DW10 FU (C/D/E) - Groupe PSA

A Peugeot 307 vehicle equipped with a DW10 engine was purchased for this test programme. To ensure that the vehicle was suitable for the intended tests, the standard production

Euro 4 injectors were removed and a clean set of DW10 CEC Euro 5 injectors was installed.

The engine is made from aluminium and has removable cylinder liners. The engine had a distinctive design; the gearbox and differential were located directly below the engine block. This design helped Peugeot produce its first front-wheel-drive car.
