"Historical research
and writing on the
native peoples of
Mesoamerica have
been transformed over
the past two decades
by the increasing

use—sometimes including discovery—of native language documents, prepared by native communities and individuals. This has been an especially rich resource for writing the colonial history of Nahua, Maya, and Mixtec peoples. The Nahua peoples in colonial Mesoamerica continued to write and paint their histories and lives, often without any mention of the foreigners in their midst. Their accounts took the form of annals, chronicles, religious treatises, tribute accounts, theatre pieces, and wills. Thousand of documents were produced, almost all of which served to preserve Nahua ways of doing things. In this path-breaking volume,

Susan Schroeder and her colleagues 'unpick' this native cultural treasury and historiography, and thereby reveal the indigenous perspective on the Spaniards' invasion of America through what they themselves recorded." David Cahill, University of New South Wales, series editor of *First Nations and the Colonial Encounter* The Spaniards typically portrayed the conquest and fall of Mexico Tenochtitlan as Armageddon, while native peoples in colonial Mesoamerica continued to write and paint their histories and lives often without any mention of the foreigners in their midst. Their accounts took the, form of annals, chronicles, religious treatises,

tribute accounts, theatre pieces, and wills. Thousand of documents were produced, almost all of which served to preserve indigenous ways of doing things. But what provoked record keeping on such a grand scale? At what point did precontact sacred writing become utilitarian and quotidian? Were their texts documentaries, a form of boosterism, even ingenious intellectualism, or were they ultimately a literature of ruin? This volume seeks to address key aspects of indigenous perspectives of the conquest and Spanish colonialism by examining what they themselves recorded and why they did so. Susan Schroeder is France Vinton Scholes

Professor of Colonial Latin American History at Tulane University. She is the author of numerous books, book chapters, and articles about intellectualism, religion, resistance, society, politics, and women in colonial Nahua Mesoamerica. She is the co-editor and co-translator (with Arthur J.O. Anderson) of the Codex Chimalpahin and general editor of the Series Chimalpahin.

Cambridge University Press

This study of the book of Daniel examines the ideology of divine and human rule in Daniel's historical resumes or reviews found in chaps 2, 7, 8, 9, 10-12. It seeks to uncover the concerns that motivate the resumes and the

strategies the resumes use to resolve cognitive and experiential dissonance. Loose Ends argues that the source of dissonance in Daniel stems not from failed prophecies (as has been commonly argued), nor do the visions function as symbolic theodicies to address a contradiction between divine power and divine goodness in the face evil. The study proposes, instead, that the historical resumes address profound contradictions concerning divine power and presence in the face of Hellenistic/Seleucid rule. These contradictions reach a crisis point in Daniel 8's depiction of the desecration of the temple (typically Daniel 8 is seen as a

poor replica of the triumphant vision of divine power found in Daniel 7). This crisis of divine absence is addressed both within the vision of chap 8 itself and then in the following visions of chaps 9, and 10-12, through the use of narrative (both mythological narrative and historical narrative).

ERCP E-Book Routledge
The incorporation of Green Chemistry is a relatively new phenomenon in the drug discovery discipline, since the scale that chemists operate on in drug discovery is smaller than those of process and manufacturing chemistry. The necessary metrics are more difficult to obtain in drug discovery due to the diversity of

reactions conducted. However, pharmaceutical companies are realizing that incorporation of green chemistry techniques at earlier stages of drug development can speed the development of a drug candidate. Edited by experts who have pioneered green chemistry efforts within their own institutions, this book provides a practical guide for both academic and industrial labs wanting to know where to start with introducing greener approaches for greatest return on investment. The Editors have taken a comprehensive approach to the topic covering the entire drug discovery process from molecule conception, through

synthesis, formulation and toxicology with specific examples and case studies where green chemistry strategies have been implemented. Currently employed as well as emerging techniques for performing greener drug discovery chemistry are addressed as well as cutting-edge topics like biologics discovery. Moreover, important surrounding issues such as intellectual property are included. This book will serve as a practical guide for both academic and industrial chemists who work across the breadth of the drug discovery discipline. Ultimately, readers will learn how to incorporate green chemistry strategies into their everyday

workflow without slowing down their science.

