Based on the experience of many countries in the WHO European Region and the advice of experts, this guide outlines some of the steps prison systems should take to reduce the public health risks from compulsory detention in often unhealthy situations, to care for prisoners in need and to promote the health of prisoners and prison staff. This requires that everyone working in prisons understand how imprisonment affects health, what prisoners' health needs are, and how evidence-based health services can be provided for everyone needing treatment, care and prevention in prison. Other essential elements are being aware of and accepting internationally recommended standards for prison health; providing professional care with the same adherence to professional ethics as in other health services; and, while seeing individual needs as the central feature of the care provided, promoting a whole-prison approach to care and promoting the health and well-being of people in custody.

This report makes recommendations for reform of the law and presents two draft Bills to implement the necessary changes. Firstly, The draft Inheritance and Trustees' Powers Bill includes reforms that would: ensure that where a couple are married or in a civil partnership, assets pass on intestacy to the surviving spouse in all cases where there are no children or other descendants; simplify the sharing of assets on intestacy where the deceased was survived by a spouse and children or other descendants; protect children who suffer the death of a parent from the risk of losing an inheritance from that parent in the event that they are adopted after the death; amend the legal

rules which currently disadvantage unmarried fathers when a child dies intestate; remove arbitrary obstacles to family provision claims by dependants of the deceased and anyone treated by the deceased as a child of his or her family outside the context of a marriage or civil partnership; permit a claim for family provision in certain circumstances where the deceased died "domiciled" outside of England and Wales but left property and family members or dependants here; and reform trustees' statutory powers to use income and capital for the benefit of trust beneficiaries (subject to any express provisions in the trust instrument). Secondly, The draft Inheritance (Cohabitants) Bill contains further provisions that would give certain unmarried partners who have lived together for five years the right to inherit on each other's death under the intestacy rules. Where the couple have a child together, this entitlement would accrue after two years' cohabitation, provided the child was living with the couple when the deceased died.

This volume updates earlier editions to continue offering efficient, yet comprehensive, coverage of the issues in a standard Trusts and Estates course. Although the book is designed primarily as a student supplement, some teachers have used it successfully as the primary text, supplemented by statutory materials, for both the basic course and for more specialized courses. The text's multi-layered structure allows students to use the book in different ways, depending upon their needs. Students using the book as a regular supplement to a casebook can read the text and ignore the footnotes until they need more examples or greater depth. The organization tracks the basic approach of most

casebooks, and where it differs from an individual book, the comprehensive table of contents makes it easy to find what students need. By discussing many of the cases found in popular casebooks, the text helps students understand how specific issues fit in a bigger picture. The footnotes carry the student-centered approach a step further by briefly discussing tangential issues, offering additional examples, and again citing cases often found in casebooks. Even if the text does not discuss "their" case, often it will cite the case and place it in context. Each case citation includes a brief fact description to provide more examples of the way general principles can apply in specific situations. Further, the footnotes include numerous cross-references to other sections of the book, to help students identify the interconnections holding the subject together.
