The Collected Poems of Octavio Paz, 1957-1987 Eagle Or Sun?

Introduction -The phenomena that is falling in love is a journey. Like all journeys, as love finds us, we also find ourselves. We are awakened to our dreams, our fears, our insecurities. Our eyes are opened to another reality where we are no longer alone and our actions don't solely affect us. There are things we must give up: control, fear, our past to name a few, and we have infinite things to gain. Love is like getting on a rollercoaster for the first time. The apprehension almost strong enough to make you think twice, but you get over that fear. You wait in line, you learn patience and how to calm your irrational fears. Then you are strapped in and a new wave of fear washes over you. Then it begins, and it is much too late to turn back. In that moment you wonder what the hell you were thinking. It starts, you endure the ups and down, the twists and turns, the ugly feelings in your belly, and then it's over. You realize it wasn't so bad and that the experience made all that came with it worthwhile. This book is a collection of prose and poetry focused on the unique experience of falling in love. Though we will all experience love differently, I hope these words touch, heal, and encourages its readers to be fearless in the face of love.

What one cannot compute, one must poetize: this essay theorizes the extraordinary regimes of human mental experience by putting the emphasis on poetry. Poetry grants us the ability to move "beyond the limits of thought" and to explore the beyond of cognition. It teaches us to think differently. An elliptic response to Wittgenstein's point of arrival in the *Tractatus*, this book is first and foremost an interdisciplinary study of poetry, drawing on literary theory, philosophy, and cognitive science. The work conducted on minds and brains over the last decades in psychology, artificial intelligence, or neuroscience cannot be ignored, if, as "humanists," we are ever interested in the way we think. Thus, a constant dialogue with the positive examination of cognition serves to better situate the normal regimes of thought—and to underline the other mental possibilities that literature opens up. This essay shows that poetry—a very widespread and possibly universal phenomenon among humans—arises through syntactic structures, cognitive binding, and mental regulations; but that, in going through them, it also exceeds them. The best poems, then, are not only thought experiments but actual thinking experiments for the unthinkable. They expand the usual semantics of natural languages, they singularly deploy the rhetorical armature of speech. They tend to exceed their own algorithms, made of iterations and linguistic re-organizations. They are often reflexive, strange, cognitively dissonant. They provide detachable, movable, and livable significations to our selves. The literary scope of this book is more than "global:" it is uniquely broad and comparative, encompassing dozens of different traditions, oral or written, from all continents, from Ancient times to the contemporary era, with some thirty specific readings of texts, ranging from Sophocles to Gertrude Stein, from Wang Wei to Aimé Césaire, or from cuneiform tablet to rap music.

Mexico has a rich literary heritage that extends back over centuries to the Aztec and Mayan civilizations. This major reference work surveys more than five hundred years of Mexican literature from a sociocultural perspective. More than merely a catalog of names and titles, it examines in detail the literary phenomena that constitute Mexico's most significant and original contributions to literature. Recognizing that no one scholar can authoritatively cover so much territory, David William Foster has assembled a group of specialists, some of them younger scholars who write from emerging trends in Latin American and Mexican literary scholarship. The topics they discuss include pre-Columbian indigenous writing (Joanna O'Connell), Colonial literature (Lee H. Dowling), Romanticism (Margarita Vargas), nineteenth-century prose fiction (Mario Martín Flores), Modernism (Bart L. Lewis), major twentieth-century genres (narrative, Lanin A. Gyurko; poetry, Adriana García; theater, Kirsten F. Nigro), the essay (Martin S. Stabb), literary criticism (Daniel Altamiranda), and literary journals (Luis Peña). Each essay offers detailed analysis of significant issues and major texts and includes an annotated bibliography of important critical sources and reference works.

This study considers the ways Spanish American and Brazilian poets differ from their European counterparts by considering 'Latin American' as more than a perfunctory epithet. It sets the orthodox Latin tradition of the subcontinent against others that have survived or grown up after

the conquest then pays attention to those poets who, from Independence, have striven to express a specifically American moral and geographical identity. Dr Brotherson focuses on Modernismo, or the 'coming of age' of poetry in Spanish America and Brazil, and the importance of the movements associated with it. He considers César Vallejo and Pablo Neruda, probably the greatest of the selection, Octavio Paz, and modern poets who have reacted differently to the idea that Latin America might now be thought to have not just a geographical but a nascent political identity of its own. Poems are liberally quoted, and treated as entities in their own right.

In *Crossover Fiction*, Sandra L. Beckett explores the global trend of crossover literature and explains how it is transforming literary canons, concepts of readership, the status of authors, the publishing industry, and bookselling practices. This study will have significant relevance across disciplines, as scholars in literary studies, media and cultural studies, visual arts, education, psychology, and sociology examine the increasingly blurred borderlines between adults and young people in contemporary society, notably with regard to their consumption of popular culture.

Both an artist and activist, Octavio Paz won the Nobel Prize for literature in 1990. This recognition was the culmination of decades of work, as Paz strove to marry traditional Mexican poetry with distinctly surrealist and Spanish influences. Along with his work, Paz's contribution to the intellectual debates of his time, such as those over the role of Mexican art in national identity, cannot be overemphasized. In Octavio Paz, Nicholas Caistor takes a fresh look at Paz's exquisite poetry and fascinating life. Born during the Mexican Revolution, Paz spent his youth fighting to free Mexico from the ideologies of both the left and right. He traveled to the United States, then to Spain, where he fought with the Republicans against Franco's Nationalists. He eventually served as a diplomat in India before returning to his homeland in 1968, where he again became a vocal opponent of the government. As Caistor demonstrates, Paz's personal journey in those years was as exciting as his public life. He details here the multiple marriages and passionate friendships that inevitably made their way into Paz's poetry. Both concise and insightful, Octavio Paz reveals the life that informs a poetry that is deeply expressive—and distinctly political.

[The American War with Japan](#) New Directions Publishing

Historian Ronald H. Spector, drawing on declassified intelligence files, an abundance of British and American archival material, Japanese scholarship and documents, and the research and memoirs of scholars, politicians, and the military men, presents a thrilling narrative of American war in the Pacific. Spector reassesses U.S. and Japanese strategy and offers some provocative interpretations. He shows that the dual advance across the Pacific by MacArthur and Nimitz was less a product of strategic calculation and more a pragmatic solution to bureaucratic, doctrinal, and public relations problems facing the Army and Navy. He also argues that Japan made its fatal error not in the Midway campaign but in abandoning its offensive strategy after that defeat and allowing itself to be drawn into a war of attrition. Combining impeccable research with electrifying detail, Spector vividly recreates the major battles, little-known campaigns, and unfamiliar events of this brutal 44-month struggle. He reveals that the U.S. had secret plans to wage unrestricted submarine warfare against Japan months before Pearl Harbor and demonstrates that MacArthur and his commanders ignored important intercepts of Japanese messages that would have saved thousands of lives in Papua and Leyte. He skillfully takes the reader from top-secret strategy meetings in Washington, London, and Tokyo to distant beaches and remote Asian jungles with battle-weary GIs. Throughout, Spector contends that American decisions in the Pacific War were shaped more often by the struggles between the British and the Americans, and between the Army and the Navy, than by strategic considerations. Revealing what really happened in the course of a conflict that ended with the most deadly air raid ever, this contribution to WWII history adds a new dimension to our understanding of the people and forces that determined its outcome.