The History Manifesto

Apollo Books

From fundamental principles to advanced subspecialty procedures, Miller's *Anesthesia* covers the full scope of contemporary anesthesia practice. It is the go-to reference for masterful guidance on the technical, scientific, and clinical challenges you face. Now new chapters, new authors, meticulous updates, an increased international presence, and a new full-color design ensure that the 7th edition continues the tradition of excellence that you depend on. Covers the full scope of contemporary anesthesia practice. Offers step-by-step

instructions for patient management and an in-depth analysis of ancillary responsibilities and problems. Incorporates 'Key Points' boxes in every chapter that highlight important concepts. Extends the breadth of international coverage with contributions from prominent anesthesiologists from all over the world, including China, India, and Sweden. Features 30 new authors and 13 new chapters such as Sleep, Memory and Consciousness; Perioperative Cognitive Dysfunction; Ultrasound Guidance for Regional Anesthesia; Anesthesia for Correction of Cardiac Arrhythmias; Anesthesia for Bariatric Surgery; Prehospital Emergency and

Trauma Care; Critical Care Protocols; Neurocritical Care; and Renal Replacement Therapy. Dedicates an entire section to pediatric anesthesia, to help you address the unique needs of pediatric patients. Presents a new full-color design -- complete with more than 1,500 full-color illustrations -- for enhanced visual guidance.

Oxford Handbook of Evolutionary

Psychology Elsevier Health Sciences Taking a look at the setting, form, and content of I and II Chronicles, J. G. McConville describes how these two often neglected books present God's purpose for his people at a crucial time in their history--the period of

restoration after the Exile. Carrying forward brilliantly the pattern established by Barclay's New Testament series, the Daily Study Bible has been extended to cover the entire Old Testament as well. Invaluable for individual devotional study, for group discussion, and for classroom use, the Daily Study Bible provides a useful, reliable, and eminently readable way to discover what the Scriptures were saying then and what God is saying today.

Mapping the resonances, dissonances, and linkages between the thought of Gramsci and Foucault to uncover new tools for socio-political and critical analysis for the twenty-first century, this book reassesses the widely-held view that their work is incompatible. With discussions of Latin American revolutionary politics, indigenous knowledges, technologies of government and the teaching of paediatrics in post-invasion Iraq, complexity theory, medical anthropology and biomedicine, and the role of Islam in the transition to modern society in the Arab world, this interdisciplinary volume presents the latest theoretical

research on different facets of these two thinkers' work, as well as analyses of the specific linkages that exist between them in concrete settings. A rigorous, comparative exploration of the work of two towering figures of the twenty-first century, Gramsci and Foucault: A Reassessment will appeal to scholars and students of social and political theory, political sociology, communication and media studies, and contemporary philosophy. Duke University Press
A call to arms to historians and everyone interested in history in contemporary society. This title is also available as Open Access.

This book provides the basis for a reconceptualization of key features in Southeast Asia's history. Scholars from Europe, America, and Asia examine evolutionary patterns of Europe's and Japan's Southeast Asian empires from the late nineteenth century through World War II, and offer important insights into the specific events of the 1940s, 1950s, and 1960s. In turn, their different perspectives on the political, economic, and cultural currents of the "post-colonial" era - including Southeast Asia's gradual adjustment to globalizing forces - enhance understanding

of the dynamics of the decolonization process. Drawing on new and wide-ranging research in international relations, economics, anthropology, and cultural studies, the book looks at the impact of decolonization and the struggle of the new nation-states with issues such as economic development, cultural development, nation-building, ideology, race, and modernization. The contributors also consider decolonization as a phenomenon within the larger international structure of the Cold War and the post-Cold War eras. Edward the Confessor Scientific e-Resources This volume, a part of the Old Testament Library series, explores

the books of I and II Chronicles. The Old Testament Library provides fresh and authoritative treatments of important aspects of Old Testament study through commentaries and general surveys. The contributors are scholars of international standing.

