**What a Billion Nonreligious People Do Believe** Vintage  
 In recent years, members of minority religions and atheists have rightly taken advantage of Supreme Court decisions that open up government funding, institutions, and property to participate in public life alongside the Christian majority. Jay Wexler argues for the importance of this movement and travels around the country to meet some of the people on its front line.  
*A Humanist Bible* Harper Collins  
 The God Delusion caused a sensation when it was published in 2006. Within weeks it became the most hotly debated topic, with Dawkins himself branded as either saint or sinner for presenting his hard-hitting, impassioned rebuttal of religion of all types. His argument could hardly be more topical. While Europe is becoming increasingly secularized, the rise of religious fundamentalism, whether in the Middle East or Middle America, is dramatically and dangerously dividing opinion around the world. In America, and elsewhere, a vigorous dispute between 'intelligent design' and Darwinism is seriously undermining and

restricting the teaching of science. In many countries religious dogma from medieval times still serves to abuse basic human rights such as women's and gay rights. And all from a belief in a God whose existence lacks evidence of any kind. Dawkins attacks God in all his forms. He eviscerates the major arguments for religion and demonstrates the supreme improbability of a supreme being. He shows how religion fuels war, foments bigotry and abuses children. The God Delusion is a brilliantly argued, fascinating polemic that will be required reading for anyone interested in this most emotional and important subject.

*Why after ten years of talking with atheists, I'm still a Christian*  
 Tate Publishing & Enterprises

Over the last 25 years, 'no religion' has become the fastest-growing religion in the Western World. Revealing the inspiring beliefs that empower secular culture - alongside real stories of nonreligious men and women based on extensive in-depth interviews from across the U.S. - *Living the Secular Life* will be indispensable for millions of secular people. A manifesto for a booming social movement and a revelatory survey of an overlooked community, this book offers essential and long-awaited information for anyone building a life based on his or her own principles

**The God Delusion. 10th Anniversary Edition** Oxford University Press

For thousands of years, the faithful have honed proselytizing strategies and talked people into believing the truth of one holy book or another. Indeed, the faithful often view converting others as an obligation of their faith—and are trained from an early age to spread their unique brand of religion. The result is a world broken in large part by unquestioned faith. As an urgently needed counter to this tried-and-true tradition of religious evangelism, *A Manual for Creating Atheists* offers the first-ever guide not for talking people into faith—but for talking them out of it. Peter Boghossian draws on the tools he has developed and used for more than 20 years as a philosopher and educator to teach how to engage the faithful in conversations that will help them value reason and rationality, cast doubt on their religious beliefs, mistrust their faith, abandon superstition and irrationality, and ultimately embrace reason.

**I Don't Believe in Fairy Tales** Farrar, Straus and Giroux

To some, the concept of having faith in a higher power or a set of religious beliefs is nonsensical. Indeed, many view religion in general, and Christianity in particular, as unfounded and unreasonable. Norman Geisler and Frank Turek argue, however, that Christianity is not only more reasonable than all other belief systems, but is indeed more rational than unbelief itself. With conviction and clear thinking, Geisler and Turek guide readers through some of the traditional, tested arguments for the existence of a creator God. They move into an examination of the source of morality and the reliability of the New Testament accounts concerning Jesus. The final section of the book deals with a detailed investigation of the claims of Christ. This volume will be an interesting read for those skeptical about Christianity, as well as a helpful resource for Christians seeking to articulate a more sophisticated defense of their faith.

"This study guide is the ultimate resource to use side-by-side with *I Don't Have Enough Faith to Be an Atheist* and help the reader draw out the evidence for Christianity as well as provide practical insights on how to engage skeptics with the truth addressed in the book. The study guide is divided up into three parts that emboldens the reader to get motivated, equips the reader to be trained, and engages the reader so that they are prepared to readily respond to the objections asserted by skeptics and atheist. Dr. Norman L. Geisler has taught at the university and graduate levels for more than 50 years and has spoken and debated all over the world. He holds an MA from Wheaton College and a PhD in philosophy from Loyola University, and is presently Provost and Distinguished Professor of Apologetics at Veritas Evangelical Seminary in Murrieta, California. He is the author and coauthor of more than 70 books. Jason Jimenez has pastored families for 15 years and is founder and president of re/shift ministries, Inc. He is the author of *The Raging War of Ideas: How to Take Back Our Faith, Family, and Country* and *The Raging War of Ideas* study guide for small groups"--Back cover.

