 "How do you think like a manager?" It is one of the most common questions asked when preparing for the CISSP exam. Using 25 CISSP practice questions with detailed explanations, this book will attempt to answer how to think like a member of a senior management team who has the goal of balancing risk, cost, and most of all, human life. The questions will take you through how to resist thinking from a technical perspective to one that is more holistic of the entire organization. Like all of Study Notes and Theory's CISSP practice questions, these questions correlate multiple high-level security concepts and require thinking like a manager. Extracting the most value comes from understanding not only which choice is correct, but more importantly, why the other choices are wrong.

Computer viruses—just the thought of your trusty PC catching one is probably enough to make you sick. Thanks to the cyber-sickies who persist in coming up with new strains, there's a major new cyberattack nearly every day. Viruses sneak in, usually through e-mail. Fortunately, there are ways to inoculate and protect your computer. *Computer Viruses For Dummies* helps you: Understand the risks and analyze your PC's current condition. Select, install, and configure antivirus software. Scan your computer and e-mail. Rid your computer of viruses it's already caught. Update antivirus software and install security patches. Use firewalls and spyware blockers. Protect handheld PDAs from viruses. Adopt safe computing practices, especially with e-mail and when you're surfing the Net. Written by Peter H. Gregory, coauthor of *CISSP For Dummies* and *Security + For Dummies*, *Computer Viruses For Dummies* goes beyond viruses to explain other nasty computer infections like Trojan horses, Hijackers, worms, phishing scams, spyware, and hoaxes. It also profiles major antivirus software to help you choose the best program(s) for your needs. Remember, if you don't protect your computer, not only do you risk having your computer infiltrated and your data contaminated, you risk unknowingly transmitting a virus, worm, or other foul computer germ to everybody in your address book! This guide will help you properly immunize your PC with

antivirussoftware now and install updates and security patches that are likebooster shots to keep your software protected against newviruses.
