RAMOS EDDIE

Frontiers in Physics - 2017 & 2018 Editor's Choice Emerald Group Publishing

The book contains proceedings of the XV International Scientific Conference INTERAGROMASH 2022, Rostov-on-Don, Russia. The agro-industrial complex is the most extensive and vital industry. It is rapidly developing by introducing the latest technologies and automating various processes necessary for the functioning of this area. The book is dedicated to engineering technologies of precision farming and agricultural robotics. It includes studies on natural resources variability, sustainable soil management, Agro Big Data, Internet of Things, software and mobile apps for precision agriculture, smart weather for precision agriculture, simulations models and decision support systems, expert systems, DGPS, soil physical and chemical characteristic sensors, machinery, etc. Different types of agricultural robots are presented in the book: autonomous fruit picking robots, farming bots that can seed and water plants, test the soil and remove weeds, completely autonomous robot for ecological and economical ultra-high precision spraying and weeding, harvesting robots with the special vision systems that can "see" fruits and understand whether they're ripe and ready to pick, and others. Also, the book covers advances in agricultural biotechnology in such areas of research as crop production improvement practices, genetic modification, as well as microbial biotechnology in agriculture, etc. The book is aimed for scientists, researchers, and graduate students. It is also useful for representatives of regional authorities, as it gives an idea of existing high-tech solutions for agriculture. The book is written and edited by international researchers, academics, and experts in the corresponding research areas.

Re-emergence Of China, The: The New Global Era John Wiley & Sons

Africa's Development Dynamics uses lessons learned in the continent's five regions - Central, East, North, Southern and West Africa - to develop policy recommendations and share good practices. Drawing on the most recent statistics, this analysis of development dynamics attempts to help African leaders reach the targets of the African Union's Agenda 2063 at all levels: continental, regional, national and local.

Africa's Development Dynamics 2021 Digital Transformation for Quality Jobs Springer Nature

The global order, based on international governance and multilateral trade mechanisms in the aftermath of the Second World War, is changing rapidly and creating waves of uncertainty. This is especially true in higher education, a field increasingly

built on international cooperation and the free movement of students, academics, knowledge, and ideas. Meanwhile, China has announced its plans for a "New Silk Road" (NSR) and is developing its higher education and research systems at speed. In this book an international and interdisciplinary group of scholars from Europe, China, the USA, Russia, and Australia investigate how academic mobility and cooperation is taking shape along the New Silk Road and what difference it will make, if any, in the global higher education landscape. Opening chapters present the global context for the NSR, the development of Chinese universities along international models, and the history and outcomes of EU-China cooperation. The flows and patterns in academic cooperation along the NSR as they shape and have been shaped by China's universities are then explored in more detail. The conditions for Sino-foreign cooperation are discussed next, with an analysis of regulatory frameworks for cooperation, recognition, data, and privacy. Comparative work follows on the cultural traditions and academic values, similarities, and differences between Sinic and Anglo-American political and educational cultures, and their implications for the governance and mission of higher education, the role of critical scholarship, and the state and standing of the humanities in China. The book concludes with a focus on the "Idea of a University"; the values underpinning its mission, shape, and purpose, reflecting on the implications of China's rapid higher education development for the geo-politics of higher education itself.

The Baseball Talmud World Bank Publications

This book asks fundamental questions about the extent to which India is participating in the global shift towards knowledge-based forms of competitiveness. It charts Indian performance and progress using a unique framework benchmarked against fourteen other countries. In the course of the analysis, critical areas for improvement are identified, and the book provides detailed and objective insights for policy-makers and researchers to facilitate change and institutional reform in India. Readers will derive a comprehensive understanding of India's performance and prospects as it emerges as a serious global economic player. A particular feature of the work is the development of an original knowledge footprint concept that measures the extent and impact of knowledge development and diffusion domestic and internationally. The views expressed in this book are the author's. **Higher Education and Career Prospects in China** OECD Publishing
 This book on the economics of defence industry assesses a series of historical and contemporary case studies that consistently demonstrate the need for governments to recognise, and thereafter factor, the financial needs of a narrow industrial sector that is capital intensive, technologically advanced and that requires a highly skilled labour force. Since the end of the cold war, Western governments have systematically reduced financial

support to their domestic defence industry and have seemingly ignored planning and funding industrial mobilisation. In all cases, government policy has been to encourage industries to consolidate capacity to become financially viable in a sector that has seen diminished demand. The 2022 Russian invasion of Ukraine has caused Western governments to reassess their previous assumptions. Efforts to increase industrial capacity have been met with the iron laws of economics whereby businesses need to show return on investments. The chapters in this volume posit that efforts to rationalise industrial capacity and innovation to meet short-term financial efficiencies, inevitably results in limited, expensive, and long delays in increased production in times of international crisis. This book serves as an essential guide for academics, researchers and students interested in defence economics, industrial economics, international relations, and industrial policy. The chapters in this book were originally published in various issues of Defense & Security Analysis.

