 Fragen zum unternehmensübergreifenden Management in und von Wertschöpfungsnetzwerken stehen zunehmend sowohl in der Wissenschaft als auch der Praxis im Mittelpunkt des Interesses. Dabei ist dem Konzept des Supply Chain Managements (SCM) eine zentrale Bedeutung zuzusprechen. Erik Hofmann erweitert das SCM strukturiert um die bisher vernachlässigte strategische und finanzwirtschaftliche Orientierung sowie die Perspektive der wertorientierten

Steuerung. Über die konsequente Einbettung dieser Punkte wird das SCM systematisch in Richtung eines „Interorganizational Operations Managements“ weiterentwickelt.

This book provides a unique comparative and global analysis of the regulation of disclosure in financial (securities) markets. It is written by two authors who represent both the new world (Australia) and the old world (Germany). The

authors present their research in the global business context, with legal and regulatory perspectives including some references from Africa, Asia, the Middle East and South America. After every “boom” and “bust”, legislators pass new disclosure legislation, often in a heated environment fuelled by politics and the media. Little regard is paid to existing regulation or the lessons learned from earlier regulation. The result is the continuing enactment of redundant and overlapping disclosure laws. Since financial markets are often described as markets for information, the failure to ensure disclosure is at the heart of financial services regulation. This book argues that

the solution to the failure of disclosure is a brief, easily understood, principles-based, plain English safety-net amendment to statute law such as “you must keep the financial market fully informed”, a measure that would support effective mandatory continuous disclosure of information to financial markets. This book examines the reasons for disclosure regulation, and how the efficient operation of financial markets is dependent on disclosure. It examines the adequacy of common law and civil law concerning broker/client disclosure, and concludes that industry licensing in itself fails to keep the market informed. While recognizing the failures

of securities commissions to achieve good disclosure in financial markets, it confirms the effectiveness of coregulation of disclosure by a commission with the support of the financial markets (such as the stock exchange). Coregulation builds on financial market self-regulation, and is best described in the words of one-time SEC Chairman William O. Douglas, who, in the 1930s, described it as a shotgun behind the door.

Two strengths distinguish this

textbook from others. One is its presentation of subjects in the contexts where they occur. Students see different perspectives on subjects and learn how complex and dynamic the mergers and acquisitions environment is. The other is its use of current events. Of its 72 case studies, 3/4 are new or have been updated. The implications of Dodd-Frank and US Supreme Court rulings affecting the Sarbanes-Oxley Act, among other regulatory changes, are developed to enhance teaching and learning experiences. Other improvements to the 6th edition have shortened and simplified chapters, increased the numbers and types of pedagogical

supplements, and expanded the international appeal of examples. With a renewed focus on empirical and quantitative examples, the 6th edition continues to demonstrate how people work together on mergers and acquisitions and why the actions of specific individuals have far-reaching implications. Presents an integrated approach to the activities involved in mergers, acquisitions, business alliances, and corporate restructurings. All chapters have been revised, updated, and contain new content, and 14 include more extensive changes. Structural revisions make chapters more streamlined, shorter, and less complex. Case

studies cover a dozen industries, and 75% are new or have been updated. All include discussion questions and answers.
