CCH Accounting for Financial Assets and Liabilities: Sales, Transfers, and Extinguishments

John Wiley & Sons
CCH Accounting for
Business
Combinations,
Goodwill, and Other
Intangible Assets offers
practical guidance on
accounting for
business combinations,
as well as intangible
assets and goodwill
under both U.S. and
international
accounting standards.
It covers a broad range
of transactions,

including: acquisitions of businesses by acquiring assets or stock; acquisitions of minority interests; leveraged buyouts; reverse acquisitions; rollup transactions; and transfers and exchanges between companies under common control. This comprehensive resource draws on a variety of accounting literature to amplify the text of FASB Statements No. 141, Business Combinations, and No. 142, Goodwill and Other Intangible Assets, for U.S. standards, and International Financial Reporting Standard 3, Business Combinations, and International Accounting Standard 38, Intangible Assets, for international

standards, as issued by the International Accounting Standards Board. It provides professionals with a practical reference resource by selectively combining information from the official text of these statements, along with information drawn from the rules and releases of the SEC, consensuses of the FASBs Emerging Issues Task Force and the International Financial Reporting Committee, and lessons learned from leading accounting practitioners.

Uncovers sources from the parish pauper to the gentlewoman to consider relationships with clothing across the social hierarchy in the long eighteenth

century. Descriptions of women's clothing increasingly circulated across textual genres and beyond in eighteenth-century England. This book explores the significance of these descriptions across a range of sources including wills, newspapers, accounts, court records, and the records of the old poor law. Attention has rested on women literate and wealthy enough to leave behind textual or material traces, but this book ranges from the parish pauper to the gentlewoman to consider descriptive languages, rhetorical strategies, and relationships with clothing across the social hierarchy. It explores how women described their own

clothing, but also looks at how it was described by overseers, family members, retailers, and even strangers. It shows that we must look beyond isolated descriptions to how, why, and who was describing clothing to understand its role. Chapters uncover themes of material obligation, expectation, and entitlement. This book also contributes to our understanding of the material literacy of eighteenth-century consumers. It traces the role of textual description in this dissemination of knowledge about clothing, but also alerts us to what was happening beyond the written word, drawing attention to the communication of multisensory information. Above all,

it demonstrates that there remains much still to be unpicked from textual sources. ncover themes of material obligation, expectation, and entitlement. Principles of Cost Accounting Homewood, Ill., Irwin

Cisco routers are everywhere that networks are. They come in all sizes, from inexpensive units for homes and small offices to equipment costing well over \$100,000 and capable of routing at gigabit speeds. A fixture in today's networks, Cisco claims roughly 70% of the router market, producing high-end switches, hubs, and other network hardware. One unifying thread runs through the product line:

virtually all of Cisco's products run the Internetwork Operating System, or IOS. If you work with Cisco routers, it's likely that you deal with Cisco's IOS software--an extremely powerful and complex operating system, with an equally complex configuration language. With a cryptic command-line interface and thousands of commands--some of which mean different things in different situations--it doesn't have a reputation for being user-friendly. Fortunately, there's help. This second edition of Cisco IOS in a Nutshell consolidates the most important commands and features of IOS into a single, well-organized volume that you'll find

refreshingly user-friendly. This handy, two-part reference covers IOS configuration for the TCP/IP protocol family. The first section includes chapters on the user interface, configuring lines and interfaces, access lists, routing protocols, and dial-on-demand routing and security. A brief, example-filled tutorial shows you how to accomplish common tasks. The second part is a classic O'Reilly quick reference to all the commands for working with TCP/IP and the lower-level protocols on which it relies. Brief descriptions and lists of options help you zero in on the commands you for the task at hand. Updated to cover Cisco IOS Software Major Release 12.3,

this second edition includes lots of examples of the most common configuration steps for the routers themselves. It's a timely guide that any network administrator will come to rely on.

CCH Accounting for Leases analyzes FASB Statement No. 13, Accounting for Leases, which was released in November 1976, and the numerous

successive Interpretations, Technical Bulletins, and Emerging Issue Task Force consensus issues that have been issued since then. Since Statement's 13 issuance, the FASB has amended the Statement 18 times, issued 6 Interpretations, and 12 Technical Bulletins. Further, the EITF has addressed leasing transactions in more than 30 different Issues (excluding issues related to consolidations of special purpose entities). This publication delves into the complex nature of the criteria set through defining a lease and determining whether it should be accounted for as a sale/purchase or as an operating lease. CCH Accounting

for Leases also includes various interpretations and commentary related to investment tax credits (ITC) in the event ITC is reinstated in the future.

This publication focuses on the critical methods that can be used to dramatically improve the fiscal closing process. The Record to Report (R2R) or Fiscal Closing Process is at the core of the controllership function. The process includes transaction processing, internal and external reporting, and the internal controls—the people, processes, and technology—that constitute the corporate organizational hierarchy. CFOs, controllers, and

corporate finance departments require timely, accurate, and consistent data to make appropriate operational and strategic decisions and fulfill statutory, regulatory, and compliance requirements with accurate and timely data. The Fast Close Toolkit offers both strategic and tactical suggestions that can significantly improve the fiscal closing process and provides guidance on new legislation requirements, systems and best practice processes. Checklists, templates, process narratives, and sample policies are provided for every component of the fiscal close. Investors and shareholders expect fast and easy access to

the data created by current business activities in the information-driven digital age. The Fast Close Toolkit provides the necessary tools and expert advice to improve the fiscal closing process. Authoritative and up to date, this book: Identifies the bottlenecks that can impact the and improve the fiscal close process and provides best practices to help alleviate these challenges Defines the Record to Report (R2R) and recommends the roles and responsibilities for fiscal close processes flow Offers the internal controls to use for the end-to-end fiscal close process Describes approaches for risk management, R2R, and fiscal close

benchmarking
Identifies KPIs for all aspects of the R2R process Provides the mechanism for developing a financial close scorecard
Recommends leading practices for both external and internal reporting Provides guidance on how strategic planning, the budget and forecast processes can be streamlined to enhance the fiscal

close and internal reporting results
Written by a respected expert on internal controls and the fiscal closing process, The Fast Close Toolkit is a valuable source of information for professionals involved in controllership and have responsibility for the fiscal close.
