Die vorliegende
Publikation vereint auf

empirischer Basis
theoretische und
praktische
Perspektiven auf das
Marketingübersetzen
für die
Automobilbranche im
Sprachenpaar Deutsch-
Polnisch. Die differente

gesellschaftlich-kulturelle Entwicklung sowie Diskrepanzen im Automobilbau in beiden Ländern stellen den interlingualinterkulturellen Transfer deutscher Marketingtexte ins Polnische vor besondere Herausforderungen. Die Analyse der Übersetzungsprobleme erfolgt am Beispiel der Marketingtextsorte Kundenzeitschrift in Anlehnung an den funktionalen Ansatz der Translationswissenschaft. In die wissenschaftliche Beschreibung integriert die Autorin das berufspraktische Konzept der Transkreation, das in die modellhafte Darstellung dieses translatorischen Bereichs einfließt. This

publication combines, on an empirical basis, the theoretical and practical perspectives on marketing translation for the automotive industry in the language pair German-Polish. The different sociocultural development as well as discrepancies in the automotive industry in both countries pose special challenges for the interlingual-intercultural transfer of German marketing texts into Polish. The analysis of the translation problems is carried out using the example of the marketing text type customer magazine, following the functional approach of translation studies. In the scientific description, the author integrates the professional-practical concept of

transcreation, which flows into the model representation of the interlingual-intercultural transfer of marketing texts.

Automotive FDI in Emerging Europe
 Oxford University Press, USA
 The automobile is an icon of modern technology because it includes most aspects of modern engineering, and it offers an exciting approach to

engineering education. Of course there are many existing books on introductory fluid/aero dynamics but the majority of these are too long, focussed on aerospace and don't adequately cover the basics. Therefore, there is room and a need for a concise, introductory textbook in this area.

Automotive Aerodynamics fulfils this need and is an introductory textbook intended as a first course in the complex field of aero/fluid mechanics for engineering students. It introduces basic concepts and fluid properties, and covers fluid dynamic equations. Examples of automotive aerodynamics are included and the principles of

computational fluid dynamics are introduced. This text also includes topics such as aeroacoustics and heat transfer which are important to engineering students and are closely related to the main topic of aero/fluid mechanics. This textbook contains complex mathematics, which not only serve as the foundation for future studies but also provide a road map for the present text. As the chapters evolve, focus is placed on more applicable examples, which can be solved in class using elementary algebra. The approach taken is designed to make the mathematics more approachable and easier to understand. Key features: Concise textbook which provides an

introduction to fluid mechanics and aerodynamics, with automotive applications Written by a leading author in the field who has experience working with motor sports teams in industry Explains basic concepts and equations before progressing to cover more advanced topics Covers internal and external flows for automotive applications Covers emerging areas of aeroacoustics and heat transfer Automotive Aerodynamics is a must-have textbook for undergraduate and graduate students in automotive and mechanical engineering, and is also a concise reference for engineers in industry.

СССР – большое и сильное государство, разместившееся на 1/6 части суши – был настоящей фабрикой достижений. В любой отрасли, будь то наука, оборона, культура или спорт, в Советском Союзе было кем и чем гордиться! Главным достижением советского времени 1920-х годов стала электрификация всей страны, ликвидация безграмотности, преодоление последствий революции и Гражданской войны. Образование и медицинское обслуживание стали бесплатными для всех советских граждан. 1930-е годы стали началом

How could one company—General Motors—meet disaster on one continent and achieve explosive growth on another at the very same time? While General Motors was hurtling towards bankruptcy in 2009, GM's subsidiary in China was setting new sales and profit records. This book reveals how extraordinary people, remarkable decisions and surprising breaks made triumph in China possible for General Motors. It also shows just how vulnerable that winning track record remains. No small part of GM's

success in China springs from its management of shifting business and political relationships. In China, the government makes the rules for—and competes in—the auto industry. GM's business partner, the City of Shanghai, is both an ally and a competitor. How does such an unnatural relationship work on a day-to-day basis? Where will it go on the future? General Motors also engages in constant battles with other global and Chinese car makers for the hearts of demanding Chinese consumers. Dunne gives us rare glimpses into the mindsets and behavior of this new moneyed set, the world's newest class of wealthy consumers. China is already the

number one car market in the world. During the next ten years, China will export millions of cars and trucks globally, including to the United States. American Wheels, Chinese Roads presents readers with fascinating illustrations of what to expect when Chinese cars, companies, and business people arrive on our shores.

This volume chronicles the maturation of the South Korean auto industry and its native automakers, from the 1997 Asian Crisis to 2019. After examining the context for domestic vehicle production in South Korea, the author presents multiple case studies for all five

Korean automakers: General Motors Korea/Daewoo Motors, Kia, Hyundai, Ssangyong and Renault Samsung. This includes coverage of Hyundai-Kia's foreign plants in North America, Europe, India, China, and Emerging Asia. The book closes by assessing the five-to-ten-year future outlooks for Korean automakers at home and abroad. This important work will prove informative to scholars of business, management, automotive history, international development, Asian studies, and public administration.
