Theory and Practice Oxford University Press

Traumatic brain injury (TBI) is a complex condition for which limited research exists. The recent conflicts in Iraq and Afghanistan have resulted in numerous service members returning home after sustaining TBI, and healthcare providers scrambling to find resources on how to treat them. This toolkit is a comprehensive source of inventories and therapy options for treating service members with mild TBI. All aspects of mild TBI are covered, including vestibular disorders, vision impairment, balance issues, posttraumatic headache, temporomandibular dysfunction, cognition, and fitness, among others. With easy-to-follow treatment options and evaluation instruments, this toolkit is a one-stop resource for clinicians and therapists working with patients with mild TBI.

Documentation for Rehabilitation - E-Book Springer

Presenting the new edition of the text that delivers the most widely-used and developed

conceptual model in occupational therapy. Beautifully redesigned and fully revised, the Third Edition of A Model of Human Occupation (MOHO) delivers the latest in human occupation research and application to practice. New to this edition: a reader-friendly format with second color and additional illustrations and anecdotes; more case examples for integrating the model into practice; a discussion of the therapy process and how change occurs; language linked to UT and ICIDH-2 terminology; a research chapter; and numerous research references highlighting the growing body of evidence supporting MOHO.

A Guide to Clinical Decision Making in Physical Therapy Springer Publishing Company

Complete and accurate documentation is one of the most important skills for a physical therapist assistant to develop and use effectively. The new Second Edition of Documentation Basics: A Guide for the Physical Therapist Assistant continues the path of teaching the student and clinician documentation from A to Z. Mia Erickson and Rebecca McKnight have updated this Second Edition to reflect changes of the American Physical Therapy Association and the ever-evolving profession. Updated inside Documentation Basics: A Guide for the Physical Therapist Assistant, Second Edition: * The discussion on integrating disablement into documentation * The discussion on how a PTA can

show medical necessity and need for skilled care * The discussion on using documentation to communicate with other providers * Writing the assessment and plan to coincide with the initial documentation * Sample notes completed on forms * More examples and practice, including physical agents, school-based services, pediatrics, traumatic brain injury, spinal cord injury, and interventions consistent with the Guide to Physical Therapist Practice * Medicare reimbursement in different settings * The importance of consistent, reliable, and valid measurements * How to improve communication and consistency between documentation by the PT & the PTA The discussion on disablement has also been updated, shifting away from the Nagi Model toward the International Classification of Functioning, Disability, and Health (ICF). In addition, the PTA Normative Model has been integrated throughout to include more information on clinical decision making. New inside Documentation Basics: A Guide for the Physical Therapist Assistant, Second Edition: * Navigating the PT plan of care...A step-by-step model for PTAs to use as they navigate the initial PT documentation and plan of care * How the PTA uses the PT goals from the initial examination and evaluation Positive and negative aspects of using electronic documentation and a discussion on integrating SOAP notes and the problem-oriented medical record into electronic

documentation * Sample notes and discussion of documentation in school-based settings, early intervention, skilled nursing settings, in-patient rehabilitation, and direct access * Medicare Parts C and D * Cash-based services and pro bono services Instructors in educational settings can visit www.efacultyounge.com for additional material to be used for teaching in the classroom.

Documentation Basics: A Guide for the Physical Therapist Assistant, Second Edition is the perfect guide for all physical therapist assistant students and clinicians who want to update and refine their knowledge and skills in documentation.

The Comprehensive Resource on Geriatric Health and Social Care Springer Publishing Company Up to 35% of adults suffer from chronic pain, and a substantial number of these patients are admitted to hospitals every year. A major concern of these patients is whether the pain will be adequately controlled during hospitalization. These patients are more likely to have poor pain control and may experience an exacerbation of their co-existing chronic pain condition during hospital admission. Adequate pain control is directly related to clinical outcomes, length of hospital stay, and patient satisfaction. A considerable body of evidence demonstrates the medical, social, and economic benefits of satisfactory inpatient pain control. Currently, there are limited pain control guidelines to address this challenging inpatient population. In fact, there are no guidelines outlining best practices for postoperative pain control in patients with chronic pain. The complex nature of chronic pain and a dearth of publications addressing the concerns of these patients make the creation of relevant guidelines difficult. The goal of this book is to equip clinicians to provide safe and effective management of hospitalized patients with co-existing chronic pain. Each chapter addresses a particular clinical question and is written by an expert in the field. Chapters describe basic principles and specific clinical situations commonly encountered during the care of patients with co-existing chronic pain in hospital settings.

