TALIYAH BOONE

Canadiana Springer

Dedicated to Martin Bell (University of Reading), this book outlines how wetland and inland environments can be related and investigated using multi-method approaches. Papers fall under three themes: coastal and intertidal archaeology; mobility and human-environment relationships; heritage resource management, nature conservation and rewilding.

New Hope for Concussions TBI and PTSD Lulu.com

The peripheral urban condition has long been understood as the demarcation of the city limit where built form confronts unbuilt territory and where the artificial confronts the natural. It has traditionally implied a zone of limited political intent where fragmented infrastructure overlaps dispersed urban form and where the historical, the natural and the expectant co-exist.

Issues in Ophthalmology and Optometry Research and Practice: 2013 Edition ScholarlyEditions

Collection Thinking is a volume of essays that thinks across and beyond critical frameworks from library, archival, and museum studies to understand the meaning of "collection" as an entity and as an act. It offers new models for understanding how collections have been imagined and defined, assembled, created, and used as cultural phenomena. Featuring over 70 illustrations and 21 original chapters that explore cases from a wide range of

fields, including library and archival studies, literary studies, art history, media studies, sound studies, folklore studies, game studies, and education, Collection Thinking builds on the important scholarly works produced on the topic of the archive over the past two decades and contributes to ongoing debates on the historical status of memory institutions. The volume illustrates how the concept of "collection" bridges these institutional and structural categories, and generates discussions of cultural activities involving artifactual arrangement, preservation, curation, and circulation in both the private and the public spheres. Edited and introduced collaboratively by three senior scholars with expertise in the fields of literature, art history, archives, and museums, Collection Thinking is designed to stimulate interdisciplinary reflection and conversation. This book will be of interest to scholars and practitioners interested in how we organize materials for research across disciplines of the humanities and social sciences. With case studies that range from collecting Barbie dolls to medieval embroideries, and with contributions from practitioners on record collecting, the creation of sub-culture archives, and collection as artistic practice, this volume will appeal to anyone who has ever wondered about why and how collections are made.

Cognitive and Social Perspectives for Literacy Research and Instruction Springer Science & Business Media

The role of orthography in reading and writing is not a new topic of inquiry. For example, in 1970 Venezky made a seminal contribution with The Structure of English Orthography in which he showed how both sequential redundancy (probable and permissible letter sequences) and rules of letter-sound correspondence contribute to orthographic structure. In 1980 Ehri introduced the concept of orthographic images, that is, the representation of written words in memory, and proposed that the image is created by an amalgamation of the word's orthographic and phonological properties. In

1981 Taylor described the evolution of orthographies in writing systems—from the earliest logographies for pictorial representation of ideas to syllabaries for phonetic representation of sounds to alphabets for phonemic representation of sounds. In 1985 Frith proposed a stage model for the role of orthographic knowledge in development of word recognition: Initially in the logographic stage a few words can be recognized on the basis of partial spelling information; in the alphabetic stage words are recognized on the basis of grapheme-phoneme correspondence; in the orthographic stage spelling units are recognized automatically without phonological mediation. For an historical overview of research on visual processing of written language spanning the earliest records of writing to the early work in experimental psychology, see Venezky (1993).

New Directions in Dance Elsevier

This book constitutes the refereed proceedings of the 19th International Symposium on Stabilization, Safety, and Security of Distributed Systems, SSS 2017, held in Boston, MA, USA, in November 2017. The 29 revised full papers presented together with 8 revised short papers were carefully reviewed and selected from 68 initial submissions. This year the Symposium was organized into three tracks reflecting major trends related to self-* systems: Stabilizing Systems: Theory and Practice: Distributed Computing and Communication Networks; and Computer Security and Information Privacy. *Personality, Individual Differences and Intelligence* Archaeopress Publishing Ltd

Proceedings of a workshop whose objectives were: to present and discuss results of recent climate change experiments undertaken in Canada; to evaluate a variety of climate models and impact analyses and to develop methods and strategies for future studies; to establish working linkages between modelers and analysts in the fields of climate, hydrology, and ecosystem research.

