This book shows the capabilities of Microsoft Excel in teaching business statistics effectively. Similar to the previously published Excel 2010 for Business Statistics, this book is a step-by-step exercise-driven guide for students and practitioners who need to master Excel to solve practical business problems. If understanding statistics isn't your strongest suit, you are not especially mathematically-inclined, or if you are wary of computers, this is the right book for you. Excel, a widely available computer program for students and managers, is also an effective teaching and learning tool for quantitative analyses in business courses. Its powerful computational ability and graphical functions make learning statistics much easier than in years past. However, Excel 2016 for Business Statistics: A Guide to Solving Practical Problems is the first book to capitalize on these improvements by teaching students and managers how to apply Excel to statistical techniques necessary in their courses and work. Each chapter explains statistical formulas and directs the reader to use Excel commands to solve specific, easy-to-understand business problems. Practice problems are provided at the end of each chapter with their solutions in an appendix. Separately, there is a full Practice Test (with answers in an Appendix) that allows readers to test what they have learned.

"The Ultimate Rip-off is an exciting supplementary text for public finance, taxation, accounting, or tax research classes in a suspense thriller format. This instructional novel is ideal for an MBA program or law school, which has a light coverage of taxation or accounting. It can be used in IRS training programs for beginning agents or in a CPA firm's in-house training program."--Preface

Firmly anchored in social science concepts, the second edition of The American Legal System demonstrates the relationships among private law, the business legal environment, and public law issues, as well as related subjects of interest. This fifteen-chapter book is divided into three parts. Part I places the legal system in a political perspective centering on the origins of the law, schools of jurisprudence, branches and functions of law, legitimacy of law, how the judiciary functions in the federal system of government, and judicial interpretation and decision making. Part II contrasts legal processes: civil suits for money damages, criminal processes, equity justice, administrative processes, and alternative dispute resolution. Part III centers on the legal norms or rules governing both civil and criminal conduct, property law, family law, contract law, and government regulation of business. Throughout, the text features edited court opinions-many new to this edition-illustrating lively and thought-provoking controversies that are certain to spark student interest. Among the many compelling issues addressed are the legal and constitutional controversies surrounding the Bush Administration's "War on Terror," and the socially explosive developments concerning same-sex marriage. In addition, each chapter includes at least three comparative notes showing how other legal cultures in different nation-states treat legal matters. A wealth of pedagogical features-chapter-opening objectives; key terms, names, and concepts; a glossary, discussion questions, and appendices-are included to aid student comprehension. The authors have prepared an Instructor's Manual and Test Bank to facilitate the book's use in the classroom.

Smith and Roberson's Business Law Springer

The fundamental rules, court cases, concepts and trends of each key subject in American law are presented in a narrative tailored to the reader without an American legal background. Each chapter

covers a major area of law, summarizes the leading doctrines, analyzes recurring, current and developing trends, highlights areas of contemporary debate, offers streamlined versions of precedent-setting cases, raises questions for further discussion, and lists important vocabulary words. This book is ideal for readers who want to understand the contemporary American legal system at a more than superficial level, but who are not currently studying to become American lawyers. The style, organization and content make the book attractive for such readers as those planning on entering law school; paralegal assistants; students of American law outside of the United States; American undergraduates taking a course in American law and/or in a pre-law program; and graduate level students in subjects other than American law. The size, weight and price of the book are tailored to make the book attractive to students.

This true story of an epic courtroom showdown, where two of the nation's largest corporations were accused of causing the deaths of children from water contamination, was a #1 national bestseller and winner of the National Book Critics Circle Award. Described as "a page-turner filled with greed, duplicity, heartache, and bare-knuckle legal brinksmanship by The New York Times, A Civil Action is the searing, compelling tale of a legal system gone awry—one in which greed and power fight an unending struggle against justice. Yet it is also the story of how one man can ultimately make a difference. Representing the bereaved parents, the unlikely of heroes emerges: a young, flamboyant Porsche-driving lawyer who hopes to win millions of dollars and ends up nearly losing everything, including his sanity. With an unstoppable narrative power reminiscent of Truman Capote's In Cold Blood, A Civil Action is an unforgettable reading experience that will leave the reader both shocked and enlightened. A Civil Action was made into a movie starring John Travolta and Robert Duvall.

Engaging Communities in Museums is designed for museum professionals who are hungry for information about how to design experiences in partnership with their communities. Providing an overview of the many ways that museums around the world have begun to listen more attentively to their audience, the book highlights the importance of listening to community and discusses the idea of relationship-building as an entry point to relevancy. Drawing on interviews and discussions with museum professionals around the world, as well as tangible, real-world examples, Allison showcases the many ways that museums, both large and small, are actively working with their communities and also provides a roadmap that demonstrates how museum professionals can listen more effectively to their audiences as they craft new experiences. The book also explores the fascinating nexus of community engagement and exhibit and experience development, thus taking museum professionals on a journey of discovery around community responsiveness and attention to audience. Engaging Communities in Museums provides a thorough comparison of development models from disparate venues, making the book a must-read for museum professionals who are looking for purpose and common-sense techniques that can guide their work with the communities that they serve. Students in museum studies courses will also find the text useful as a primer on community engagement in museums.

This is the 17th UCC Edition (and the twenty-second overall edition) of a business law text that first appeared in 1935. Throughout its 80 years of existence, this book has been a leader and an innovator in the fields of business law and the legal environment of business. One reason for the book's success is its clear and comprehensive treatment of the standard topics that form the traditional business law curriculum. Another reason is its responsiveness to changes in these

traditional subjects and to new views about that curriculum. In 1976, this textbook was the first to inject regulatory materials into a business law textbook, defining the "legal environment" approach to business law. Over the years, this textbook has also pioneered by introducing materials on business ethics, corporate social responsibility, global legal issues, and e-commerce law. The 17th Edition continues to emphasize change by integrating these four areas into its pedagogy.

Pentecostal women ministers have been silenced in official conversations about their place in church leadership. What do women ministers believe about family life? Have they been influenced by liberal feminism? Do they really want to be equal ministry leaders with men? What Women Want answers these questions in a first ever empirical study that paints a portrait of what it's like to be a Pentecostal woman minister.