*Unbelievable?* Zondervan

From the provocative author of *Straw Dogs* comes an incisive, surprising intervention in the political and scientific debate over religion and atheism. When you explore older atheisms, you will find that some of your firmest convictions—secular or religious—are highly questionable. If this prospect disturbs you, what you are looking for may be freedom from thought. For a generation now, public debate has been corroded by a shrill, narrow derision of religion in the name of an often vaguely understood "science." John Gray's stimulating and enjoyable new book, *Seven Types of Atheism*, describes the complex, dynamic world of older atheisms, a tradition that is, he writes, in many

ways intertwined with and as rich as religion itself. Along a spectrum that ranges from the convictions of "God-haters" like the Marquis de Sade to the mysticism of Arthur Schopenhauer, from Bertrand Russell's search for truth in mathematics to secular political religions like Jacobinism and Nazism, Gray explores the various ways great minds have attempted to understand the questions of salvation, purpose, progress, and evil. The result is a book that sheds an extraordinary light on what it is to be human.

*The Atheist Muslim* Random House

Caught between the beauty of his grandchildren and grief over a friend's death, Frank Schaeffer finds himself simultaneously believing and not believing in God--an atheist who prays. Schaeffer wrestles with faith and disbelief, sharing his innermost thoughts. He writes as an imperfect son, husband and grandfather whose love for his family, art and life trumps the ugly theologies of an angry God and the atheist vision of a cold, meaningless universe.

**Hi, I'm an Atheist!** Harper Collins

In the last decade, atheism has leapt from obscurity to the front pages: producing best-selling books, making movies, and plastering adverts on the side of buses. There's an energy and a confidence to contemporary atheism: many people now assume that a godless scepticism is the default position, indeed the only position for anybody wishing to appear educated, contemporary, and urbane. Atheism is hip, religion is boring. Yet when one pokes at popular atheism, many of the arguments used to prop it up quickly unravel. *The Atheist Who Didn't Exist* is designed to expose some of the loose threads on the cardigan of atheism, tug a little, and see what happens. Blending humour with serious thought, Andy Bannister helps the reader question everything, assume nothing and, above all, recognise lazy scepticism and bad arguments. Be an atheist by all means: but do be a thought-through one.

[Why I Am an Atheist Who Believes in God](#) I Don't Believe in

AtheistsNo Marketing BlurbWhen Atheism Becomes ReligionAmerica's New Fundamentalists

From the New York Times bestselling author of *American Fascists* and the NBCC finalist for *War Is a Force That Gives Us Meaning* comes this timely and compelling work about new atheists: those who attack religion to advance the worst of global capitalism, intolerance and imperial projects. Chris Hedges, who graduated from seminary at Harvard Divinity School, has long been a courageous voice in a world where there are too few. He observes that there are two radical, polarized and dangerous sides to the debate on faith and religion in America: the fundamentalists who see religious faith as their prerogative, and the new atheists who brand all religious belief as irrational and dangerous. Both sides use faith to promote a radical agenda, while the religious majority, those with a commitment to tolerance and compassion as well as to their faith, are caught in the middle. The new atheists, led by Richard Dawkins, Christopher Hitchens and Sam Harris, do not make moral arguments about religion. Rather, they have created a new form of fundamentalism that attempts to permeate society with ideas about our own moral superiority and the omnipotence of human reason. *I Don't Believe in Atheists* critiques the radical mindset that rages against religion and faith. Hedges identifies the pillars of the new atheist belief system, revealing that the stringent rules and rigid traditions in place are as strict as those of any religious practice. Hedges claims that those who have placed blind faith in the morally neutral disciplines of reason and science create idols in their own image -- a sin for either side of the spectrum. He makes an impassioned, intelligent case against religious and secular fundamentalism, which seeks to divide the

world into those worthy of moral and intellectual consideration and those who should be condemned, silenced and eradicated. Hedges shatters the new atheists' assault against religion in America, and in doing so, makes way for new, moderate voices to join the debate. This is a book that must be read to understand the state of the battle about faith.