Over the past 40 years, ERCP has become an effective therapeutic modality with diagnostic purposes that are continually improved.. The 3rd Edition of this practical reference helps you make the most of today's endoscopic retrograde cholangiopancreatography in your practice. You'll find authoritative, highly illustrated guidance on

every aspect of ERCP, including coverage of the latest techniques. Includes new chapters that cover duodenoscope reprocessing; endomicroscopy; EUS-guided endotherapy related to pancreatobiliary disorders; and CT and MRCP related to pancreatobiliary disorders. Contains updated information on radiofrequency ablation for cancer, percutaneous vs. endoscopic drainage, scope cleaning practices, and pancreatic necrosis.

Nahuas and Zapotecs Thinking, Writing, and Painting Spanish Colonialism McGraw-Hill Professional Publishing

An authoritative life of Edward the Confessor, the monarch whose

death sparked the invasion of 1066. One of the last kings of Anglo-Saxon England, Edward the Confessor regained the throne for the House of Wessex and is the only English monarch to have been canonized. Often cast as a reluctant ruler, easily manipulated by his in-laws, he has been blamed for causing the invasion of 1066—the last successful conquest of England by a foreign power. Tom Licence navigates the contemporary webs of political deceit to present a strikingly different Edward. He was a compassionate man and conscientious ruler, whose reign marked an interval of peace and prosperity between periods of strife. More than any monarch before, he

exploited the mystique of royalty to capture the hearts of his subjects. This compelling biography provides a much-needed reassessment of Edward's reign—calling into doubt the legitimacy of his successors and rewriting the ending of Anglo-Saxon England. [I and II Chronicles](#)
Westminster John Knox Press
In *Photographic Returns* Shawn Michelle Smith traces how historical moments of racial crisis come to be known photographically and how the past continues to inhabit, punctuate, and transform the present through the photographic medium in contemporary art. Smith engages photographs by Rashid

Johnson, Sally Mann, Deborah Luster, Lorna Simpson, Jason Lazarus, Carrie Mae Weems, Taryn Simon, and Dawoud Bey, among others. Each of these artists turns to the past—whether by using nineteenth-century techniques to produce images or by re-creating iconic historic photographs—as a way to use history to negotiate the present and to call attention to the unfinished political project of racial justice in the United States. By interrogating their use of photography to recall, revise, and amplify the relationship between racial politics of the past and present, Smith locates a temporal recursivity that is intrinsic to photography, in which

images return to haunt the viewer and prompt reflection on the present and an imagination of a more just future.

Photographic Returns Oxford University Press Blue Wednesday is a suspense-thriller about a serial killer with a unique personality disorder, and Leslie Heidenreich, the senior ranking FBI profiler called in by local police to catch him. Though initially labeled as disconnected robbery-homicides in Chicago, local detective Danny Kowalczyk recognizes a similarity in the smallest of inter-state crime scene details and contacts an old friend at the FBI for help. Its up to Heidenreich and her FBI team to build the killer's personality profile and find the

homicidal pattern before the body count increases. Making an early connection to flight schedules across the U.S., Heidenreich discovers three suspects whose travel paths and common interest in Jazz/Blues, have accidentally crossed. Blue Wednesday describes the making of a not-so-random killer, and the search for the truth about his past. With a growing confidence in his ability to avoid capture, the killer believes that he can fabricate a new identity and a fresh start without any consequences to his deadly actions. The killer's aggressive side also softens after meeting a young woman with a similar troubled past. Blue Wednesday mixes

murder mystery with a cross country chase and an Internet investigation to bring the story to an unpredictable conclusion. Blended with humorous dialog and a touch of computer technology, Blue Wednesday is a casual and enjoyable read all the way through to its final pages.