Health Equity in a Globalizing Era Simon and Schuster
 Eldenburg's Management is an introductory text that focuses on presenting content in an easy to understand way that encourages students to think critically and draw connections between theory and practice. This new seventh edition has a strengthened focus on technology and features have been updated to help students further consolidate their knowledge. This includes various forms of revision materials such as auto-graded knowledge-check questions and self-skill assessment. There is also a broad variety of concise case studies, including new ones with a strategic focus, which enable instructors to have thought-provoking and engaging tutorials. An exciting addition to the interactive e-text are the new ANZ videos that feature a diverse group of management thought-leaders who give insights and 'tales from the front.' This will provide supplementary content for lectures or serve as pre-work for a flipped classroom.

Asia's Stock Markets from the Ground Up Studera Press

This flagship publication examines different aspects of the nature and role of international trade in the era of hyperglobalization and considers related policy challenges that will need to be addressed if trade is to contribute to a more stable and inclusive global economic order. Research provides authoritative data and analysis on trade, investment, finance and technology. UNCTAD offers solutions to the major challenges facing developing countries, particularly the poorest and most vulnerable nations. Beyond tailored analysis and policy recommendations, UNCTAD research also generates global standards that govern responsible sovereign lending and borrowing, investment, entrepreneurship, competition and consumer protection and trade rules.

The Leading World's Most Innovative Universities John Wiley & Sons

"After a sharp fall in 2017, economic growth in MENA is projected

to rebound to 3.1 percent in 2018, thanks to the positive global outlook, oil prices stabilizing at relatively higher levels, stabilization policies and reforms, and recovery and reconstruction as conflicts recede. The outlook for MENA remains positive, and the growth rebound is expected to gain momentum over the next two years, exceeding 3 percent in 2020. While stabilization policies have helped economies adjust in recent years, a second phase of reforms is needed should be transformative if the region is to reach its potential and create jobs for hundred million young people who will enter the labor market in coming decades. In this report, we explore the role that public-private partnerships can play, not only in providing an alternative source of financing but in helping change the role of the state from the main provider of employment to an enabler of private sector activity. Studies have shown that the gap between MENA economies and fast-growing ones is the performance of the services sector. The disruptive technology offers new opportunities for boosting private-sector-led growth through enhancement of high-tech jobs in the services sector. The report argues that combining the region's fast-growing pool of university graduates and a heavy penetration of social media and smartphone, could serve as the foundation for a digital sector that could create much-needed private sector jobs for the youth over the next decade."

Routledge

Launched in 2013, *Frontiers in Physics* consists of 18 specialties covering all areas of research in physics. With over 500 published manuscripts, the journal is now indexed in SCIE with the first impact factor coming in 2019. *Frontiers in Physics* aims to become the largest and most cited open access multidisciplinary physics journal. This eBook collects what the Specialty Chief Editors of the journal believed were the most interesting manuscripts published over the past two years. It is a nice collection, which will offer the reader the chance to have a quick overview of the specialties of the journal and offer a glimpse into the state of the art of physics. We must confess that it has been quite challenging to select only one article per specialty section given the many important manuscripts published by the journal in 2017 and 2018. We invite our reader to have a look at the journal homepage and browse what we have published so far. It includes articles on topics very different from each other, written by both early career scientists and well-known researchers, ranging from the indisputable advance of the field to the more bold. We hope you enjoy reading our first edition of the *Frontiers in Physics* Editor's Choice eBook! Professor Alex Hansen (Field Chief Editor) and Dr Claudio Bogazzi (Journal Manager)

Baseball America 2023 Prospect Handbook Digital Edition OECD Publishing

This open access book discusses booming housing markets in cities around the globe, and the resulting challenges for policymakers and central banks. Cities are booming everywhere, leading to a growing demand for urban housing. In many cities this demand is out-pacing supply, which causes house prices to soar and increases the pressure on rental markets. These developments are posing major challenges for policymakers, central banks and other authorities responsible for ensuring financial stability, and economic well-being in general. This volume collects views from high-level policymakers and researchers, providing essential insights into these challenges, their impact on society, the economy and financial stability, and possible policy responses. The respective chapters address issues such as the popularity of cities, the question of a credit-fueled housing bubble, the role of housing supply frictions and potential policy solutions. Given its scope, the book offers a revealing read and valuable guide for everyone involved in practical policymaking for housing markets, mortgage credit and financial stability.

