Student-led in its design and development, the book incorporates digital marketing as central to what marketers do, and combines quality examples, assessment

and online resources to support the teaching and learning of introductory marketing in a digital age. number of features and activities in every chapter, encouraging students to undertake course reading, class participation and revision. It includes case studies from global companies such as Nutella, Google, L’Oreal, Netflix, Airbnb, BirchBox, Uber, FitBit, Visit California and Coca-Cola. It also takes a social view of marketing, featuring cases tied to the UN’s PRME initiative to aid students in becoming sustainably-minded individuals. The book is complemented by online

instructor resources, including chapter-specific PowerPoint slides, an instructor manual, flipped classroom activities, as well as open access multiple choice questions (with solutions), videos, case studies, weblinks, a glossary and SAGE journal articles for students. The Principles of Islamic Marketing fills a gap in international business literature covering the aspects and values of Islamic business thought. It provides a framework and practical perspectives for understanding and implementing the Islamic marketing code of conduct. It is not a religious book. The Islamic Economic System is a business model adopted by nearly one quarter of the world's population. Baker Alserhan identifies the features of the Islamic structure of International Marketing practices and ethics. Adherence to such ethical practices elevates the standards of behaviour of traders and consumers alike and creates a value-loaded framework for meaningful cooperation between international marketers and their Muslim markets. His book provides a complete guide for an organization when managing its entire marketing function or when customising

part of its offering to suit Muslim customers. It addresses the challenges facing marketers involved in business activities with and within Islamic communities, the knowledge needs of academic institutions, and the interest of multinationals keen on tapping the huge Islamic markets. Along the way, Baker Alserhan provides insights into key elements such as, distribution channels, retailing practices, branding, positioning, and pricing; all within the Muslim legal and cultural norms. This second edition brings the book up to date and features a number of new case studies and two additional chapters on Maqasid Al Shariah and the Islamic economy, and a strategic perspective on Islamic marketing and branding.

Financial Services Marketing Ingram  
Marketing reversed prior business logic 50 years ago and said «the customer is king», and the companies began to recognize that it was not just the product that was the most important aspect of their business. Companies recognized that consumers had a myriad of choices of product offerings and marketing was responsible to ensure that the company's products had the benefits and attributes that customers wanted and were willing to pay for. Today, considering the technology

development, which influences every function of the company, the focus of the successful marketing oriented companies has changed from «the customer is king» to «the customer is a dictator!!!». However, and despite the new trends in marketing, like any social science, marketing has basic principles, and these principles need to be considered when making any type of marketing decisions. So, the major step of a student of marketing, whether it is a young university student or an experienced business executive, is to understand the principles of marketing, and reading the present book will be the first step in accomplishing this task. This book describes these basic principles of marketing, and while the authors recognize that each decision may be slightly different from any previous decision, the rules or principles remain the same. The present book presents these basic marketing principles and tries to capture the essence of practical and modern marketing today. Therefore, the purpose of Principles of Marketing is to introduce readers to the fascinating world of marketing today, in an easy, enjoyable and practical way, offering an attractive

text from which to learn about and teach marketing.
