GK Topicwise Questions AFCAT Human Rights Watch
 This book is a compilation of writings focused on conventional and unconventional insect products. Some of these products are commercial successes, while others are waiting to be launched and are the potential produce of the future. In addition to the well known products honey, mulberry silk, and lac, the book primarily concentrates on silk producing insects other than the mulberry silkworm, insects as food, as sources of medicines, pest and weed managers, and as pollinators. The book highlights the all pervasive role of insects in improving human lives at multiple levels. Accordingly, while most books on insects concentrate on how to limit growth in their population, it instead focuses on how to propagate them. In each chapter, the book brings to the fore how insects are far more beneficial to us than their well publicised harmful roles. This book approaches both unconventional and conventional insect products, such as honey, silk and lac in much more depth than the available literature. It investigates different aspects of the production of these insects, such as the related processes, problems and utilities, in dedicated chapters. Because this book deals with the production of insects or their produce, it has been named Industrial Entomology, perhaps the only book that truly reveals the tremendous potential of insects to help humans live better lives. Based on the research and working experience of the contributors, who are global experts in their respective fields, it provides authentic, authoritative and updated information on these topics. The book offers a unique guide for students, teachers, policy planners, small scale industrialists, and government ministries of agriculture and industry across the globe. It will provide a much required stimulus to insect appreciation and generate enthusiasm for research and the broader acceptance for insect produce. Hopefully, it will also present the Indian perspective on these topics to a global readership.

 The book *Methods in Silkworm Microbiology* is the first ever publication that provides in-depth reviews on the latest progresses about silkworm-pathogen interactions, diseases and management practices for sustainable development of sericulture. Different molecular and immunodiagnostic methods for the detection of pathogens have been comprehensively addressed. Most recent advancements on the role of Micro RNAs in silkworm and pathogen interactions are provided with suitable illustrations. Recent technological advances and emerging trends in exploring silkworm gut microbial communities towards translation research, particularly to understand microbiome functions have been highlighted. Information on various immune mechanisms of silkworm against invading pathogens is summarized. The book further highlights the silkworm gut microbiota as a potential source for biotechnological applications. Provide comprehensive reviews and valuable methods from the selected experts on the topic "Methods in silkworm microbiology/pathology" Provides latest information on application of genomics and transcriptomics to decipher silkworm gut microbial communities. Different molecular and immunodiagnostic methods for the detection of pathogens have been comprehensively addressed Provides up to date information on silkworm-pathogen interactions, different silkworm diseases and immune mechanisms
Indian Journal of Agricultural Research Discovery Publishing House

Silk: Processing, Properties and Applications, Second Edition, examines all aspects of silk technology, including its manufacture, processing, properties, structure-property relationships, dyeing, printing and finishing, and applications. This new edition is updated and expanded to include the very latest developments in silk production. Detailed chapters discuss silk reeling and silk fabric manufacture, the structural aspects of silk, its mechanical and thermal properties, and silk dyeing. Further chapters focus on the latest developments in terms of processing and applications, covering emerging topics, such as spider silks, non-mulberry silks, the printing and finishing of silk fabrics, and by-products of the silk industry. This book will be a highly valuable source of information for textile technologists, engineers and manufacturers, fiber scientists, researchers and academics in natural fibers or textile technology. Offers in-depth coverage of silk production, properties and structure-property relationships Provides an authoritative reference on sericulture, silk fabric processing and applications of silk Expanded to include non-mulberry silks, printing and finishing of silk fabrics, and by-products of sericulture

Silk Cambridge Scholars Publishing

"Himalaya Calling: The Origins of China and India" will take the reader through a journey through the periods of time and places starting from the beginning of civilization from the Himalayas and extending into the Himalaya Sphere. The chapters in the book enable the reader to view the dynamics of China and India from the geo-civilizational paradigm of the Himalaya Sphere. Among the other new concepts introduced is a new understanding of the Buddhist tryst with China's developing process as a super-state and the interaction of the dynamics of wandering ascetics from India and householder in China. It conveys the message of two civilization-states as akin to oases in the desert of modern nation-states and advocates the Indian spiritual goal of "Vasudhaiva kutumbakam" (the whole world is one single family) and the Chinese spiritual goal of "tianxia datong" (grand harmony all-under-Heaven). The book is a must-read for all the leaders and policy makers of China and India. It is a culmination of decades of learning by the author who has lived in both the countries. The reader will begin to understand the shared origins of China and India and how the civilizations have been linked through the ages. The book is timely as it coincides with the commemoration of the diamond jubilee (50th anniversary) of the Panchsheel (Five Principles of Peaceful Coexistence) in 2014. Contents: Foreword Preface Introduction The 'Himalaya Sphere' Lives in the Spirit of China and India Civilization Twins Grew Side by Side Civilization and State in China-India Relations 'Himalaya Sphere' into Universal Prosperity Readership: Policy makers, historians, leaders in China and India and anyone interested in knowing more about China and India. Key Features: No other book in the market that fundamentally offers fresh perspective on understanding of China and India Enables the reader to view the dynamics of China and India from the geo-civilizational paradigm of the Himalaya Sphere Advocates the Indian spiritual goal of "Vasudhaiva kutumbakam" (the whole world is one single family) and the Chinese spiritual goal of "tianxia datong" (grand harmony all-under-Heaven)

