Outlines and Highlights for Essentials of Human Communication by Devito, Isbn CRC Press

In Communication as...: Perspectives on Theory, editors Gregory J. Shepherd, Jeffrey St. John, and Ted Striphas bring together a collection of 27 essays that explores the wide range of theorizing about communication, cutting across all lines of traditional division in the field. The essays in this text are written by leading scholars in the field of communication theory, with each scholar employing a particular stance or perspective on what communication theory is and how it functions. In essays that are brief, argumentative, and forceful, the scholars propose their perspective as a primary or essential way of viewing communication with decided benefits over other views.

Essentials of Human Communication Pearson

A brief text with a strong focus on skill development Essentials of Human Communication shows how human communication skills apply to the real-world and the workplace. The text presents the fundamental skills of interpersonal, small group, and public communication while emphasizing human communication skills, cultural awareness, listening, critical thinking, ethics, and social media communication. MyCommunicationLab is an integral part of the DeVito program. Key learning applications include MediaShare, an eText, and a study plan. A better teaching and learning experience This program will provide a better teaching and learning experience—for you and your students. Here's how: Personalize Learning— MyCommunicationLab is online learning. MyCommunicationLab engages students through personalized learning and helps instructors from course preparation to delivery and assessment. Improve Critical Thinking— Critical thinking principles are integrated into the text and in the marginal questions, self-tests, and boxes. Engage Students—Real-world examples appear throughout the text. Apply Ethics—Real-life ethical issues are discussed. Support Instructors— A full set of supplements, including MyCommunicationLab, provides instructors with all the resources and support they need. Note: MyCommunicationLab does not come automatically packaged with this text. To purchase MyCommunicationLab, please visit: [www.mycommunicationlab.com](http://www.mycommunicationlab.com) or you can purchase a ValuePack of the text + MyCommunicationLab (at no additional cost): ValuePack ISBN-10: 0205940889 / ValuePack ISBN-13: 9780205940882.

Intraspecific communication involves the activation of chemoreceptors and subsequent activation of different central areas that coordinate the responses of the entire organism—ranging from behavioral modification to modulation of hormones release. Animals emit intraspecific chemical signals, often referred to as pheromones, to advertise their presence to members of the same species and to regulate interactions aimed at establishing and regulating social and reproductive bonds. In the last two decades, scientists have developed a greater understanding of the neural processing of these chemical signals. Neurobiology of Chemical Communication explores the role of the chemical senses in mediating intraspecific communication. Providing an up-to-date outline of the most recent advances in the field, it presents data from laboratory and wild species, ranging from invertebrates to vertebrates, from insects to humans. The book examines the structure, anatomy, electrophysiology, and molecular biology of pheromones. It discusses how chemical signals work on different mammalian and non-mammalian species and includes chapters on insects, *Drosophila*, honey bees, amphibians, mice, tigers, and cattle. It also explores the controversial topic of human pheromones. An essential reference for students and researchers in the field of pheromones, this is also an ideal resource for those working on behavioral phenotyping of animal models and persons interested in the biology/ecology of wild and domestic species.

**Business Communication Essentials** Cram101

For those who wish to learn or teach the tools of skillful communication, this book provides concrete insight into what makes a person a successful communicator and guides readers in ways to improve their own communication skills and those of others. Predicated on four simple notions – that communication can be done well or poorly, that communication skills matter, that people differ in those skills, and that those skills can be improved – the book helps readers identify and enhance their own communication strengths and address weaknesses, assess the communication skills of others, and coach others to improvement. Written in an accessible style, chapter highlights include an engaging review of the research on the practical implications of communication skills in our professional and personal lives. The nature of communication skill and issues in skill assessment are examined. Particular attention is given to understanding sources of communication-skill deficits and the design of effective communication-skill training programs. A final chapter examines the roles of technology, cross-cultural interaction, and aging as they relate to communication skill. This book is written for students and professionals in fields such as human resources, sales, training, counseling, customer relations, education, health-care, and the ministry, with application for courses in professional communication, applied communication, and communication skills at the undergraduate, advanced professional degree, and continuing education levels.
