Learning the note names on the guitar fretboard is a compulsory step in every guitarist's training. This means instantly recognising the name of a note on any string & fret. It also means taking this one step further by instantly knowing what pitch on the music staff that note maps to, and vice versa. "Guitar Note Finder" accompanies you in this training by breaking up the first 12 frets of the guitar neck into three piecemeal sections and drilling each section, one note at a time, in a visual question-answer format. One page shows a note on the fretboard and the following page shows its name and corresponding pitch on the music staff. There are two notes per page. All necessary reference diagrams featuring note name and pitch information are provided upfront. This book is for standard tuning E A D G B E. By isolating each note, this little book will help you learn the fretboard faster and facilitate your sight-reading on guitar. More information at: - pelemeleworks.com -
