Cleveland Cable Company stocks a large range of 3.3KV (3300V) 3 core mains cable available in sizes 16mm to 400mm and manufactured to British Standard BS5467. The 3 core mains cable is a medium voltage power cable designed to be buried for installation. The cable can also be used indoors and outdoors and in cable ducting. Draka BS5467 is the low voltage armoured cable for industrial wiring and mains distribution. BS5467 armoured power cables are widely used in the UK as well as international projects using British standards.

BS5467 SWA/PVC Cable IEC 60502 600/1000V

BS5467 solid aluminium core, XLPE insulated mains cable is suitable for use in power networks. Ideal for indoor and outdoor applications. Steel Wire Armour (SWA) provides mechanical protection and suitability to be installed both indoors and outdoors, through cable ducts and underground.

[Câble BS5467 | Eland Cables](#)

British Standard BS5467 cable specification covers the requirements for low voltage armoured cables - both galvanised steel wire armoured (multi-core) and non-magnetic aluminium wire armoured (single core) - with thermosetting insulation of rated voltages 600/1000V for use in fixed installation in industrial wiring, mains distribution, auxiliary control and similar applications, where there is risk of mechanical damage and some form of protection is required.
