This story of deep wounding and subsequent healing bridges lifetimes. Evelyn is born into a long line of Dutch Barons, who through their greed to keep their land, marry their cousins, rarifying the genetics to produce genius and madness. Evelyn is gifted with both an excess of grey matter and a very sensitive physiology and nervous system. The uprooting of her family through immigration to Canada, and the subsequent poverty, and loss further take their toll, though the family meets hardship with courage and creativity. The strain of failing health, learning problems, and gender complexities culminate in a near death experience. Surprisingly after nearly dying, Evelyn begins to recuperate. Finishing high school, she proceeds directly into Pre-Meds and after mostly single-parenting a baby through Medical school, she graduates. Following her heart to be with a woman, results in the loss of her son. This heartbreak is multiplied after she begins to work as a physician, and realizes that the woman she loves does not want to live. Evelyn invites you to follow her through a painful transformation, causing a spiritual opening that births the artist in her. This opening also leads her to remember past lives, that allow her to see the workings of cause and effect, while encouraging her to move forward revitalized into a whole new life.

This book comprehensively surveys the colorful history of mass hysteria and kindred phenomena in schools, documenting outbreaks of demonic possession during witchcraft scares, to modern incidents of collapsing bands, itching frenzies, ghost panics and mystery illnesses. Strange behaviors and illnesses in students are examined through the centuries. Possessed children went into trance states and began to bark like dogs in 16th and 17th century Holland; an epidemic of twitching, trembling and blackout spells swept through European schools during the latter 1800s; an outbreak of Tourette's-like symptoms struck schoolgirls in western New York in 2011-12. In addition to the US and Europe, separate chapters detail accounts from Asia, Africa, Latin America and Oceania. A variety of theories to explain outbreaks are examined.

Learn Inner Nurturing and End Emotional Eating If you regularly eat when you're not truly hungry, choose unhealthy comfort foods, or eat beyond fullness, something is out of balance. Recent advances in brain science have uncovered the crucial role that our early social and emotional environment plays in the development of imbalanced eating patterns. When we do not receive consistent and sufficient emotional nurturance during our early years, we are at greater risk of seeking it from external sources, such as food. Despite logical arguments, we have difficulty modifying our behavior because we are under the influence of an emotionally dominant part of the brain. The good news is that the brain can be rewired for optimal emotional health. When *Food Is Comfort* presents a breakthrough mindfulness practice called Inner Nurturing, a comprehensive, step-by-step program developed by an author who was herself an emotional eater. You'll learn how to nurture yourself with the loving-kindness you crave and handle stressors more easily so that you can stop turning to food for comfort. Improved health and self-esteem, more energy, and weight loss will naturally follow.

Können Träume glücklich machen? Eine Mutter zeigt ihrer Tochter den Weg, ihre wahren Träume zu verwirklichen. Ein berührender Roman über die eine Liebe, die uns ein Leben lang nicht verlässt. Wer verscheucht die Monster aus unseren Alpträumen? Wer tröstet uns bei Liebeskummer? Und wer kennt uns besser, als wir uns selber kennen? Als Brett 14 Jahre alt war, hatte sie noch große Pläne für ihr Leben, festgehalten auf einer Liste mit Lebenszielen. Heute, mit 34 Jahren, ist die Liste vergessen und Brett mit dem zufrieden, was sie hat: einen Freund, einen Job, eine schicke Wohnung. Doch als ihre Mutter Elizabeth stirbt, taucht die Liste wieder auf: Aus dem Mülleimer gefischt, hat ihre Mutter die Liste aufgehoben, und deren Erfüllung zur Bedingung gemacht, damit Brett ihr Erbe erhält - und zwar innerhalb von 12 Monaten. Aber Brett ist nicht mehr das Mädchen von damals. Ein Baby bekommen? Das hat sie schon lange ad acta gelegt. Ein Pferd kaufen? In ihrer Wohnung sind nicht mal Haustiere erlaubt. Eine gute Beziehung zu ihrem Vater aufbauen? Ha - der ist seit sieben Jahren tot. Sich verlieben? Die einzig wahre, große Liebe gibt es doch nur im Film. Um sie bei der Erfüllung ihrer Ziele zu unterstützen, hat ihre Mutter Brett mehrere Briefe hinterlassen. Wütend, enttäuscht und verletzt liest Brett den ersten Brief - und ist überwältigt von der liebevollen und fürsorglichen Nachricht ihrer Mutter, die gespürt hat, dass Brett in ihrem Leben nicht glücklich ist. Die Briefe ihrer Mutter rufen Brett dazu auf, ihre Träume nicht aufzugeben und ihr Leben in die Hand zu nehmen - denn nur sie selbst kann es ändern ... Kann Elizabeth ihrer Tochter dabei helfen, sich selbst wiederzufinden?