Annals of Dyslexia Springer Science & Business Media

Issues in Ophthalmology and Optometry Research and Practice: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Orthoptics. The editors have built Issues in Ophthalmology and Optometry Research and Practice: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Orthoptics in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Ophthalmology and Optometry Research and Practice: 2013 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

The Varieties of Orthographic Knowledge Rowman & Littlefield

Career Narratives and Academic Womanhood is a collection of essays in which life writing scholars theorize their early-career, mid-career, and late-career experiences with the documents that shape their professional lives as women: the institutional auto/biography of employment letters, curriculum vitae, tenure portfolios, promotion applications, publication and conference bios, academic website profiles, and other self-authored narratives required by institutions to compete for opportunities and resources. The essays explore the privacy laws, peer review, disciplinary standards, digital media, and other standardizing tools, practices and policies that impact women's self-construction at pivotal junctures at which they promote themselves in the spaces of academic careers.

Study Smarter, Not Harder Architectural Design

Offers an original analysis of the role of journals in the institutionalization of critical and cultural theory in Canada and the USA.

Back Issues Taylor & Francis

This is the first book to examine in-depth the crucial role of the speed of information processing in the brain in determining reading fluency in both normal and dyslexic readers. Part I explains fluency in reading from both traditional and modern perspectives. Fluency has historically been viewed as the outcome of other reading-related factors and has often been seen as a convenient measure of reading skills. This book, however, argues that fluency has a strong impact on other aspects of reading and plays a central role in the entire reading process. Part II deals with the determinants of reading fluency. Chief among these is the speed of information processing in the brain. Using both behavioral and electrophysiological evidence, the book systematically examines the features of processing speed in the various brain systems involved in reading: visual-orthographic, auditory-phonological, and semantic and shows how speed of processing affects fluency in reading. Part III deals with the complex issues of cross-modal integration and specifically with the need for effective synchronization of the brain processes involved in reading. It puts forward the Synchronization Hypothesis and discusses the role of the Asynchrony Phenomenon as a major factor in dyslexia. Finally, it summarizes research on manipulating reading rate by means of the Acceleration method, providing evidence for a possible intervention aimed at reducing Asynchrony. Key features of this outstanding new book include: *Expanded View of Fluency. Reading fluency is seen as both a dependent and an independent Variable. Currently available books focus on reading rate solely as the outcome of other factors whereas this volume stresses that it is both an outcome and a cause. *Information Processing Focus. Fluency itself is determined to a large extent by a more general factor, namely, speed of processing in the brain. The book presents wide-ranging evidence for individual differences in speed of processing across many subpopulations. *Brain Synchronization Focus. The book posits a new theory arguing that effective reading requires synchronization of the different brain systems: visual orthographic, auditory-phonological, and semantic. *Research-Based Interventions. Interventions to enhance fluency and, thereby, reading skills in general are presented in detail. *Author Expertise. Zvia Breznitz is Head of the Department of Learning Disabilities and Director of the Laboratory for Neurocognitive Research at Haifa University in Israel, where she has been researching this topic for over a decade. This book is appropriate for researchers and advanced students in reading, dyslexia, learning disabilities, cognitive psychology, and neuropsychology.

Comprehensive Dissertation Index, 1861-1972: Psychology Elsevier

Now updated and expanded to cover the latest technologies, this full-color text on clinical refraction uses an easy-to-read format to give optometry students and practitioners all the important information they need. Also covers a wide range of other aspects of the eye exam, including anterior and posterior segment evaluations, contact lens, ocular pharmacology, and visual field analysis. Four new chapters cover wavefront-guided refraction, optical correction with refractive surgeries, prosthetic devices, and patients with ocular pathology. Offer precise, step-by-step how-to's for performing all of the most effective refractive techniques. Presents individualized refractive approaches for the full range of patients, including special patient populations. Contributors are internationally recognized, leading authorities in the field. New full-color design with full-color images throughout.

Completely updated and expanded to include current technologies. A new chapter on Optical Correction with Refractive Surgeries, including keratoplasty, traditional refractive surgeries (e.g. LASIK and PRK), crystalline lens extraction with and without pseudophakia, the new presbyopic surgery, etc. A new chapter on Wavefront Guided Refraction provides information on the advantages and limitations the Hartmann-Shack Method for objective refraction plus aberrometry and the refraction and the use of in the correction of the eye with spectacles, contact lenses, and refractive surgery. A new chapter on Patients with Ocular Pathology reflects the most current knowledge of patients with ocular pathologies. Provides information on Optical Correction with Prosthetic Devices, including corneal onlays, stromal implants, phakic intraocular lenses, etc. Includes new chapters and/or discussions on such topics as: Aberrations of the Eye, Refractive Consequences of Eye Pathology, Diagnosis and Treatment of Dry Eye, Diagnosis of Pathology of the Anterior Segment, Diagnosis of Glaucoma, and Diagnosis of Pathology of the Posterior Segment. Visual Acuity chapter expanded to include the effect of refractive error on visual acuity and statistics on how much of a change in visual acuity is significant. Objective Refraction, Corneal Topography, and Visual Field Analysis chapters include the addition of new electro-optical and computer techniques and equipment. Chapters on Multifocal Spectacle Lenses and Contact Lenses now cover newer progressive addition lenses and contact lenses that are now on the market. Electrodiagnosis chapter revised to take a more clinical approach.