Industrial Entomology by Mocktime Publication

Life cycle assessment (LCA) is used to evaluate the environmental impacts of textile products, from raw material extraction, through fibre processing, textile manufacture, distribution and use, to disposal or recycling. LCA is an important tool for the research and development process, product and process design, and labelling of textiles and clothing. Handbook of Life Cycle Assessment (LCA) of Textiles and Clothing systematically covers the LCA process with comprehensive examples and case studies. Part one of the book covers key indicators and processes in LCA, from carbon and ecological footprints to disposal, re-use and recycling. Part two then discusses a broad range of LCA applications in the textiles and clothing industry. Covers the LCA process and its key indicators, including carbon and ecological footprints, disposal, re-use and recycling Examines the key developments of LCA in the textile and clothing industries Provides a wide range of case studies and examples of LCA applications in the textile and clothing industries

Environment Management by Mocktime Publication

Agriculture is the backbone of our economic system. It provides not only food and raw material but also employment opportunities to a very large number of people. Higher atmospheric temperature has an impact on crop yields while the changes in rainfall could affect both crop quality and quantity. Climate change, therefore, could increase the prices of major crops in some regions. For the most vulnerable people, lower agricultural output means lower income. In addition, climate change is expected to increase the risk of illness and death from extreme heat and poor air quality. Recent evidence is the COVID-19 pandemic. Furthermore, climate change also affects the occurrence of other infectious diseases. A number of well-known diseases are climate-sensitive - malaria, dengue fever, and cholera among others. Tourism is considered as an industry and alternative contributor to a nation's income. It can generate employment opportunities and boost up the economy. This book, consisting of 26 chapters, focuses on the issues of agriculture, tourism and health for livelihood enhancement. It is essential to discuss these diverse issues in the field of geography as it encompasses interdisciplinary topics. The range of concerns at the national, regional and local levels is not confined to geography only but also involves other disciplines as well. Therefore, this book is a valuable source for scientists and researchers in allied fields such as livelihood, agriculture, land use, tourism management, health care and tribal studies. Furthermore, this book can be of immense help to the researchers, planners and decision makers engaged in solving problems in these areas in developing countries and beyond.

Book Type - Practice Sets / Solved Papers About Exam: The Jail Warder is responsible for enforcing rules, regulations, policies & laws as well as maintains records of staff inmates. In the United States and Canada, warden is the most common title for an official in charge of a prison or jail. In some US states, the post may also be known as a superintendent. Some small county jails may be managed by the local sheriff or undersheriff. Exam Patterns- UP Police Jail Warder exam is to be conducted in four phases (Written-test, Physical Test, Document Verification, and Medical Test). The exam will be an objective-based written exam. The exam will be of four different papers (General Hindi, General Knowledge, Numerical & Mental Ability Test and Mental Aptitude /Intelligence /Reasoning). The exam will be of 300 marks in total with 150 questions. Subjects covered- General Hindi, Law/ Constitution/ General Knowledge, Numerical & Mental Ability Test, Mental Aptitude Test/Intelligence Test/Test of Reasoning Negative Marking -0.50 Conducting Body-Uttar Pradesh Police

Handbook of Life Cycle Assessment (LCA) of Textiles and Clothing APH Publishing

The book tries to portray sericulture, as a crop enterprise, and which is emerged as one of the foremost view in the theoretical and methodological understanding in the disciplines of Sociology and Social Anthropology in India. Thus, anthropological analysis of sericulture and its emergence in the development literature gives us an idea of the activity leads to further theoretical and critical studies. Anthropological understanding of the sericulture and its development, thus, is explained thoroughly as studied by the scholars of the different disciplines in across the states of India. Sericulture is best suited to a country like India where manpower and land resources are in surplus. It generates direct and indirect employment in various ways. More and more farmers in India have taken up sericulture activity and which was once confined to only five States, has spread to almost all the States of India. Sericulture also creates gainful employment to women and aged people at homes with minimum risk. Thus, the analysis clearly establishes the importance of sericulture over other crops in the generation of fresh employment opportunities in rural areas. Further, as a predominant sector of rural development, stability is the vital need of sericulture enterprise. In the book, an attempt is made to understand the anthropological/sociological view of development. The book is interdisciplinary in nature and will be useful to scholars and students of Anthropology, Sociology, Economics, Social Work, Rural Development, Gender Studies and Development Studies.
