When purchasing your vehicle, you should probably expect to be lied to by everyone from the sales department to the financial department. Apples, Oranges, and Lemons is a one-of-a-kind, tell-all book about the automobile trade that reveals inside secrets they don't want you to know. There is no other book like it. It is written by the only person who could, or would. Phillip James Grismer knows the automobile industry from the inside out. He first apprenticed in a number of import auto shops, eventually rising through the ranks and opening his own facility. Grismer draws on his thirty-seven years of experience to expose how the industry really works. He provides answers on how to deal with a "lemon" while offering advice on how to make the best buy before purchasing your vehicle. Discover how the valuation and appraisal process works and how

the history of your vehicle affects you and your money. Grismer's conversational style makes the information accessible while offering personal insight on the process of vehicle manufacturing and servicing. Even the most casual reader will be enlightened and entertained by the inner workings of the automobile manufacturing, sales, and service industry. But most importantly, this handy reference guide empowers the consumer to make well-informed decisions about vehicles.

Commercial Code Service: Forms and procedures

under U. C. C. Dundurn

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles

unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr.

Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

iUniverse Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters.

This essential guide offers

all the tools necessary to negotiate for the best price, including reliability ratings, profiles, and crash-test results for more than 210 new car models. The Hindu Index Dundurn Buying a car can be a smart idea - a car loses the lion's share of its value when it is driven off the new car lot, so why let someone else take that loss? But buyer beware: A used car is likely to need more repairs and may come with a short warranty or none at all. In addition, used cars may lack the latest safety features. That is why it is so important for consumers to do extensive research so they can avoid all of the potential pitfalls of buying a used car. The auto experts at "Consumer Reports" have done the work for you and have compiled their extensive research and report their findings into the 2007 edition of USED CAR BUYING GUIDE. This fabulous tool will help steer any consumer who is in the market for a used car towards the better-performing and more reliable used car models and away from those models with a troubled past or substandard performance. Before consumers set foot on a

used car lot, they should read all the valuable information provided in this book so they can be armed with as much information as possible and the knowledge to make an educated choice. "Consumer Reports" knows cars and offers the most detailed and revealing used car reliability information available anywhere including: - Unbiased reviews of every major model from 1999 - 2006- Lists of the best and worst used vehicles and how to avoid a lemon - A checklist of what to look for when inspecting a used car- Best used cars for gas mileage- Tips on negotiating the best price Reliability, recalls and crash test information- Making sense of safety information -How to get the most money when trading in your current car The majority of this book is devoted to the profiles of 264 cars, minivans, SUVs and trucks, presenting all major 1999-2006 models. Each profile contains a photo from the representative year, a write-up of the vehicle, reliability history, crash-test data, and the model years when key safety gear was added and when a major redesign was

made.

Although no one disputes that employment relations worldwide have been greatly affected by globalisation, no clear consensus has emerged on the nature and significance of this impact. The seven contributions to this symposium pursue a comparative approach, suggesting that direct analysis of employment relations in distinct industries in two comparably-sized economies since the advent of globalisation leads to a more precise understanding of the interaction of globalisation and employment relations, and sets a pattern for other studies to follow. The economies studied in the symposium are Australia and Korea, and the industries are automobile (and auto parts) manufacturing and retail banking. In both countries, labour unions play a key role in the way in which employers and governments react to political and economic pressures. Among the particular topics discussed by the contributors are

the following: effects of the 1997 financial crisis in Korea; the extent to which the automobile industry in one country (Korea) depends on parts and raw material from another country (Australia); cross-border cooperation between unions; the growing trend toward enterprise bargaining; conciliation and arbitration of industrial disputes; and the role of government-sponsored industrial relations commissions. The contributing authors are all industrial relations authorities in Australia or Korea. The in-depth analysis they offer in these very specific areas will be of value to labour lawyers and industrial relations scholars everywhere for the light it sheds on this crucial aspect of contemporary

social and economic development.

Franklin, Jack, Marla, Thadius, and Caitlin... this unlikely group of assorted misfits are the Cemeterians, a group that will take on any job - no, really, we mean any bloody job (money's a bit tight right now)! Trudge through disgusting sewers to battle manatee-

massacring mermaids and soggy cultists, creep through creepy, fog-littered cemeteries straight out of an ancient Hammer Film soundstage, confront undead lecherous lodgers and other assorted beasties, creepies, and ghoulies. It all comes down to whether an adolescent giant Automaton, a truly mad, Mad Scientist, a surly Necromancer, a Banshee's granddaughter, and a reluctant furry monster straight from under your little sister's bed can manage not to kill each other - or, at least, quit fighting over the tele-privilege-schedule long enough to get the job done! Not likely.
