JEFFERSON WHITEHEAD

[Mobile Computing and Wireless Networks: Concepts, Methodologies, Tools, and Applications](#) Routledge

This open access book is based on work from the COST Action RESTORE - REthinking Sustainability TOwards a Regenerative Economy, and highlights how sustainability in buildings, facilities and urban governance is crucial for a future that is socially just, ecologically restorative, and economically viable, for Europe and the whole planet. In light of the search for fair solutions to the climate crisis, the authors outline the urgency for the built environment sector to implement adaptation and mitigation strategies, as well as a just transition. As shown in the chapters, this can be done by applying a broader framework that enriches places, people, ecology, culture, and climate, at the core of the design task - with a particular emphasis on the benefits towards health and resilient business practices. This book is one step on the way to a paradigm shift towards restorative sustainability for new and existing buildings. The authors want to promote forward thinking and multidisciplinary knowledge, leading to solutions that celebrate the richness of design creativity. In this vision, cities of the future will enhance users' experience, health and wellbeing inside and outside of buildings, while reconciling anthropic ecosystems and nature. A valuable resource for scientists and students in environmental sciences and architecture, as well as policy makers, practitioners and investors in urban and regional development.

Urban Planning Against Poverty Routledge

"This book aims to bridge the gap in the current literature by addressing the overall problems present in major infrastructure in society, and the technologies that may be applied to overcome these problems"--Provided by publisher.

[Swarming Landscapes](#) vdf Hochschulverlag AG

As levels of urbanization increase around the world, the growing concentrations of population and economic activity increases vulnerability to natural disasters. Interdependencies among urban populations mean that damage to the built environment, including water, sewer and energy infrastructure, can affect millions. Even if there is no change in the rate of occurrence of natural disasters (an unlikely prospect in the face of ongoing climate change) the potential for human and economic loss will continue to increase, along with the time required to recover. How do cities prepare for and recover from natural disasters? In this book, the authors provide a broad overview of the issues related to the impacts of disasters on cities around the world, from assessing risks to accounting for damages. The comparative approach across different types of disasters in a range of urban locations is useful in identifying opportunities for policy transfer. While there is no 'one size fits all' solution to hazard mitigation, valuable lessons can be learned from the experiences of others. The chapters emphasize different modes for assessing hazard risk, as well as strategies for increasing the resiliency of vulnerable populations.

Von der passiven Bodennutzungsplanung zur aktiven Bodenpolitik IGI Global

This book explores incentives capable of enhancing the effectiveness of urban planning systems in Sub-Saharan Africa using economic theory as a framework. It argues that urban planning is fundamental to the achievement of sustainable and resilient cities, but against the backdrop of rising

levels of urbanisation and growth, poverty, informal development, and climate change, such systems are failing to be promoted and successfully maintained in the region. Across ten chapters, it analyses the connection between urban planning and socio-economic development, indicators of effective urban planning systems, and the role and influence of incentives with real-world evidence. It develops quantitative models to estimate the costs and benefits of urban planning systems, focussing on the developing world where organised data is less accessible. Using Ghana as a case study, it demonstrates a step-by-step approach on how to implement the quantitative models discussed. Economic Incentives in Sub-Saharan African Urban Planning will be useful reading for researchers, policy-makers, development agencies, and students in urban planning, sustainable development, and economics.

[Justice, Equity and Emergency Management](#) Routledge

Justice, Equity and Emergency Management applies a justice and equity lens across all phases of emergency management, focusing on key topics such as hazard mitigation, emerging technologies, long-term recovery, and others.

The Ashgate Research Companion to Planning Theory SAGE

Strategieorientierte Planung erlebt seit den 1990er Jahren eine Wiedergeburt. Die Entwicklung und Umsetzung umfassender strategischer Planungsdokumente und Leitbilder ist vor dem Hintergrund des gegenwärtigen sozialen und ökonomischen Wandels sowie im Zusammenhang mit dem Wandel von Staatlichkeit zu sehen, welcher sich im Konzept des "kooperativen Staates" ausdrückt. Das Buch widmet sich zwei zentralen Fragestellungen: einerseits wird nach der Einbettung der verschiedenen Ansätze strategieorientierter Planung in den planungstheoretischen Diskurs, andererseits nach der Rolle strategieorientierter Planung im Wandel des Steuerungsverständnisses auf lokaler und regionaler Ebene gefragt. Das der strategieorientierten Planung zugrundeliegende Planungsverständnis beinhaltet die Vorstellung von Planung als sozialem Prozess sowie als Instrument zur Aushandlung und Vermittlung zwischen widersprüchlichen Interessen.

