Language Teacher Education SAGE
 'Language Teacher Education' is an

introduction to language teacher training and development for teachers and providers in pre-service and in-service programmes. The text outlines the main theories of human learning and applies them to teacher education. Based on a broadly social constructivist perspective, it suggests a framework for planning pre-service and in-service programmes, and is illustrated both with case studies from a range of training situations around the world and appendices

containing teacher education materials. Language Teacher Education is intended to inform readers' practical decisions and to help them build their own theories of teacher learning.

Language Teaching and Learning Routledge Learning to Be Teacher Leaders examines three integrated components of strong pedagogy—assessment, planning, and instruction—within a framework emphasizing the knowledge, skills, and dispositions that can empower teachers to become teacher leaders within their schools. Combining the what, why, and how of teaching, the research-based concepts, presented in a pragmatic format, are relevant

across grade levels, classrooms, and content areas. Designed to support success on national licensure assessments, this text brings together in one place the important features of learning to be an effective teacher, and becoming a teacher leader who continues to grow and develop within the profession. Taking a student-centered approach to instruction, it also recognizes the outside factors that can challenge this approach and provides strategies

for coping with them. Using this book as a guide and resource, pre-service and beginning teachers will focus on the most important factors in teaching, resulting in strengthening their pedagogy and developing a language that helps them move forward in terms of agency and advocacy. A Companion Website provides additional resources for instructors and students. Language Teacher Education in a Multilingual Context Hachette UK The author examines who

language teacher educators are in the field of language teaching and learning. This includes a description of the different types of language teacher educators working in a range of professional and institutional contexts, an analysis of the reflections of a group of experienced English teacher educators working in Colombia and enrolled in a doctoral program to continue their professional development, and an exposition of the work that language teacher educators do,

particularly in the domains of pedagogy, research, and service and leadership (institutional and community). All of this is done with the aim of understanding the identities that language teacher educators negotiate and are ascribed in their working contexts. The author emphasizes the need for research to pay attention to the lives and work of language teacher educators, and offers forty research questions as an indication of possible future research directions.

English Language Teacher Preparation in Asia
Routledge

Over the last two decades, Chile has been driven by an economic imperative to build the capability of citizens to be competent in the English language, resulting in a high demand for teachers of English. As a consequence, teacher

education programs have modified their curricula to meet the challenges of educating teachers of English as a global language. This book explores EFL teacher education in order to further understand the nature of teacher learning in second language education environments, examining the varying motives, actions and mediating tools that shaped how a cohort of pre-service teachers learnt to teach EFL in Chile. Framed by a cultural historical activity

theory (CHAT) perspective, chapters use key qualitative research to determine how specific factors can help and hinder the effective preparation of teachers, illuminating contradictory dynamics between local and national policies, teacher education programs, and pre-service views and classroom realities. The book makes an important contribution to the growing debate surrounding the design of EFL teacher education policy, curriculum and learning strategies,

emphasising the importance of engaging pre-service teachers in learning to teach EFL, and the interrelated factors that shape this learning. English Language Teacher Education in Chile will be of key interest to academics, researchers and postgraduate students in the fields of teacher education, curriculum studies, and English language teaching (ESL/EFL), as well as policy makers, TESOL organisations, and those interested in applying a CHAT perspective to

language teaching and learning.

Reflections on Language Teacher Identity Research

Routledge

To date, the majority of work in language learning psychology has focused on the learner. In contrast, relatively little attention has been paid to teacher psychology. This volume seeks to redress the imbalance by bringing together various strands of research into the psychology of language teachers. It consists of 19 contributions on well-

established areas of teacher psychology, as well as areas that have only recently begun to be explored. This original collection, which covers a multitude of theoretical and methodological perspectives, makes a significant contribution to the emerging field of language teacher psychology as a domain of inquiry within language education.

On Being a Language Teacher Routledge

`Extremely comprehensive and well written in terms of style -

accessible to the reader, but intelligent and expressing some fairly subtle concepts. Would that more ELT practitioners could do the same!... Certainly a good read for those thinking about and also those engaged in initial training - or even post initial training stage' - Jenny Pugsley, Head of TESOL, Trinity College London 'It's essential reading whether you are simply curious about what is involved in training in ELT, need advice on choosing the right course, have already

enrolled and want to make the most of your course, or are a new teacher just starting out. It's a book I wish I'd had when I was starting out in my ELT career, and that I wish had been available to many of the course participants I have tutored' - Lyn Strutt, ELT author and Chair of the British Council Families Association Each year, thousands of people all over the world take one of the hundreds of available short pre-service courses that lead to the award of a certificate in English

Language Teaching (ELT) or Teaching English to Speakers of Other Languages (TESOL). Caroline Brandt's book is an invaluable guide to anyone thinking of enrolling on one of these courses. Theory and Practice in Second Language Teacher Identity

Cengage Learning
A Book for Every Teacher: Teaching English Language Learners is a unique and compressive text written for mainstream classroom

teachers. The passion for writing this book comes from our working experiences with the K-12 teachers in four school districts through our ELL Center professional development program. Through this program, we provide professional training through our federally funded research and service projects. The purpose of our professional training is to prepare general education teachers to work effectively with English language learners (ELLs). While working with the

teachers on a daily basis, we know the immediate needs of the teachers. This motivated us to embark this book project. In recent years, the ELL school population has the highest increase among school populations. As the NEA data indicates, providing ELL students with high quality services and programs is an important investment in America's future (NEA, 2013). This book is our investment in helping teachers to meet their challenges and provide useful information and

strategies for teaching ELLs. The book is designed with K-12 teachers in mind. It is best used by teachers who have or will have ELLs in their classrooms and who seek information and strategies to better work with and serve their ELLs to achieve academic success. With this design, teachers can use the book as a text or reference tool. This book can also be adopted as text materials for professional training. Teachers are the most important factor for ELLs' academic success.

The English Language Teacher in Global Civil Society Corwin Press Bringing together a comprehensive range of extended research-based chapters, English Language Teacher Preparation in Asia provides comprehensive insight into policy, research, and practical aspects of teacher preparation for English teachers at pre-service level across multiple contexts in Asia. Chapters consider how pre-service teachers are best prepared for the diverse contexts in which English is learnt and taught in settings throughout Asia and draw on in-depth research studies to provide rich, fully contextualised coverage of aspects of

teacher preparation including curriculum design, programme development, policy, professional learning communities, assessment education, and teaching practicum. A timely contribution to the field of teacher preparation, this text will be an invaluable resource for teacher educators, pre-service teachers and academics involved in the preparation of English teachers in Asia. *The Routledge Handbook of English Language Teacher Education*

Springer Science & Business Media
This practical resource book showcases both the theory and practical application for teacher educators in diverse contexts bringing a global Englishes perspective into their teacher education courses, both at pre- and in-service levels. The recent Global Englishes paradigm serves as a promising response to the complexity of identity, interaction, use, and instruction surrounding the English language. It is increasingly important to

enhance teachers' knowledge base—their specialized knowledge, skills, competencies, and commitments—vis-à-vis the changing needs of English Language Teaching. The chapters in the book provide accessible theoretical orientation to different aspects of the Global Englishes paradigm, from instructional materials to language assessment, and are complemented by a range of practical applications that promote teacher development. The volume is recommended

as a viable professional development resource for teacher educators who are looking for activities and resources in preparing teachers for diverse teaching contexts, realities, affordances, and constraints.