Documentation Basics Elsevier Health Sciences

Master the role of the physical therapist or physical therapist assistant in neurologic rehabilitation! Neurologic Interventions for Physical Therapy, 3rd Edition helps you develop skills in the treatment interventions needed to improve the function of patients with neurologic deficits. It provides a solid foundation in neuroanatomy, motor control, and motor development, and offers clear, how-to guidelines to rehabilitation procedures. Case studies help you follow best practices for the treatment of children and adults with neuromuscular impairments caused by events such as spinal cord injuries, cerebral palsy, and traumatic brain injuries. Written by physical therapy experts Suzanne 'Tink' Martin and Mary Kessler, this market-leading text will help you prepare for the neurological portion of the PTA certification exam and begin a successful career in physical therapy practice. Comprehensive coverage of neurologic rehabilitation explores concepts in neuroanatomy, motor control and motor learning, motor development, and evidence-based treatment of adults and children with neuromuscular impairments. Over 700 photos and drawings clarify concepts, show anatomy, physiology, evaluation, and pathology, and depict the most current rehabilitation procedures and technology. Case studies demonstrate the patient examination and treatment process, and show how to achieve consistency in documentation. Proprioceptive Neuromuscular Facilitation chapter describes how PNF can be used to improve a patient's performance of functional tasks by increasing strength, flexibility, and range of motion - key to the treatment of individuals post stroke. Review questions are included at the end of each chapter, with answers at the back of the book. Illustrated step-by-step intervention boxes, tables, and charts highlight important information, and make it easy to find instructions quickly. Use of language of the APTA Guide to Physical Therapist Practice ensures that you understand and comply with best practices recommended by the APTA. NEW photographs of interventions and equipment reflect the most current rehabilitation procedures and technology. UPDATED study resources on the Evolve companion website include an intervention collection, study tips, and additional review questions and interactive case studies.

Brain Injury Medicine, Third Edition Springer

This revision of a well-loved text continues to embrace the confluence of person, environment, and occupation in mental health as its organizing theoretical model, emphasizing the lived experience of mental illness and recovery. Rely on this groundbreaking text to guide you through an evidence-based approach to helping clients with mental health disorders on their recovery journey by participating in meaningful occupations. Understand the recovery process for all areas of their lives—physical, emotional, spiritual, and mental—and know how to manage co-occurring conditions.

Adult Physical Conditions, 2nd ed Elsevier Health Sciences

Life care planning is an advanced collaborative case management specialty practice focused on assessing, evaluating, coordinating, consulting, planning for, and monitoring necessary services for individuals with complex medical care needs over their lifetime. This handbook provides a comprehensive resource for all people involved with catastrophic impairments and chronic medical care case management. The Life Care Planning and Case Management Handbook, Fourth Edition, begins by defining the roles played by each of the key team members working with the life care planner. It provides planners with insights critical to successful interactions with medical and health care-related professionals as well as the team members they are most likely to encounter as they work to build an accurate and reliable life care plan. Next, the text offers up-to-date information on the medical conditions most frequently encountered by the life care planner. The contributors, who are recognized experts in their disciplines, also address issues in forensic settings, ethics, standards, research, and credentials. The fourth edition includes numerous chapters on general issues, as well as updated standards of practice from the International Academy of Life Care Planners (IALCP), Life Care Planning Consensus Statements, and valuable step-by-step charts and checklists. Completely updated and expanded, this revised handbook now includes new chapters on multicultural considerations in life care planning, admissibility of life care plans in U.S. courts, and Canadian life care planning practice. Additionally, infused in other chapters, is new information on medical coding and costing for life care planners, life care planning in non-litigated contexts, as well as research and education within life care planning.

