West Bengal is a state in the eastern region of India and is the nation's fourth most populous. It is also the seventh most populous sub-national entity in the world. West Bengal is the sixth-largest contributor to India's GDP. West Bengal, together with Bangladesh lying on its east, forms the historical and geographical region of Bengal. To its northeast lie the states of Assam and

Sikkim and the country of Bhutan, and to its southwest lies the state of Orissa. To the west, it borders the states of Jharkhand and Bihar, and to the northwest, Nepal. The Bengal region was part of several kingdoms and dynasties over the course of Indian history. The British East India Company cemented their hold on the region following the Battle of Plassey in 1757, and the city of Calcutta, now Kolkata, served for many years as the capital of British India. A hotbed of the Indian independence movement through the early 20th century, Bengal was divided in 1947 along religious lines into two separate entities: West Bengal — a state of India — and East Bengal, which joined the new nation of Pakistan before becoming part of modern-day Bangladesh

 Social and economic history of science and technology has emerged as a major theme of interdisciplinary research in South Asian history since the late 1990s. This book studies the correlation between technological knowledge and industrial performance, with the focus on electricity, an emerging technology during 1880 and 1945. The arrival of electricity necessitated the introduction of new institutional facilities, and with the growth of technological system, a new business culture grew - there was demand for trained manpower to handle machines and better educational facilities. Taking a broad view of the subject, the narrative of this book is built around the historical experiences of the

local Bengali-speaking population. Adopting the social constructionist model, *Let There Be Light* presents an amalgamation of archival and Indian language source materials to delineate the diverse nature of the appropriation of technological ideas into Indian culture. *Let There Be Light: Engineering, Entrepreneurship and Electricity in Colonial Bengal, 1880-1945* Springer

Whatever has been written about Dr. Syama Prasad Mookerjee so far doesn't do justice to his grand and multi-faceted personality. This leading sentiment is behind the motivation of writing the present book. A lot has been written on Dr. Mookerjee's political endeavours. However, his persona is immeasurably significant beyond his political life. The simplest explanation of his life proclaims him master of social, educational and economic thought. This book is an attempt to know how Dr. Mookerjee became a powerful personality, an

educationist, a thinker, and an administrator. The focal point is to explore the new experiments and innovations brought out into the world of education by him. He always saw the role of education as of utmost importance in the process of national regeneration. Throughout his life, he spoke in favour of education, teachers and students. He was an educationist par excellence. It was under his tenure that Gurudev Rabindranath Tagore delivered the convocation address in Bengali, which was not less than a revolution in British India. This book will help the readers see the profound blending of tolerance, humanity, and tradition, together with the scientific outlook in the personality of Dr. Syama Prasad Mookerjee. Dr. Syama Prasad