The Guiding symptoms of our materia medica. v. 7, 1888 Elsevier Health Sciences

Ist die Welt real - oder lediglich ein Konstrukt unseres Gehirns? Und wer ist eigentlich „Ich“? In Ihrem Kopf gibt es eine erstaunliche Vorrichtung, die Ihnen jede Menge Arbeit erspart - und die darin effizienter ist als die modernsten High-Tech-Computer: Ihr Gehirn. Tag für Tag befreit es Sie von Routineaufgaben wie der bewussten Wahrnehmung der Objekte und Geschehnisse um Sie herum sowie der Orientierung und Bewegung in der Welt, so dass Sie sich auf die wirklich wichtigen Dinge im Leben konzentrieren können: Freundschaften zu schließen, Beziehungen zu pflegen und Ideen auszutauschen. Wie sehr all das, was wir wahrnehmen, ein von unserem Gehirn geschaffenes Modell der Welt ist, wird uns kaum je bewusst. Doch noch überraschender - und vielleicht beunruhigender - ist die Schlussfolgerung, dass auch das „Ich“, das sich in die soziale Welt einfügt, ein Konstrukt unseres Gehirns ist. Indem das Gehirn es uns ermöglicht, eigene Vorstellungen mit anderen Menschen zu teilen, vermögen wir gemeinsam Größeres zu schaffen, als es einer von uns alleine könnte. Wie unser Gehirn dieses Kunststück vollbringt, beschreibt dieses Buch. Der britische Kognitionsforscher Chris Frith beschäftigt sich mit dem vielleicht größten Rätsel überhaupt, nämlich dem Entstehen und den Eigenschaften unserer Erlebniswelt - der einzigen Welt, die uns direkt zugänglich ist. Er behandelt dieses schwierige Thema in einer souveränen, sympathischen und sehr verständlichen Weise, immer nahe an den psychologischen und neurobiologischen Forschungsergebnissen, von denen einige bedeutende aus seinem Labor stammen. Er verzichtet dabei bewusst auf jeden bombastischen philosophischen Aufwand. Das macht das Buch unbedingt lesenswert. Gerhard Roth Frith gelingt das Kunststück, die enorme Bandbreite der kognitiven Neurowissenschaften nicht nur anhand vieler konkreter Beispiele darzustellen, sondern auch die Bedeutung ihrer Ergebnisse auszuloten ... eine Aufforderung, dem Augenschein zu misstrauen. Es gibt wenige Bücher, die diesen Appell ähnlich anschaulich und fundiert mit Leben füllen, gewürzt mit einer guten Portion Humor. Gehirn und Geist

Unser Gehirn ist nicht - wie lange angenommen - eine unveränderliche Hardware. Es kann sich vielmehr auf verblüffende Weise umgestalten und sogar selbst reparieren. Norman Doidge verbindet faszinierende Einblicke in die neueste Forschung mit aufsehenerregenden Beispielen aus der Praxis: etwa eine Frau, deren eine Hirnhälfte die Funktionen eines ganzen Gehirns übernahm. Oder der Mann, dessen Gehirn nach einem Schlaganfall die Hirnströme in gesunde Hirnregionen »umleitet« und seinem gelähmten Arm die Bewegungsfähigkeit zurückgibt. All dies ermöglicht unser Gehirn, das stärker und anpassungsfähiger ist, als wir je dachten.

The Familiar, Volume 3 Arkana

Bigger Thomas, ein junger Schwarzer, fühlt sich gefangen in einem Leben in Armut und Perspektivlosigkeit. Sein einziges Ventil ist Gewalt. Er war bereits in der Besserungsanstalt, ein weiteres Vergehen würde für ihn Gefängnis bedeuten. Doch dann gibt der wohlhabende Mr Dalton dem jungen Mann eine Chance und stellt ihn als Chauffeur an. Als Bigger die Tochter des Hauses spätnachts und betrunken auf ihr Zimmer bringt und ihre blinde Mutter, von dem Lärm geweckt, den Raum betritt, versucht Bigger aus Angst vor falschen Verdächtigungen, das Mädchen mit einem Kissen zum Schweigen zu bringen, und erstickt sie dabei. Davon überzeugt, dass man ihm Absicht unterstellen wird, verstrickt er sich in Lügen und weitere Gewalt, bis er schließlich gefasst und des Mordes und der Vergewaltigung angeklagt wird. Das ganze Land stellt sich gegen ihn, nur der Anwalt Max kämpft um Verständnis für Biggers Taten. Der literarische Durchbruch von Richard Wright war gleichzeitig der erste Bestseller eines afroamerikanischen Autors und liegt nun zum ersten Mal in vollständiger deutscher Übersetzung vor.
