(HICOSPOS
2019). The
phenomenon
of climate
change is
avoidable
since its
effects are
significantly
on both
environment
and human
beings live -
such as

human health, agriculture, food security, water supply, energy, ecosystem and. Here human beings play role as the actors as well as the victim. In addition, we also face society 5.0 in which integrated system of digital technology brings humans to achieve a high quality of life ideally, however, this state requires hard and sustainable efforts from all parties such as community of social and

political sciences. Since every steps of society achievements also bring its consequences in terms of culture, and socio-political changes both positive and negative effects. Complexity phenomena of climate change in one side, and society 5.0 in other side, it turns should be responded by providing collaborative works among scholars and decision makers. International conference,

therefore, becoming a scientific way to experts especially social and political sciences to share and contribute to solve the problems that arise from climate change and society 5.0. We hope that the proceeding will contribute to dynamic science discourse for responding social and climate changes challenges. Proceedings of the 1st Asian Conference on Humanities,

Padang, Aceh, Medan and several from Malaysia, and Thailand. The AISTSSE meeting is expected to yield fruitful result from discussion on various issues dealing with challenges we face in this Industrial Revolution (RI) 4.0. The purpose of AISTSSE is to bring together professionals, academics and students who are interested in the advancement of research and practical applications of innovation in

education, science and culture. The presentation of such conference covering multi disciplines will contribute a lot of inspiring inputs and new knowledge on current trending about: Mathematical Sciences, Mathematics Education, Physical Sciences, Physics Education, Biological Sciences, Biology Education, Chemical Sciences, Chemistry Education,

and Computer Sciences. Thus, this will contribute to the next young generation researches to produce innovative research findings. Hopely that the scientific attitude and skills through research will promote Unimed to be a well-known university which persist to be developed and excelled. Finally, we would like to express greatest thankful to all colleagues in the steering

<p>committee for cooperation in administering and arranging the conference. Hopefully these seminar and conference will be continued in the coming years with many more insight articles from inspiring research. Annual Conference of Engineering and Implementation on Vocational Education (ACEIVE-2018) is a scientific forum for scholars to disseminate their research and share ideas. This conference was held on November 3, 2018 on the Digital Library of Universitas Negeri Medan, North Sumatra Province, Indonesia. The ACEIVE's theme is Engineering and Application for Industry 4.0. The conference was attended by researchers, experts, practitioners, and observers from all around the globe to explore various issues and debates on research and experiences, discuss ideas of empowering engineering and implementation on vocational education for Industry 4.0. This event has been carried out well and produced many benefits to increase the knowledge of conference participants based on research results, particularly the implementation of vocational education for industrial revolution 4.0.

We are proudly presenting the proceedings of the 2nd International Conference on Social Sciences 2019

(ICSS 2019). It has focus on the relation of governance and sustainable development. The issue of governance, politics, policy and sustainable development is important today. Not only globally, but also Indonesia nationally to the local level. There are several important issues relating to this, both institutionally and the relationships between individuals and groups in supporting the agenda of sustainable development. More than 100 manuscripts were presented at this conference with more than 50 of them selected to be published in proceedings. We hope by this conference, discussions on the importance of sustainable development will increasingly become an important concern together. Brings better response from the

government and social relations for development. **IISS 2019** European Alliance for Innovation The International Seminar on Teacher Training and Education 2021 (ISTED 2021) is an international seminar devoted to fostering the development of innovative education in 21st century. The goal of ISTD seminar is to provide a forum for lectures, teachers, students, experts, and

practitioners from universities, governments, NGOs, and research institutes, and to share cutting-edge developments in educations and social humanities. It also offers an opportunity to deepen understanding of the connection between information and study related to technologies, educations, and social humanities. The conference will consist of a plenary of keynote and

paper presentation. We invite you to participate and submit your paper through online system. The approved paper will be presented and published in EAI, Book Chapter of ISTD 2021, and Journals related topics at this conference. **Proceedings of the 5th International Conference on Sports, Health, and Physical Education, ISMINA 2021, 28-29 April 2021, Semarang, Central Java,**

Yayasan Kita Menulis This proceeding consists of selected papers presented at Konferensi Internasional Berbahasa Indonesia Unindra (Unindra's Indonesian Language International Conference), KIBAR 2020, held in October 2020. The 37 papers were carefully reviewed and selected from 71 submissions. This proceeding covers a wide range of

subjects reflecting the main disciplines of the conference: Social Sciences and Humanities, Arts, Design and Media, and Educational Sciences. The discussion of the problem in each paper is delivered in Indonesian language, as the main purpose of the conference, in addition to provide a venue for academic conversation, is to support an initiative of the internationaliz

Tourism is one of the fastest growing industries and

contributes a great deal to economies around the world. However, it is inevitable that activities in the development of the tourism industry have caused many problems both in local culture and the environment. What is the role of Engineering, Science, and Commerce to support Sustainable Tourism? This conference has brought researchers, academicians and practitioners to contribute

to the body of knowledge and practical problem solving from the field of engineering, science, and technology that are relevant to support sustainable tourism. Engineering papers focused on the role of renewable energy, information technology, civil and mechanical engineering researches that support sustainable tourism. In the field of science, the papers

discussed achievements of the latest technology in finding environmental ly friendly products. The role of business and accounting systems to support the sustainable tourism was indicated by more than 20 papers. We hope that the proceedings will be an exceptional source for readers who concern to the impacts of the development of tourism on natural resources, consumption patterns,

pollution and social systems.

Physical distancing policy, work from home and prohibition of mobility and crowding caused the transaction of buying and selling batik products is

also reduced. A number of shipments of batik products to cities in a number of provinces in Indonesia are also constrained by expedition travel restrictions. Such conditions force batik workers to make business breakthroughs , both in terms of motifs, designs, raw materials, marketing techniques from offline to online buying and selling, and discounts. The adaptation

effort significantly succeeded in encouraging batik workers to maintain their business. As a majority muslim society, batik workers are also studied related to the role of religious values or teachings in encouraging productivity in the field of batik product making. The perception of religious values for workers can be studied from the Islamic work ethic that they have. The condition of

Islamic coastal culture was also identified as having contributed to the productivity of batik workers. The Islamic work ethic shown by batik workers in Pekalongan City during the pandemic still plays a role and affects their productivity in producing batik. The demand for batik consumption in Pekalongan City during the COVID-19 pandemic remains and has experienced innovation.

Some of the innovations in question are: innovation of batik making techniques; raw material innovation;	price innovation; marketing innovation. Variables of Islamic work ethic and	Islamic work culture in batik workers proved to have a simultaneous effect on work productivity.
