Goudvis bring you *Strategies That Work: Teaching Comprehension for Understanding, Engagement, and Building Knowledge*. This new edition is organized around three sections: Part I: Starting with the Foundation of Meaning, these chapters provide readers with a solid introduction to reading comprehension instruction, including principles that guide practice, suggestions for text selection, and a review of recent research. Part II: Part II contains lessons to put these principles into practices for all areas of reading comprehension. Part III: This section shows you how to integrate comprehension instruction across the curriculum and the school day, with a focus on science and social studies. In addition, this new version includes updated bibliographies, including the popular *Great Books for Teaching Content*, online resources, and fully revised chapters focusing on digital reading, strategies for integrating comprehension and technology, and comprehension across the curriculum. Harvey and Goudvis tackle close reading, close listening, text complexity, and critical thinking and demonstrate how your students can build knowledge through

thinking-intensive reading and learning. This third edition is a must-have resource for a generation of new teachers – and a welcome refresher for those with dog-eared copies of this timeless guide to reading comprehension.

group of students learning about community helpers to visit her classroom. She shows them the many ways she helps her students learn. Hooray for teachers! "Cartoon-style animated drawings in bright colors introduce diverse characters who will capture children's interest." —School Library Journal "In each book introducing a community-benefiting career, schoolchildren meet one adult to learn about his or her job; information includes the training required to become a firefighter, doctor, etc., daily routines, and primary responsibilities. The content is inclusive and up-to-date but delivered through vapid stories. Peppy computer-generated cartoons are amateur." - The Horn Book Guide Free downloadable series teaching guide available.