Mild Traumatic Brain Injury Rehabilitation Toolkit Kohlman Evaluation of Living Skills (KELS)

Whether your goal is to be a physical therapist or a physical therapist assistant, this book's comprehensive content will give you in-depth knowledge on the role of neurologic rehabilitation in the treatment of adults and children with neuromuscular impairments and explores concepts in neuroanatomy, motor control and motor learning, and motor development. Neurologic Interventions for Physical Therapy, 4th Edition provides a current framework for neurologic practice and focuses on the precise links between the pathophysiology of neurologic conditions and possible interventions to improve movement outcomes. The text also includes a new chapter on Autism Spectrum Disorder. Helpful learning aids in each chapter include objectives and summaries, open-ended review questions, line drawings and photos, step-by-step illustrated intervention boxes, tables, and charts. Comprehensive content on the role of neurologic rehabilitation focuses on the treatment of adults and children with neuromuscular impairments and explores concepts in neuroanatomy, motor control and motor learning, and motor development. Open-ended review questions at the end of each chapter allow you to test your knowledge of material covered in the chapter. Case studies include subjective and objective observation, assessment, planning, and critical decision-making components, and provide context for you regarding the patient examination and treatment process. The text uses the language of the APTA Guide to Physical Therapist Practice to ensure you are complying with the APTA best practices. Over 700 illustrations and photographs detailing anatomy, physiology, evaluation, pathology, and treatment enhance your learning resources. UPDATED! Best evidence for interventions; clear, concise tables; graphics and pictures; and current literature engage you in the spectrum of neurologic conditions and interventions. NEW! Autism Spectrum Disorder chapter covers clinical features, diagnosis, and intervention, with a special focus on using play and aquatics, to support the integral role of physical therapy in working with children and families with autism. NEW! Common threads throughout the Children section focus on motor competence as a driving force in a child's cognitive and language development and highlight how meaningful, fun activities with family and friends encourage children with disabilities to participate. UPDATED! Neuroanatomy chapter provides a more comprehensive review on nervous system structures and their contributions to patient function and recovery after an injury or neurologic condition. UPDATED! Adult chapters feature updated information on medical and pharmacological management. NEW! The Core Set of Outcome Measures for Adults with Neurologic Conditions assists you in measuring common outcomes in the examination and evaluation of patients. NEW! Emphasis on the evidence for locomotor training, dual-task training, and high intensity gait training are included in the intervention sections.

ACSM's Exercise Testing and Prescription Springer

This volume of Advances in Intelligent Systems and Computing contains accepted papers presented in the main track of ECC 2015, the Second Euro-China Conference on Intelligent Data Analysis and Applications. The aim of ECC is to provide an internationally respected forum for scientific research in the broad area of intelligent data analysis, computational intelligence, signal

processing, and all associated applications of AIs. The second edition of ECC was organized jointly by VSB - Technical University of Ostrava, Czech Republic, and Fujian University of Technology, Fuzhou, China. The conference, organized under the patronage of Mr. Miroslav Novak, President of the Moravian-Silesian Region, took place in late June and early July 2015 in the Campus of the VSB - Technical University of Ostrava, Czech Republic.

A Case Manager's Study Guide F.A. Davis

Concise and portable, Braddom's Clinical Handbook of Physical Medicine and Rehabilitation, by Drs. David X. Cifu and Henry L. Lew, gives you dependable, up-to-date content in a handbook format ideally suited for use at the bedside or in outpatient clinics. This quick reference covers the everyday topics you need - assistive devices and orthoses, spasticity, pediatric, adult, and geriatric care, pain management, outcome measures, and much more - all derived from the most trusted name in the field of PM&R. Reader-friendly format with succinct, templated chapters for ease of use. Authoritative content derived from the #1 comprehensive reference in the field: Braddom's Physical Medicine and Rehabilitation. An ideal resource for the entire rehabilitation team as a quick reference or study guide. Highlights key concepts spanning the full spectrum of rehabilitation medicine to help optimize outcomes for patients with a range of chronic diseases, impairments, and disabilities. Includes eSlides compiled by internationally renowned experts to summarize key teaching points and clinical pearls.