Global Environmental Careers Incredible Baseball Stats

The merger is broadly understood as a fusion of two or more units into one. The merger in higher education has received much attention by policy-makers as well as individual institutions in many countries as a means to bring higher education reforms. The merger of higher education institutions is a visible phenomenon in the recent past, but each merger provides a distinctive instance of major strategic change. Besides this, each merger also shows a distinct set of circumstances, actors, and characteristics. The aims of the mergers have been varied across the nations that include a reduction in fragmentation of institutions, economies of scale, enhanced efficiency, enhanced quality etc. Along with disapproval, a great amount of literature surrounding the benefits of the merger has emerged over the period of time. In spite of ample literature on mergers of higher education institutions, there does not appear to be a clear set of financial, efficiency or quality parameters to assess the success. The majority of the discussions have been narratives. In the available literature, the mergers have been classified based on their participants, stakeholders, nature, the strategy that drives them, their motivation, and/or the resultant degree of absorption. This book discusses the merger experiences and case study of different countries in terms of policies and practices. Each country chapter in the above context narrates that in planning the mergers, what have been the philosophical, economic, political, legal and cultural implications? How the factors such as institutional history, geographical distance, provincial tradition, state regulations, the presence of collective bargaining, and pertinent financial matters shaped the process as well as the outcome of the mergers? The idea of merger and its implementation (including process) at both government and institutional level have been discussed. The outcome assessment also forms the part of the discussion.

Challenges of Globalization and Prospects for an Inter-civilizational World Order Simon and Schuster

This book provides a comprehensive introduction to the economics of the business of maritime transport. It provides an economic explanation of four aspects of maritime transport, namely, the demand, the supply, the market and the strategy. The book first explains why seaborne trade happens and what its development trends are; it then analyses the main features of shipping supply and how various shipping markets function; the book finally addresses the critical strategic issues of the shipping business. The full range of different types of shipping are covered throughout the chapters and cases. The book combines the basic principles of maritime transport with the modern shipping business and the latest technological developments, particularly in the area of digital disruption. The ideas and explanations are supported and evidenced by practical examples and more than 160 tables and figures. The questions posed by the book are similar to those that would be asked by the students in their learning process or the professionals in the business environment, with the answers concentrating on the reasons for what has

happened and will happen in the future rather than merely fact-telling or any specific forecast. The book is most suited for students of shipping-related disciplines, and is also a valuable reference for maritime professionals.

World Tourism Cities Springer Nature

World Inequality Report 2018 is the most authoritative and up-to-date account of global trends in inequality. Researched, compiled, and written by a team of the world's leading economists of inequality, it presents—with unrivaled clarity and depth—information and analysis that will be vital to policy makers and scholars everywhere. Inequality has taken center stage in public debate as the wealthiest people in most parts of the world have seen their share of the economy soar relative to that of others, many of whom, especially in the West, have experienced stagnation. The resulting political and social pressures have posed harsh new challenges for governments and created a pressing demand for reliable data. The World Inequality Lab at the Paris School of Economics and the University of California, Berkeley, has answered this call by coordinating research into the latest trends in the accumulation and distribution of income and wealth on every continent. This inaugural report analyzes the Lab's findings, which include data from major countries where information has traditionally been difficult to acquire, such as China, India, and Brazil. Among nations, inequality has been decreasing as traditionally poor countries' economies have caught up with the West. The report shows, however, that inequality has been steadily deepening within almost every nation, though national trajectories vary, suggesting the importance of institutional and policy frameworks in shaping inequality. *World Inequality Report 2018* will be a key document for anyone concerned about one of the most imperative and contentious subjects in contemporary politics and economics.

World Inequality Report 2018 Simon and Schuster

A summary of how stock markets work for those looking to invest. This book is a practical guide to Asia's stock markets for a general audience. It is for people who do not know much about financial markets but, for whatever reason, would like to learn more. They could be seasoned expatriate pilots, academics and other professionals, newcomers in the region as well as students or young men and women about to start in the finance industry. The idea is to cut through the alphabet soup of industry jargon to provide a clear understanding of how these markets work, how they differ from each other in size and depth, what unique features each stock market has and what drives all the different sectors in these markets – consumers, the internet, banks and technology. The book includes helpful history lessons and personal anecdotes drawn from the author's 30 years in the world of Asian investments.

Environmental Sustainability and Agenda 2030: Efforts, Progress & Prospects documents the status of environmental SDG implementation in the two developing blocs of BRICS and MINTS drawing attention to the progress of implementation at country and company levels, underscoring the urgent actions needed.

China and Europe on the New Silk Road Springer Nature

World Tourism Cities: A Systematic Approach to Urban Tourism is a unique and contemporary textbook that addresses the particular situation of urban tourism destinations in the 2020s by reviewing key issues, trends, challenges and future opportunities for urban tourism destinations worldwide, as well as city destination management. The book is divided into four parts, with Part I providing background chapters on world tourism cities. It begins by clearly defining world tourism cities and explaining the impacts of globalisation and urbanisation on these cities. The subsequent chapter explains the urban tourism phenomenon and traces its growth. Part II presents city destination management, planning and development and the marketing and branding of cities, offering practical solutions and approaches. Part III discusses major issues and trends in world tourism cities including resident well-being and quality of life, sustainability, smart tourism, crises and the rise of tourism in Asian cities, and the final part identifies the future opportunities for city tourism. Written in a student-friendly tone, the book is richly illustrated and contains several engaging features, including Sweet tweets (snippets of information on cities) and Short breaks (detailed case studies on cities). This will be essential reading for all tourism students.
