We're leaving the Championship terminus now, but I'll level with you; this is genuinely a journey into the unknown. Firstly, because I've never written on this type of scale in my entire life before - and secondly, I don't know how on earth this book will be greeted by the reader. I just hope you enjoy it as much as I did preparing it all for you. I do know that many, many years later - perhaps even beyond my remaining years - a void in Hull City's life as a football club will certainly need to be filled. To this end, I hope what you are about to read contributes towards bridging any gap that appears and becomes one story of many that can be treasured by those that experienced the rich trappings of English top flight football for the first time ever in Hull City's life. I'd like this book to be one that can reflect on our inaugural experience and provide just one insight to what it is like to support our great club amongst the cream of England's finest teams. From Saturday May 24th 2008 to the exact same point one year later, this is a 12 month voyage that will herald Hull City being in the Premier League for the first time ever. To the writer and the reader, neither one of us are actually aware of where this embarkation is taking us. Every account written is monitored as and when it happened. All that remains to be stated

before commencing your journey through this book is; you can be one hundred percent assured – “This is the best trip, we’ve ever been on.” And that’s a fact.

Well, how was it for you? This was Cardiff City's first season in the top flight for more than fifty years, and we kept a diary every step of the way, recording all the highs and lows. We enjoyed victory over the champions, success in the first ever All Wales Premier League derby, and visits to the finest stadiums in the country. But there were oh so many off-the-field misadventures, weren't there? We were led by a chairman who looked like a Bond villain, running a club torn apart by Redv.Blue. We spent more time on the front pages than the back pages as CCFC became Car Crash Football Club. And we wrote it all down. This is our version of a crazy season.

"Essex scribe and literary Hammer Pete May writes with humour and eloquence about the most turbulent year of change at the Boleyn since Ken's Café got a tub of Flora." Phill Jupitus West Ham's final season at the Boleyn Ground was always going to be memorable. It featured a

new manager in Slaven Bilic, the arrival of a French magician called Dimitri Payet and away wins at Arsenal, Liverpool and Man City - not to mention an unexpected tilt at the top four and an epic last game at the Boleyn against Man United. But a new beginning is around the corner and, as he and his fellow Hammers prepare to swap the gritty East End streets of E13 for the shiny shopping centres of Stratford, lifelong supporter Pete May reflects on the special place the Boleyn Ground has occupied in the hearts of generations of Irons fans. Whether it's the infamous chants of the Bobby Moore Stand, the pre-match fry-ups at Ken's Café or the joys of sticky carpets, rubbish ale and blokes singing on pool tables in the pubs around Upton Park, Pete's memories are sure to resonate with legions of the claret-and-blue army as they say farewell to the Boleyn and enter a new era at the London Stadium.

*The Club* Springer

This book decodes commercial news discourses from the perspective of cognitive semantics. It attaches considerable importance to the bodily experientialism and linguistic embodiment advocated in discourse analysis and cognitive linguistics and explores the complex yet thought-provoking correlation between overt language and covert cognition by focusing on contrastive analyses of metaphors, image schemas, and stance markers in texts. On the basis of the analyses, the author discusses the linguistic applications, lexical devices and personal experiences, along with their embodied mechanisms, revealing the linguistic strategies, embodied cognitive linguistic actions and constructive thoughts used in media discourses on product promotion, human resources deployment, and commodity problem resolution. In turn, this sheds light on how linguistic selections and cognitive mechanisms are used in composing media news and on how public cognition on certain social and business issues might be framed. The combination of cognitive semantics and commercial discourse analysis offers comprehensive and rewarding insights into the cross-cultural research of both cognitive actions and linguistic behavior reflected in news reports and highlights the correlation between the use of wording and cognitive construction in discourses, which broadens the scope of discourse analysis, cognitive linguistics, applied linguistics, and sociolinguistics. Further, the use of analytical measures and the effective integration of discourse analysis and cognitive semantics lend the book additional analytical

authenticity, providing an empirical foundation for cross-cultural communication studies.

Kieran Maguire looks at the different ways in which professional football operates as a business--how clubs make their money or, more commonly, lose it. In particular he analyzes how success is measured by the different and often competing stakeholders in football clubs--owners, managers, fans, players, commercial partners, and the media.

*A Nostalgic Journey Through the World of Panini* Dino Books

Team sports like football, basketball, soccer, and rugby are hugely popular the world over, on both college and professional levels, and such popularity means that they are big business. Very big. Broadcasting rights alone bring in billions: ESPN paid \$5.6 billion to broadcast college football playoffs for twelve years; Turner Sports/CBS shelled out \$10.4 billion to show the national college basketball tournament through 2024; and the most recent NBA TV deal came in at a cool \$26.4 billion. As the rewards for winning have increased, it's no surprise that sports team budgets

have followed suit. Sure, the athletic program at the University of Texas brought in \$161 million last year, but the Longhorns also spent \$154 million over the same period. Fifteen other college athletics program also racked up over \$100 million in annual expenses. But that's child's play compared to the outgoings at the world's most valuable soccer team, Manchester United, which spent more than \$500 million in 2015. The trouble is that all this spending often fails to yield better results. Teams in all sports have tried just about every gimmick to "hack" their way to better performance. But as they've gotten stuck in stats, mired in backroom politics, and diverted by the facilities arms race, many have lost sight of what should've been their primary focus all along: the game itself. In *Game Changer*, Fergus Connolly shows how to improve performance with evidence-based analysis and athlete-focused training. Through his unprecedented experiences with teams in professional football, basketball, rugby, soccer, Aussie Rules, and Gaelic football, as well as with elite military units, Connolly has discovered how to break down the common elements in all sports to their basic components so that each moment of any game can be better analyzed, whether you're a player or a coach. The lessons of game day then can be used to create valuable learning experiences in training, evaluate the quality of your team's performance, and home in on what's working and what isn't. *Game Changer* also shows you how to expand training focus from players' physical qualities to also advance athletes technically, tactically, and psychologically. His TTPP Model not only helps players continually progress but also stops treating them like a

disposable commodity and instead prioritizes athlete health. Bringing together the latest evidence-based practices and lessons from business, psychology, biology, and many other fields, *Game Changer* is the first book of its kind that helps coaches, athletes, and casual fans:

- Create a cohesive game plan that improves performance through defined objectives, strategies, and tactics
- Put statistical analysis and technology into context so teams can bypass the hype and get meaningful results
- Identify dominant qualities to maximize during training and limiting factors to improve
- Create realistic, immersive learning experiences for individual players and the entire team that deliver defined outcomes

- Structure player development with a new, holistic model that puts athlete health first and helps reduce the chance of injury and burnout
- Balance training load so that all players are fresh and ready to play at their best in competition
- Rethink coaching and organizational leadership and enhance communication, group dynamics, and player interaction
- Create a winning team culture
