 How do gender inequalities translate at the top of politics and business? Is the gender gap eliminated for the most influential players in industrial democratic society? Drawing on a sample from no less than 27 countries, a convincing and highly original picture is constructed that informs readers of career paths, values, social networks and gender battles for women elites.

This informed and compelling analysis examines the demographic characteristics, family circumstances and career paths of a group of elite women. The book is noteworthy for being one of the first empirically based studies of women elites.

 of Twentieth-century  
 Female and Male Poets**  
 Routledge  
 A detailed empirical study  
 of how small business

owners finance their enterprises, this volume compares the experiences of women with those of men. The author redresses an over-reliance on subjective and anecdotal evidence of discrimination in this area with a controlled study of forty matched pairs of male/female owners and their strategies for raising finances. The research reveals the importance of adopting a theoretical framework in which the role of gender in the financing of small businesses is considered,

and the practical implications for female entrepreneurs, banks and policy-makers.
