In this book, Louise Revell examines questions of Roman imperialism and Roman ethnic identity and explores Roman imperialism as a lived experience based around the paradox of similarity and difference. Her case studies of public architecture in several urban settings provides an understanding of the ways in which urbanism, the emperor and religion were part of the daily encounters of the peoples in these communities. Revell applies the ideas of agency and practice in

her examination of the structures that held the empire together and how they were implicated within repeated daily activities. Rather than offering a homogenized "ideal type" description of Roman cultural identity, she uses these structures as a way to understand how these encounters differed between communities and within communities, thus producing a more nuanced interpretation of what it was to be Roman. Bringing an innovative approach to the problem of Romanization, Revell breaks from traditional models and cuts across a number of entrenched debates such as arguments about the imposition of Roman culture or resistance to Roman rule.

Qualitative researchers have long made use of many different interview forms. Yet, for novice researchers, making the connections between "theory" and "method" is not always easy. This book provides a theoretically-informed guide for researchers learning how to interview in the social sciences. In order to undertake quality research using qualitative interviews, a researcher must be able to theorize the application of interviews to investigate research problems in social science research. As part of this process, researchers examine their subject positions in relation to participants, and examine their interview interactions systematically to inform research design. This book provides a practical approach to interviewing, helping researchers to learn about themselves as interviewers in ways that will inform the design, conduct, analysis and representation of interview data. The author takes the reader through the practicalities of designing and conducting an interview study, and relates various forms of interview to different underlying epistemological assumptions about how knowledge is produced. The book concludes with practical advice and perspectives from experienced researchers who use interviews as a method of data generation. This book is written for a multidisciplinary audience of students of qualitative research methods.

Set amid Indian reservations, uranium mills, and other locations across the American Southwest, these twelve stories by the author of *Yellowcake*—chosen as one of the best books of the year by Kirkus Reviews—create a kaleidoscopic view of family, myth, love, landscape, and loss in a place where infinite skies and endless roads suggest a world of possibility, yet dreams are deceiving, like an oasis, just beyond reach.

The so-called 'Antioch Incident' - the confrontation between the apostles Peter and Paul in Galatians 2.11-21 - continues to be a source of controversy in both scholarly and popular estimations of the emergence of the early Church and the development of Pauline theology. Paul and the Crucified Christ in Antioch offers an interesting interpretation of Paul's account of and response to this event, creatively combining historical reconstruction, detailed exegesis, and theological reflection. S. A. Cummins argues that the nature and significance of the central issue at stake in Antioch - whether the Torah or Jesus Christ determines who are the people of God - gains great clarity and force when viewed in relation to a Maccabean martyr model of Judaism as now christologically reconfigured and redeployed in the life and ministry of the apostle Paul.