[Dialogues in Urban and Regional Planning](#) Routledge

The texts presented in Proportion Harmonies and Identities (PHI) - Progress(es) - Theories and Practices were compiled with the intent to establish a platform for the presentation, interaction and dissemination of research. It aims also to foster the awareness of and discussion on the topics of Harmony and Proportion with a focus on different progress visions and readings relevant to Architecture, Arts and Humanities, Design, Engineering, Social and Natural Sciences, Technology and their importance and benefits for the community at large. Considering that the idea of progress is a major matrix for development, its theoretical and practical foundations have become the working tools of scientists, philosophers, and artists, who seek strategies and policies to accelerate the development process in different contexts.

IT in the Public Sphere: Applications in Administration, Government, Politics, and Planning Birkhäuser

This PhD thesis in Spatial Planning argues for the importance of understanding the approaches to knowledge and rationalities embedded in spatially relevant decision-making. It emphasises the significance of seeing law as an empirical object of study for planning and environmental management. The Swedish development of wind power and 3G mobile infrastructures are used as cases to study these issues of principal interest. It is a compilation thesis consisting of a comprehensive introductory framework and five articles or chapters that have also been published elsewhere. The study is based on three main perspectives: Level of decision-making, legitimacy of different forms of knowledge involved in the process, and the sociolegal tension between formal law and its practical consequences. The thesis deals with problems stemming from the multi-level tensions in the planning and implementation that exist between the national, the regional and the local authorities. The legal context is analysed from the sociolegal perspective, in particular how the juridification of siting and permit conflicts determines what type of knowledge that can legitimately affect the decision-making and thereby set conditions for public participation. Finally, the thesis elaborates on the largely counterproductive results of the strong emphasis on [efficiency] in the revision of planning and permit processes for wind power and 3G-infrastructure, and what can be learnt from the experiences of the attempts at increasing efficiency. A combination of methods has been employed in the studies, and the data comes from a range of sources such as a large set of mast building permits, a sample of wind permit cases, as well as appealed permit cases. In addition, interviews have been conducted with judges from relevant courts, including regional handling officers who assess wind turbine applications. Legal documents such as preparatory work and licence conditions have also been analysed. The results show that there is a legal-rhetorical adaptation to the expert-based decision-making in court when permits are appealed. Further, the administrative levels interact poorly in the overall implementation. The national decisions, irrespective of the normative viewpoint of who should control the landscape planning, could be better informed of the preconditions at a local level that factually define the outcome of the implementation.

National Human Rights Action Planning Routledge

In most planning practice and research, planners work with quantitative data. By summarizing, analyzing, and presenting data, planners create stories and narratives that explain various planning issues. Particularly, in the era of big data and data mining, there is a stronger demand in planning practice and research to increase capacity for data-driven storytelling. Basic Quantitative Research Methods for Urban Planners provides readers with comprehensive knowledge and hands-on techniques for a variety of quantitative research studies, from descriptive statistics to commonly used inferential statistics. It covers statistical methods from chi-square through logistic regression and also quasi-experimental studies. At the same time, the book provides fundamental knowledge about research in general, such as planning data sources and uses, conceptual frameworks, and technical writing. The book presents relatively complex material in the simplest and clearest way possible, and through the use of real world planning examples, makes the theoretical and abstract content of each chapter as tangible as possible. It will be invaluable to students and novice researchers from planning programs, intermediate researchers who want to branch out methodologically, practicing planners who need to conduct basic analyses with planning data, and anyone who consumes the research of others and needs to judge its validity and reliability.

[Innovations in Green Urbanization and Alternative Renewable Energy](#) IGI Global

It has become increasingly evident that effective planning for sustainable communities, environments and economies pivots on the ability of planners to see the possibilities for culture in comprehensive social, historical and environmental terms and to more fully engage with the cultural practices, processes and theorisation that comprise a social formation. More broadly, an approach to planning theory and practice that is itself formed through a

close engagement with culture is required. This Research Companion brings together leading experts from around the world to map the contours of the relationship between planning and culture and to present these inextricably linked concepts and issues together in one place. By examining significant trends in varying national and international contexts, the contributors scrutinise the theories and practices of both planning and culture and explore not only their interface, but significant divergences and tensions. In doing so, this collection provides the first comprehensive overview and analysis of planning and culture, interdisciplinary and international in scope. It is comprised of six parts organised around the themes of global and historical contexts, key dimensions of planning and cultural theory and practice, and cultural and planning dynamics. Each section includes a final chapter that provides a case study lens which pulls the themes of the section together with reference to a significant planning issue or initiative.