Optimizing Health Literacy for Improved Clinical Practices F.A. Davis

This is a concise how-to of successfully treating previously poorly or untreatable neurologic conditions with stem cell therapies. The text examines the IRB approved protocols of NEST (Neurologic Bone Marrow Derived Stem Cell Treatment Study), SciExVr (Stem Cell Spinal Cord Injury Exoskeleton and Virtual Reality Treatment Study), and ACIST (Alzheimer's and Cognitive Impairment Stem Cell Treatment Study). The discussion focuses on the protocols and informed consents and may be used as a template for specialists to develop clinical trials utilizing stem cell based therapy. Other potential noninvasive treatments for brain injury are also discussed. Neurologic Stem Cell Surgery, the sister text to the recently published Retinal and Optic Nerve Stem Cell Surgery, is an invaluable reference for all physicians with an interest in the development of stem cell based treatments.

Adults and Older Adults Routledge

This is a comprehensive graduate textbook focusing on the full spectrum of long-term care settings ranging from family and community-based care through supportive housing options to a variety of institutional long-term care alternatives. Integrating theory and practice, the book features the perspectives of diverse fields regarding current long-term care options and new directions for the future. Prominent scholars from history, environmental design, family caregiving, social service delivery, clinical care, health service delivery, public policy, finance, law, and ethics explore such themes as: Relationships among independence, dependence, and interdependence Ethical considerations woven into the provision of long-term care Decision-making in long-term care Fluidity in long-term care The lived experience of long-term care A micro-macro perspective ranging from the individual to societal institutions The book examines future directions for long-term care, considering such factors as the interface of technology and long-term care, cultural diversity, and relationships between voluntary and paid services. Each chapter includes case examples, study questions, and exercises, additional resources, and website links. An extensive glossary of terms is also provided, as well as instructor's resources are also available. Key Features: Focuses on the full array of long-term care options Integrates theory and practice Incorporates the perspectives of diverse fields including history, environmental design, family caregiving, social services, public policy, etc. Includes numerous case examples, study questions, exercises, and additional resources Considers new approaches to long-term care, incorporating technology and considering cultural diversity and voluntary vs. paid services About the Authors: Graham D. Rowles, PhD, is Founding Director of the Graduate Center for Gerontology and Chair of the Department of Gerontology, University of Kentucky. He is also Professor of Gerontology with joint appointments in Nursing, Behavioral Science, Geography and Health Behavior. An environmental gerontologist, his research focuses on the lived experience of aging. A central theme of this work is exploration, employing qualitative methodologies of the changing relationship between older adults and their environments with advancing age, and the implications of this relationship for health, wellbeing and environmental design. He has conducted in-depth ethnographic research with elderly populations in urban (inner city), rural (Appalachian), and nursing facility environments. Recent research includes leadership of the Kentucky Elder Readiness

Initiative (KERI), a statewide project to explore the implications for communities of the aging of the Baby Boom cohort. His publications include *Prisoners of Space?* and six co-edited volumes, in addition to more than 60 book chapters and articles. He is a Fellow of the Gerontological Society of America and the Association for Gerontology in Higher Education and currently serves on the editorial boards of the *Journal of Applied Gerontology* and *Journal of Housing for the Elderly*. Dr. Rowles is Past National President of Sigma Phi Omega, Past President of the Southern Gerontological Society, Past President of the Association for Gerontology in Higher Education, and is currently Chair of the Commonwealth of Kentucky Institute on Aging. Pamela B. Teaster, PhD, is Associate Director for Research, Center for Gerontology, and Professor, Department of Human Development, Virginia Tech University. She established the Kentucky Justice Center for Elders and Vulnerable Adults and is the first President of the Kentucky Guardianship Association. Dr. Teaster is Secretary General of the International Network for the Prevention of Elder Abuse. She served as Director and Chairperson of the Graduate Center for Gerontology/Department of Gerontology as well as the Director of Doctoral Studies and Associate Dean for Research for College of Public Health at the University of Kentucky. Dr. Teaster serves on the Editorial Board of the *Journal of Elder Abuse and Neglect*. She is a Fellow of the Gerontological Society of America and the Association for Gerontology in Higher Education, a recipient of the Rosalie Wolf Award for Research on Elder Abuse, the Outstanding Affiliate Member Award (Kentucky Guardianship Association), and the Distinguished Educator Award (Kentucky Association for Gerontology). She has received funding from The Retirement Research Foundation, Administration on Aging, National Institute on Aging, Kentucky Cabinet for Families and Children, National Institute of Justice, Centers for Disease Control, National Institute of Occupational Safety and Health, Health Resources and Services Administration, and the Office of Victims of Crime. She is the author of over 100 peer-reviewed articles, reports, books, and book chapters.

