders, depression, substance abuse, anxiety disorders, eating and stress disorders, etc. Recent applications and advances in special areas, such as the instrument's use with medical populations and non-clinical populations, are also presented.

Trees outside forests (including fruit trees, trees in parks, fields, those growing in the wild and as amenities), together with forests and other woodlands, contribute to the structure of the landscape, generate numerous environmental and social services, and yield important food, drink and fuel products as well as meeting other domestic needs of urban and rural populations. However, trees outside forests are not well documented and receive little attention in the formulation of national forestry policy and planning. This publication seeks to fill this gap, by

providing information on the role of these resources and options for their integration in territorial management policies.

This book is an introduction to the language and standard proof methods of mathematics. It is a bridge from the computational courses (such as calculus or differential equations) that students typically encounter in their first year of college to a more abstract outlook. It lays a foundation for more theoretical courses such as topology, analysis and abstract algebra. Although it may be more meaningful to the student who has had some calculus, there is really no prerequisite other than a measure of mathematical maturity.

The Fast Track to New Skills Houghton Mifflin School

Silas Marner is the third novel by George Eliot, published in 1861. An outwardly simple tale of a linen weaver, it is notable for its strong realism and its sophisticated treatment of a variety of issues ranging from Religion to industrialisation to community.