Climate Change Lulu.com

Recent research has shown that dyslexics and dysphasics exhibit a reduced brain capacity to process fast rates of information flow. This volume focuses on the neuronal mechanisms for rapid temporal information processing and the critical importance of timing in speech, language and reading.

The ... Yearbook of the National Reading Conference Pro-Ed

Personality, Individual Differences and Intelligence, 2nd Edition, offers accessible and in-depth coverage of classic and contemporary issues, and actively encourages students to develop skills in critical analysis. All chapters have been extensively revised to include the latest research. This new edition includes four new chapters, covering Health Psychology, Well being and Personality Disorders, Contemporary Ideas and Debates in Personality, and Psychometric Testing. The book includes a range of pedagogical features to engage students, stimulate interest and support learning at different levels. In addition, the book is supported by a fantastic companion website which includes a range of exam and essay questions to allow students to consolidate their understanding, weblinks and commentary on online journals to help students better understand the research process in the field, and three chapters are available exclusively online: Academic Argument and Thinking, Statistical Terms, and Research Ethics.

Memory in Everyday Life Taylor & Francis

New Directions in Dance is a collection of papers presented at the Seventh Dance in Canada Conference held at the University of Waterloo, Canada, in June 1979. The book focuses on the future directions of dance and covers dance thought and expression, its physical realities, related arts, and its role in society. The topics encompass a wide range of disciplines, from choreography, semiotics, and aesthetics to criticism, psychology, history, physics, biomechanics, orthopedics, education, and computer analysis. Comprised of 19 chapters, this book begins with an introduction to Aristotle's dramatic theories and their application to the criticism of dances, particularly those with dramatic structure and/or origins. Of particular relevance are Aristotle's treatment of the aesthetic concepts of unity and causality; his definition of tragedy; the means of poetic imitation as diction and melody; and the manner of poetic imitation as dramatic with the use of spectacle. The discussion then turns to R. G. Collingwood's principles of art and whether they contain a theory of dance; some applications of linguistic and semiological concepts to theater dance; and parallel trends in the development of Expressionist painting and the genesis of modern dance in Germany. Subsequent chapters explore children as dance audience; the history of dance in Canada; the link between physics and ballet; and computer-assisted notation of dance. The final section is devoted to dance policy and education. This monograph will be of interest to dancers, dance scholars and researchers, artists, students, teachers, and others involved in the dance profession.

The Role of Naming Speed and Phonemic Awareness in Reading, Spelling, and Orthographic Knowledge Pearson Education

If you or someone you love has had a concussion or traumatic brain injury, this book is for you. "New Hope for Concussions TBI & PTSD" is a powerful resource for the injured, the caregivers, the sporting world, the medical community, and those serving our veterans and others with PTSD. It is a book of hope for all those who have been told, "We are sorry but there is nothing more we can do."

Brain Training: 8-in-1 Bundle to Master Memory, Speed Reading, Concentration, Accelerated Learning, Study Skills, Mind Mapping, Mental Models & Neuroplasticity Elsevier Health Sciences

First published in 2001. Routledge is an imprint of Taylor & Francis, an informa company.

American Doctoral Dissertations Routledge

The Geography of Tourism and Recreation presents the first comprehensive introduction to tourism, leisure and recreation and the relationships between them. This accessible text includes a wealth of international case studies spanning Europe, North America, Australasia and China. Each chapter highlights the methods used by geographers to analyse recreation and tourism. It also introduces new perspectives from gender studies and postmodernism and examines key issues including * the demand and supply of recreation and tourism * the role of public policy, planning and management * the impact of tourism and recreation on urban, rural, mountain and coastal environments * tourism and recreation in wilderness areas and other peripheral regions. The use of student text features makes it ideal for course use.
