"Guys like us, that work on ranches, are the loneliest guys in the world. They got no family. They don't belong no place ... With us it ain't like that. We got a future ... because I got you to look after me and you got me to look after you." George and Lennie are migrant American laborers --the one alert and protective and the other strong, stupid and potentially dangerous. This is the powerful story of their relationship and their dreams of finding a more stable and less lonely way of life. This edition contains notes to aid student comprehension as well as details on both the author and the period

Während des amerikanischen Bürgerkriegs stirbt Präsident Lincolns geliebter Sohn Willie mit elf Jahren. Laut Zeitungsberichten suchte der trauernde Vater allein das Grabmal auf, um seinen Sohn noch einmal in den Armen zu halten. Bei George Saunders wird daraus eine allumfassende Geschichte über Liebe und Verlust, wie sie origineller, faszinierender und grandioser nicht sein könnte. Im Laufe dieser Nacht, in der Abraham Lincoln von seinem Sohn Abschied nimmt, werden die Gespenster wach, die Geister der Toten auf dem Friedhof, aber auch die der Geschichte und der Literatur, reale wie erfundene, und mischen sich ein. Denn Willie Lincoln befindet sich im Zwischenreich zwischen Diesseits und Jenseits, in tibetischer Tradition Bardo

genannt, und auf dem Friedhof in Georgetown entbrennt ein furioser Streit um die Seele des Jungen, ein vielstimmiger Chor, der in die eine große Frage mündet: Warum lieben wir überhaupt, wenn wir doch wissen, dass alles zu Ende gehen muss?

Too much emotion and insufficient fact. This paradox has long characterized the controversy surrounding animal research. *Of Mice, Models, and Men* is the first exhaustive treatment of all areas--empirical and conceptual--relevant to the use of animals in research. It is also the first study to combine regard for the welfare of laboratory animals with a knowledgeable acceptance of the continuing need for research involving animals. The book has another rare quality. It is virtually devoid of any of the emotional and exaggerated attacks that have characterized many of the other publications in this area. Instead, it presents, in a manner accessible to both sides, all the relevant historical, social, and scientific information required to form an opinion on the subject. The book thus achieves a most difficult goal--that of bridging the gap between researchers using animals and animal welfare advocates, while pointing out the need for a more active program to promote laboratory animal welfare.

Representing the state of the art in multimedia applications and their promise for enhancing early literacy development, this volume broadens the field of reading research by looking beyond print-only experiences to young readers' encounters with multimedia stories on the Internet and DVD. Multimedia storybooks include, in addition to static pictures and written text, features such as oral text, animations, sounds, zooms, and scaffolds designed to help convey meaning. These features are changing how young children read text, and also provide technology-based scaffolds for helping struggling readers. Multimedia and Literacy Development reports experimental research and practices with multimedia stories indicating that new dimensions of media contribute to young children's ability to understand stories and to read texts independently. This is the first synthesis of evidence-based research in this field. Four key themes are highlighted: Understanding the multimedia environment for learning Designing multimedia applications for learning New approaches to storybook reading Multimedia applications in classroom instruction. Written in jargon-free language for an international audience of students in university courses on literacy and information technology, researchers, policymakers, program developers, and media specialists, this volume is essential reading for all professionals interested in early literacy and early interventions.