 In this collection

authors apply spatial analysis to case studies of social, economic, and political dynamics in West, Central, and East Africa during the nineteenth and twentieth century. Also included is a lengthy essay re-interpreting tropical Africa, 1800-1930, using spatial theory. Temporal Asymmetries in Philosophy and Psychology Elsevier Health Sciences Logos 8, and Logos 9 of three volumes, continue the author's Story of Writing God's Book of Life and help explain the ten previous volumes of this author's Logos 1-7 work, each volume of which is able to stand alone as God's Book of Life. This volume focuses on God's Will for humankind, individually and

corporately. Altogether, these volumes say who Jesus is, who God is, what his will is for humankind, who the Holy Spirit is, and what the Bible is. It is crucial to life that we believe in God as Father, Jesus as his Son, the Holy Spirit as the Christ Savior from God; and believe in the truth of the Word of God in his Christian Bible. For the Word of God explains what "belief" is, what "to be saved" is, just how Salvation is effected, what the "take-away" benefits of belief are, and how to find meaning and purpose in life.

A Story of Scientific Method Royal Society of Chemistry Concise, readable, and up to date, Nelson Essentials of Pediatrics, 9th Edition, provides

the must-know information you need in pediatrics from the name you trust. A readable, full-color format; high-yield, targeted chapters; and thorough content updates ensure strong coverage of core knowledge as well as recent advances in the field. This focused resource is ideal for medical students, pediatric residents, PAs, and nurse practitioners in various educational and practice settings, including pediatric residencies, clerkships, and exams. Covers normal childhood growth and development, as well as the diagnosis, management, and prevention of common pediatric diseases and disorders. Contains new coverage of

COVID-19, Multisystem Inflammatory Syndrome in Children (MIS-C), and Vaping-Induced Lung Injury. Includes Pearls for Practitioners at the end of each section, as well as updated immunization schedules and an expanded discussion of trauma-informed care. Features well written, high-yield coverage throughout, following COMSEP curriculum guidelines relevant to your pediatric clerkship or rotation. Uses a full-color format with images and numerous new tables throughout, so you can easily visualize complex information. Provides real-world insights from chapter authors who are also Clerkship Directors, helping you gain the knowledge and skills necessary to

succeed both in caring for patients and in preparing for clerkship or in-service examinations.

With contributions from over 50 experts in the field, this book provides an overview of the latest developments in evolutionary psychology. In addition to well studied areas of investigation, it also includes chapters on the philosophical underpinnings of evolutionary psychology, comparative perspectives from other species, and more.

World History

Cambridge University Press

CONCEPTS OF CHEMICAL DEPENDENCY, Ninth Edition, provides comprehensive coverage and the latest information on a full spectrum of substance use disorders and the compounds commonly abused. Topics include the abuse of and addiction to alcohol; how the active agent in marijuana, THC, affects neural growth and development; the emerging body of evidence suggesting a relationship between marijuana abuse and psychotic disorders; the emerging body of evidence suggesting that marijuana is not as benign as it was thought to be a few years ago; and the abuse of cough syrups. Adding to the book's usefulness and

relevance, Doweiko also covers topics not usually discussed in other substance abuse texts, including abuse of anabolic steroids, inhalants, infectious diseases associated with substance abuse, how the “war on drugs” has actually contributed to the problem of substance abuse/addiction in this country, and the “medical marijuana” debate. This edition includes new information on synthetic marijuana, mephredone, and dextromethorphan,

among other substances; updates reflecting the new DSM-5; and a new chapter on the Biopsychosocial Model of Addiction. Students report that they appreciate the author's balanced approach, which allows them to form their own opinions, in contrast to some books that “preach” that “drugs are bad for you.”