I Don't Believe in Atheists

[A Teen's Guide to Exploring a Life Without Religion](#) Bloomsbury Publishing

From the author of *The Architecture of Happiness*, a deeply moving meditation on how we can still benefit, without believing, from the wisdom, the beauty, and the consolatory power that religion has to offer. Alain de Botton was brought up in a committedly atheistic household, and though he was powerfully swayed by his parents' views, he underwent, in his mid-twenties, a crisis of faithlessness. His feelings of doubt about atheism had their origins in listening to Bach's cantatas, were further developed in the presence of certain Bellini Madonnas, and became overwhelming with an introduction to Zen architecture. However, it was not until his father's death -- buried under a Hebrew headstone in a Jewish cemetery because he had intriguingly omitted to make more secular arrangements -- that Alain began to face the full degree of his ambivalence regarding the views of religion that he had dutifully accepted. Why are we presented with the curious choice between either committing to peculiar concepts about immaterial deities or letting go entirely of a host of consoling, subtle and effective rituals and practices for which there is no equivalent in secular society? Why do we bristle at the mention of the word "morality"? Flee from the idea that art should be uplifting, or have an ethical purpose? Why don't we build temples? What mechanisms do we have for expressing gratitude? The challenge that de Botton addresses in his book: how to separate ideas and practices from the religious institutions that have laid claim to them. In *Religion for Atheists* is an argument to free our soul-related needs from the particular influence of religions, even if it is, paradoxically, the study of religion that will allow us to rediscover and rearticulate those needs.

SPCK

2016 Winner of the Gospel Coalition Book Awards At the time of his death, Christopher Hitchens was the most notorious atheist in the world. And yet, all was not as it seemed. "Nobody is not a divided self, of course," he once told an interviewer, "but I think it's rather strong in my case." Hitchens was a man of many contradictions: a Marxist in youth who longed for acceptance among the social elites; a peacenik who revered the military; a champion of the Left who was nonetheless pro-life, pro-war-on-terror, and after 9/11 something of a neocon; and while he railed against God on stage, he maintained meaningful—though largely hidden from public view—friendships with evangelical Christians like Francis Collins, Douglas Wilson, and the author Larry Alex Taunton. In *The Faith of Christopher Hitchens*, Taunton offers a very personal perspective of one of our most interesting and most misunderstood public figures. Writing with genuine compassion and without compromise, Taunton traces Hitchens's spiritual and intellectual development from his decision as a teenager to reject belief in God to his rise to prominence as one of the so-called "Four Horsemen" of the New Atheism. While Hitchens was, in the minds of many Christians, Public Enemy Number One, away from the lights and the cameras a warm friendship flourished between Hitchens and the author; a friendship that culminated in not one, but two lengthy road trips where, after Hitchens's diagnosis of esophageal cancer, they studied the Bible together. *The Faith of Christopher Hitchens*

gives us a candid glimpse into the inner life of this intriguing, sometimes maddening, and unexpectedly vulnerable man. "If everyone in the United States had the same qualities of loyalty and care and concern for others that Larry Taunton had, we'd be living in a much better society than we do." ~ Christopher Hitchens

**How an Atheist Found Common Ground with the Religious** Pitchstone Publishing (US&CA)

Growing up, all my friends would have described my family as a Christian family. I assumed all my friends were Christians as well. We all believed in God. We occasionally attended church. We were good people. Even though we believed in God, we didn't know his word, didn't understand the gospel, and didn't pursue his will. We believed in God, but we lived as if he didn't exist. After pastoring for eighteen years, I've noticed a large percentage of people in my church living similar lives. Some seem to be Christian in name only without a lot of visible spiritual fruit. Others boldly claim Christ is Lord while living lives diametrically opposed to the teachings in scripture. The more I looked, the more I found Christian Atheists everywhere. While it is often easy to spot the hypocrisy in others, it is generally more difficult to see in the mirror. One day in an honest moment, I painfully admitted that although I unquestionably believed in God, I was leading the church as if he didn't exist. I wrongly depended more on my own abilities than on his Spirit. Sadly, I dangerously cared more what people thought about me than what God thought about me. And although I preached about putting your whole faith in God, I still lived as if everything was up to me. The book *Christian Atheism* reflects my personal journey toward a more authentic God-honoring life.