Physical Therapy Case Files: Acute Care Elsevier Health Sciences

Measurement is a fundamental concept that underpins almost every aspect of the modern world. It is central to the sciences, social sciences, medicine, and economics, but it affects everyday life. We measure everything - from the distance of far-off galaxies to the temperature of the air, levels of risk, political majorities, taxes, blood pressure, IQ, and weight. The history of measurement goes back to the ancient world, and its story has been one of gradual standardization. Today there are different types of measurement, levels of accuracy, and systems of units, applied in different contexts. Measurement involves notions of variability, accuracy, reliability, and error, and challenges such as the measurement of extreme values. In this Very Short Introduction, David Hand explains the common mathematical framework underlying all measurement, the main approaches to measurement, and the challenges involved. Following a brief historical account of measurement, he discusses measurement as used in the physical sciences and engineering, the life sciences and medicine, the social and behavioural sciences, economics, business, and public policy. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Occupational Therapy in Mental Health Elsevier Health Sciences

Scientific evidence from different countries around the globe shows that those with low or inadequate health-related knowledge and skills include all ages, social, and economic backgrounds. The consequences of this inadequacy simultaneously affect individuals, healthcare systems, and society in many ways, such as healthcare quality and cost. Research on health

literacy can provide insight on how to improve the communication of health issues, raise awareness, and promote the lifelong learning of patients and healthcare professionals. *Optimizing Health Literacy for Improved Clinical Practices* examines the latest advances in providing and helping patients and medical professionals to understand basic health information and the services that are most appropriate. Featuring coverage on a broad range of topics such as patient engagement, mobile health, and health communication, this book is geared towards medical professionals, hospital administrators, healthcare providers, academicians, and researchers in the field.

Mild Traumatic Brain Injury Rehabilitation Toolkit Oxford University Press

This book discusses the latest advances in research and development, design, operation and analysis of transportation systems and their complementary infrastructures. It reports on both theories and case studies on road and rail, aviation and maritime transportation. Further, it covers a wealth of topics, from accident analysis, vehicle intelligent control, and human-error and safety issues to next-generation transportation systems, model-based design methods, simulation and training techniques, and many more. A special emphasis is placed on smart technologies and automation in transport, and on the user-centered, ergonomic and sustainable design of transport systems. The book, which is based on the AHFE 2018 International Conference on Human Factors in Transportation, held in Orlando, Florida, USA on July 21-25, 2018, mainly addresses the needs of transportation system designers, industrial designers, human-computer interaction researchers, civil and control engineers, as well as vehicle system engineers. Moreover, it represents a timely source of information for transportation policy-makers and social scientists whose work involves traffic safety, management, and sustainability issues in transport.

Neurologic Interventions for Physical Therapy F.A. Davis

This book is a must-read guide for those entering the world of HealthTech startups. Author David Putrino, a veteran in the world of HealthTech and Telemedicine, details the roles, necessity, and values of key members of a typical HealthTech team, and helps readers understand the motivations and core priorities of all people involved. In ventures that typically depend upon effective communication between members from business, science, regulatory, and academic backgrounds, this book helps develop the core competencies that team members need to work harmoniously. Four detailed case studies are shared that exemplify the spectrum of HealthTech possibilities, including large corporations, tiny startups, elite athletes, and social good enterprises. Each case study shows how the success or failure of a project can hinge upon strong team dynamics, a deep understanding of the target population's needs and a strong awareness of each team member's long-term goals. This book is essential reading for entrepreneurs, scientists, clinicians, marketing and sales professionals, and all those looking to create new and previously unimagined possibilities for improving the lives of people everywhere.

