Pivot tables are the most powerful feature in Excel. A basic pivot table will allow you to summarize 500,000 rows of transactional data in 30 seconds with just a few mouse clicks. Business productivity would skyrocket if everyone knew how to use pivot tables. However, only 12% of people using Excel can create a basic pivot table. Of this group only a small percentage actually harness all the power that pivot tables afford them. By the end of the book, users will be pivot table gurus automating pivot tables using VBA, creating pivot tables with external data in OLAP cubes, and even creating dynamic reporting systems so that managers can answer their own queries with a few mouse clicks. Throughout the book there are no-nonsense, step-by-step tutorials and lots of practical examples aimed directly at business users.

Over the course of one winter in 1974, in the coal-mining town of Banning, Pennsylvania, the youngest member of a large and boisterous Eastern European family

gives himself a tall order: to find his mother, who recently disappeared without explanation. Lucas, an only child whose father died several years earlier in a coalmine blast, lives with the legacy of loss. Despite his heavy inheritance, Lucas is still just a thirteen-year-old boy puzzling out the world around him. He shuttles between the homes of his family elders whose old-world ways he can't quite understand. When Zoli, his mother's embittered admirer, takes it upon himself to find his lost love, violence and retribution escalate until no one, especially Lucas, is safe. As he struggles to find his place in this unsettling landscape, Lucas's extended family and close-knit ethnic community circle around him. Set against the collapse of the industry that has sustained the family and the town for generations, *When We Get There* is a startling tale of one family's long winter—and the spring that eventually comes hard on winter's heels.