*The Atheists Are Revolting!* Image

"A superbly argued book." —Richard Dawkins, author of *The God Delusion* The New York Times bestselling author of *Why Evolution is True* explains why any attempt to make religion compatible with science is doomed to fail In this provocative book, evolutionary biologist Jerry A. Coyne lays out in clear, dispassionate detail why the toolkit of science, based on reason and empirical study, is reliable, while that of religion—including faith, dogma, and revelation—leads to incorrect, untestable, or conflicting conclusions. Coyne is responding to a national climate in which more than half of Americans don't believe in evolution, members of Congress deny global warming, and long-conquered childhood diseases are reappearing because of religious objections to inoculation, and he warns that religious prejudices in politics, education, medicine, and social policy are on the rise. Extending the bestselling works of Richard Dawkins, Daniel Dennett, and Christopher Hitchens, he demolishes the claims of religion to provide verifiable "truth" by subjecting those claims to the same tests we use to establish truth in science. Coyne irrefutably demonstrates the grave harm—to individuals and to our planet—in mistaking faith for fact in making the most important decisions about the world we live in. *Praise for Faith Versus Fact: "A profound and lovely book . . . showing that the honest doubts of science are better . . . than the false certainties of religion."* —Sam Harris, author of *The End of Faith*

**When Atheism Becomes Religion** Oxford University Press

In much of the Muslim world, religion is the central foundation upon which family, community, morality, and identity are built. The inextricable embedment of religion in Muslim culture has forced a new generation of non-believing Muslims to face the heavy costs of abandoning their parents' religion: disowned by their families, marginalized from their communities, imprisoned, or even sentenced to death by their governments. Struggling to reconcile the Muslim society he was living in as a scientist and physician and the religion he was being raised in, Ali A. Rizvi

eventually loses his faith. Discovering that he is not alone, he moves to North America and promises to use his new freedom of speech to represent the voices that are usually quashed before reaching the mainstream media—the Atheist Muslim. In *The Atheist Muslim*, we follow Rizvi as he finds himself caught between two narrative voices he cannot relate to: extreme Islam and anti-Muslim bigotry in a post-9/11 world. *The Atheist Muslim* recounts the journey that allows Rizvi to criticize Islam—as one should be able to criticize any set of ideas—without demonizing his entire people. Emotionally and intellectually compelling, his personal story outlines the challenges of modern Islam and the factors that could help lead it toward a substantive, progressive reformation.

*The Atheist Who Didn't Exist* Crossway

Presents excerpts on the subject of religion from the writings of such notable non-believers as John Stuart Mill, Karl Marx, Charles Darwin, Mark Twain, H. L. Mencken, Albert Einstein, Richard Dawkins, and Salman Rushdie.

*Faith Versus Fact* Da Capo Press

So, what do you get an atheist for Christmas? This collection of smart, funny essays, of course—short works by 42 resolutely secular-minded geniuses about how to survive (and even enjoy) the holiday season...without feeling the Christmas Spirit move you. Editors Robin Harvie and Stephanie Meyers have gathered writers, celebrities, comedians, and scientists to deliver essays ranging from the hilarious to the reflective to the charmingly absurd in *The Atheist's Guide to Christmas*, a perfect gift for the Pastafarian who has everything, the Scrooge who wants nothing,

and anyone else interested in the diverse meanings that Christmas can hold.

*Essential Readings for the Nonbeliever* Simon and Schuster

"Crucify him!" screamed the crowd. Could there be a time worse than this, a people worse than this? Welcome to the present day. People claim they don't believe in God. And we accept that. People murder babies in a mother's womb. And we accept that. People of the same sex are married. And we accept that. People hate their neighbor. And we accept that. People terrorize other people. And we accept that. People ignore the law. And we accept that. God tells us plainly that every man knows a supreme being exists, and that each of us will be held accountable. "For since the creation of the world God's invisible qualities - his eternal power and divine nature--have been clearly seen, being understood from what has been made, so that men are without excuse" (Romans 1:20). Are you going to believe God, or man? God is letting you know now that he knows your heart. Is there anything that really brings you joy? Any point to your life? Society keeps bending and breaking God's laws to try and make our lives have meaning. To make sure everyone has the right to be happy. Each of us battles the evil within us and around us every day. There is meaning in life. There is satisfaction. There are answers to our questions, solutions to our problems. This isn't about the world. God has made clear how the world ends. All you need do is look around to see the truth of this. Just like the truth of the atheist, who does not exist. This is about you. Make your life count.