Stroke Rehabilitation Lippincott Williams & Wilkins

SHARPEN YOUR CRITICAL THINKING SKILLS AND PREPARE FOR REAL-WORLD PRACTICE WITH CLINICAL CASES New in the authoritative Case Files series, *Physical Therapy Case Files: Acute Care* gives you case studies that illustrate critical concepts you need to build and enhance your skills in physical therapy. Each case includes a discussion of the health condition, examination, evaluation, diagnosis, plan of care and interventions, evidence-based practice recommendations, and references. NPTE-style review questions accompanying each case reinforce your learning. With *Physical Therapy Case Files: Acute Care*, everything you need to succeed in the clinic and on the NPTE is right here in your hands. 31 acute-care cases with National Physical Therapy Examination-style review questions help you learn best practices in the context of patient care Enhance your practice with evidence-based cases written by leading clinicians, researchers, and academics

Includes evidence-based ratings for examination and treatment plans Perfect for coursework use and NPTE preparation

Oxford Handbook of Rehabilitation Medicine Springer Publishing Company

The second edition of the *Neurological Physiotherapy Pocketbook* is the only book for physiotherapists that provides essential evidence-based information in a unique and easy-to-use format, applicable to clinical settings. Written by new international editors and contributors, this pocketbook provides quick and easy access to essential clinical information.

Is This Change Real? CRC Press

Praise for the Third Edition: "The third edition of this outstanding resource reflects the many advances in the care of older people that have occurred since the publication of the second edition...The vast bulk of the content is accessible and relevant to an international audience. The indexing and cross-referencing are excellent... Score: 5/5 stars." -- Margaret Arthur, *Nursing Standard* "The information [in this book] is amazing. I reviewed topics in which I have expertise and was very satisfied. This is an excellent addition to my library and I will refer to it often, much like a medical dictionary... Score: 90, 4 Stars." --Doody's Medical Reviews "Provides 273 comprehensive, yet succinct, entries on a variety of topics related to elder care. In addition, many of the entries include see also references that help readers easily navigate the book.

Recommended." --Choice: Current Reviews for Academic Libraries This expanded, one-of-a-kind reference of more than 250 entries provides a comprehensive guide to all of the essential elements of elder care across a breadth of health and social service disciplines. Responding to the needs of providers, directcare workers, family, and other caregivers, the diverse array of entries included in this encyclopedia recognize and address the complex medical, social, and psychological problems associated with geriatric care. In addition to a brief, accessible summary of each topic, entries include several key references, including web links and mobile apps for additional sources of information. This updated edition contains more than 30 new entries written by renowned experts that address a variety of elder care topics. New to the Fourth Edition: New entries addressing Ethics Consultation, Eye Disorders, Pain - Acute and Chronic, and many others Key Features: Provides succinct descriptions of over 250 key topics for health and social service clinicians Offers crucial information for elder care providers across all settings and disciplines Distills current, evidence-based literature sources Written by nationally recognized expert researchers and clinicians Includes links to useful websites and mobile apps

Intervention Strategies for Occupational Therapy SLACK Incorporated

Designed to support global development of nursing science, the *Routledge International Handbook of Advanced Quantitative Methods in Nursing Research* provides a new, comprehensive, and authoritative treatment of advanced quantitative methods for nursing research. Incorporating past approaches that have served as the foundation for the science, this cutting edge book also explores emerging approaches that will shape its future. Divided into six parts, it covers: -the domain of nursing science - measurement—classical test theory, IRT, clinimetrics, behavioral observation, biophysical measurement -models for prediction and explanation—SEM, general growth mixture models, hierarchical models, analysis of dynamic systems -intervention research—theory-based interventions, causality, third variables, pilot studies, quasi-experimental design, joint models for longitudinal data and time to event -e-science—DIKW paradigm, big data, data mining, omics, FMRI -special topics—comparative effectiveness and meta-analysis, patient safety, economics research in nursing, mixed methods, global research dissemination Written by a distinguished group of international nursing scientists, scientists from related fields, and methodologists, the Handbook is the ideal reference for everyone involved in nursing science, whether they are graduate students, academics, editors and reviewers, or clinical investigators.
