Merger Control Regimes in Emerging Economies Springer Science & Business Media

A presente obra identifica que o alto custo do crédito no Brasil possui como causa relevante, embora não a única, a impressionante taxa de litígios submetidos à tutela do Poder Judiciário, envolvendo instituições do Sistema Financeiro Nacional e os consumidores dos seus produtos e serviços. Estas lides têm solução demorada e imprevisível, o que apenas essencialmente o titular do bom direito e favorece o oportunista. A partir desse diagnóstico, o autor faz um estudo que aborda Economia, Regulação e de Direito comparado e busca construir uma solução regulatória que, com as devidas adequações à realidade brasileira, incentive os litigantes a buscarem uma alternativa extrajudicial para a resolução célere e eficiente dessa espécie de conflitos. A opção sugerida é a do Ombudsman bancário setorial, que pode ser motivo de alívio para instituições financeiras, consumidores e, porque não, juízes.

In the 1950s–80s, Brazil built one of the most advanced industrial networks among the "developing" countries, initially concentrated in the state of São Paulo. But from the 1980s, decentralization of industry spread to other states reducing São Paulo's relative importance in the country's industrial product. This volume draws on social, economic, and demographic data to document the accelerated industrialization of the state and its subsequent shift to a service economy amidst worsening social and economic inequality. Through its cultural institutions, universities, banking, and corporate sectors, the municipality of São Paulo would become a world metropolis. At the same time, given its rapid growth from 2 million to 12 million residents in this period, São Paulo dealt with problems of distribution, housing, and governance. This significant

volume elucidates these and other trends during the late twentieth and early twenty-first centuries, and will be an invaluable reference for scholars of history, policy, and the economy in Latin America.

The updated edition of a widely used textbook that covers fundamental features of bonds, analytical techniques, and portfolio strategy. This new edition of a widely used textbook covers types of bonds and their key features, analytical techniques for valuing bonds and quantifying their exposure to changes in interest rates, and portfolio strategies for achieving a client's objectives. It includes real-world examples and practical applications of principles as provided by third-party commercial vendors. This tenth edition has been substantially updated, with two new chapters covering the theory and history of interest rates and the issues associated with bond trading. Although all chapters have been updated, particularly those covering structured products, the chapters on international bonds and managing a corporate bond portfolio have been completely revised. The book covers the basic analytical framework necessary to understand the pricing of bonds and their investment characteristics; sectors of the debt market, including Treasury

securities, corporate bonds, municipal bonds, and structured products (residential and commercial mortgage-backed securities and asset-backed securities); collective investment vehicles; methodologies for valuing bonds and derivatives; corporate bond credit risk; portfolio management, including the fundamental and quantitative approaches; and instruments that can be used to control portfolio risk.

When emerging economies draft competition law and begin to enforce it, they usually draw on the EU and US competition law systems. However, significant country-specific legal and practical variations tend to arise quickly, making it imperative for international business lawyers to acquire more than a passing knowledge of competition legislation and relevant case law in these countries. Now for the first time a thoroughly researched book provides an in-depth empirical analysis of the legal problems raised for competition, and especially for merger control and its enforcement, in emerging economies, using a case study approach in the Brazilian and Argentinean contexts to reveal paradigmatic trends. Brazil and Argentina are chosen not only because they are among the major trading jurisdictions in the developing world, but also because they have each established a track record of over a decade in formulating and enforcing a system of merger control. The author describes and analyses all Brazilian and Argentinean legislation in the field of competition law, as well as the main merger decisions adopted by the competition authorities and the judgements held by the courts of these countries. The book thoroughly covers the system of competition law currently enforced in each country, as well as the main innovations of proposed new competition law currently pending in Brazil. In addition, the author draws on field interviews with competition lawyers and officers of competition authorities conducted between April and July 2008 in Buenos Aires, Brasilia, and São Paulo. The analysis considers such issues as the following: y impact of M & As on the level of competition in the markets of developing countries; y enforcement of competition law and the judiciary; y criteria for notification of economic concentrations; y application of econometric tests to define the relevant market and the degree of market concentration.

This open access handbook provides the first comprehensive overview of biometrics exploiting the shape of human blood vessels for biometric recognition, i.e. vascular biometrics, including finger vein recognition, hand/palm vein recognition, retina recognition, and sclera recognition. After an introductory chapter summarizing the state of the art in and availability of commercial systems and open datasets/open source software, individual chapters focus on specific aspects of one of the biometric modalities, including questions of usability, security, and privacy. The book features contributions from both academia and major industrial manufacturers.

This book adopts the proposition that it is possible to the customs to be sources of contractual obligations. To support that premise, it was necessary to seek jurisprudential (arbitration and litigation) and comparative basis. Even more, due to contract law internationalization, customary international sources should be subject of domestic treatment, as they provide contractual obligations as well as they work as contractual interpretation tool. However, one can't neglect the need to control the customary content. In detailed terms, then, we can say that the role reserved for the custom as contractual law rules source has always been residual in Brazilian law.

Accompanying the modern European experience, doctrine and Brazilian legislation emphasize the secondary, when not merely interpretive, role of the contractual custom. In turn, Brazilian case law wasn't able to give general treatment to contractual custom. Moreover, the process of reducing distances and cultural, social and economic approximation, usually called globalization, influenced the contracts through the incorporation of a number of solutions brought from the international trade practice. Although they might be justified by the age-old principle of freedom, somehow these international "uses" insinuate themselves into Brazil to the point of requiring that the Brazilian Courts themselves to give them treatment and shelter. On one side, if you deny the existence of a creative normative role in contractual custom by another, albeit indirect, is recognized not only their existence but the possibility of foreign origin. This paradoxical treatment reflects, to some extent, another consequence: the Brazilian contract law is in the process of internationalization. Here, then, a new confrontation is announced: a broad creative freedom (a tributary of the so-called Lex mercatoria) and the foreign act incorporation control (public policy). Unlike before, however, no simplistic answer would be feasible, particularly because of the complexity of contemporary and regulatory Brazilian contract law.

When Brazilians are far from home they dream of Bahia - of its powder-fine beaches and reef-ringed islands; of waterfalls in the Diamond mountains of the arid sertão, of cobbled streets and pastel-painted houses in Salvador. They long for capoeira and the rich spicy smell of Bahian cooking; the rhythms of axé and the colour of the world's largest carnival. "Você tem que ir." they say. "You must go." Bradt's Bahia shows the way to the World Heritage sites of Salvador (which has the largest collection of colonial baroque in the world) and the Discovery Coast rainforests; to the best of the beaches around the resorts of Itacaré, Porto Seguro and Trancoso; and beyond to the unspoilt island of Boipeba; the northern Linha Verde near Mangue Seco; and the little-explored coast of Sergipe and Alagoas states to Bahia's north.