Das Bild der Stadt Springer Nature

Diese Sammlung von Schriften aus der Zeit von 1970 bis 1990 des brasilianischen Pädagogen Paulo Freire (1921-1997) gibt einen Einblick in die Grundlagen und Prinzipien seiner Bildungsarbeit auf der Basis der Pädagogik der Befreiung. In den ausgewählten Texten werden nicht nur pädagogische Probleme und inhaltlich-methodische Fragen der Bildungsarbeit thematisiert. Sie enthalten ebenso Analysen und Bewertungen von Politik, Kultur, Religion, Ethik und Veränderungsmöglichkeiten von Gesellschaft - eine Erweiterung, die sich gegen eine Vorstellung wendet, Pädagogik sei von Gesellschaft und Politik losgelöst zu behandeln. Scharfsinnig hat Freire u.a. die verheerenden Folgen des Neoliberalismus für Individuum und Gesellschaft analysiert und zum widerständigen Denken und Handeln ermuntert. Eine Auswahl repräsentativer alter und neuer Texte von Paulo Freire: Wer sie zur Hand nimmt, entdeckt rasch, dass uns dieser brasilianische Pädagoge nicht nur für die Theorie und Praxis unserer Erziehungsarbeit, sondern für unser Überleben Entscheidendes zu sagen hat. Prof. Dr. Ulrich Becker, Universität Hannover

Planning Ideas That Matter Routledge

In The Death and Life of Great American Cities durchleuchtet Jane Jacobs 1961 die fragwürdigen Methoden der Stadtplanung und Stadtsanierung in Amerika, der "New Yorker" nannte es das unkonventionellste und provozierendste Buch über Städtebau seit langem. Die deutsche Ausgabe wurde schnell auch im deutschsprachigem Raum zu einer viel gelesenen und diskutierten Lektüre. Sie ist jetzt wieder in einem Nachdruck zugänglich, mit einem Vorwort von Gerd Albers (1993), das nach der Aktualität dieser Streitschrift fragt.

ARL Reader Planungstheorie Band 2 Ashgate Publishing, Ltd.

This book deals with human rights action planning, as a largely under-researched area, from theoretical, doctrinal, empirical, and practical perspectives, and as such, provides the most comprehensive studies of human rights planning to date. At the theoretical level, by advancing a novel general theory of human rights planning, it offers an alternative to the traditional state-centric model of planning. This new theory contains four sub-theories: contextual, substantive, procedural, and analytical ones. At the doctrinal level, by conducting a textual analysis of core human rights conventions, it reveals the scope and nature of the states' obligation to adopt a plan of action for implementing human rights. At the empirical level, a cross-case analysis of national human rights action plans of 53 countries is conducted exploring the major problems of these plans in different phases of planning and uncovering the underlying causes of these problems. At the practical level, this volume sets out how these plans should be developed and implemented, how they can be best monitored by international human rights bodies, and how to maximize their effectiveness. With discussions bridging human rights theory and practice and development discourse, this book will be a useful resource for a wide range of audiences, from academics of different disciplines (law, human rights, social policy, political science, political philosophy, legal philosophy, development studies, planning studies, socio-legal studies) to governments, human rights practitioners, and the UN human rights bodies.

[Designing Cities](#) Springer Nature

Anika Noack untersucht sozial innovative Handlungsorientierungen der Zivilgesellschaft. Sie geht der Frage nach, inwiefern sich Zivilgesellschaft heute dadurch legitimiert, über Bestehendes und Bekanntes hinauszugehen, oder gar beansprucht, sozial innovativ zu sein. Während die Handlungsorientierung in Richtung Innovation für Ökonomie, Wissenschaft und Forschung bereits langjährig erforscht ist, ist das Forschungsfeld zivilgesellschaftlich initiiert sozialer Innovationen bislang offen geblieben. Am Beispiel von Raumpionieren, die sich auf dem Feld einer sozialen Stadtentwicklungspolitik in Berlin-Moabit engagieren, untersucht die Autorin diese Thematik und fokussiert dabei auf kommunikative Vorgänge zur Erzeugung von sozialen Innovationen.

Sustainable Urban and Regional Infrastructure Development: Technologies, Applications and Management Springer Nature

This book thoroughly examines the aims of green urbanism, providing a perspective to help responding to the growing environmental challenges posed by the enormous increase in human needs. The book gives insights about architectural intervention in urban planning which provides green design strategies in a way that improves the efficiency of building in terms of energy consumption and environmental conservation. The book also gives attention to the paradigm of the 'intermediate city', thus, helping in overcoming the challenges posed by the growing urbanization process. Finally, the book gives a futuristic vision of cities, anticipating their challenges and providing possible solutions for them. The book targets a wide audience interested in implementing the SDG goals in energy and green urban planning, and those interested in the interdisciplinary nature of green urbanization and alternative and renewable energy accommodates. The book is a culmination of selected research papers from the 4th version of the International Online Conference on Green Urbanism (GU) of Roma Tre University, Italy (2020) & the 3rd version of the International Online Conference on Alternative and Renewable Energy Quest (2020).

[Cities at Risk](#) John Wiley & Sons

Encompassing community development, organizing, planning, & social change, as well as globalisation, this book is grounded in participatory & empowerment practice. The 36 chapters assess practice, theory & research methods.

[The Routledge Research Companion to Planning and Culture](#) Springer-Verlag

This book is recommended reading for planners preparing to take the AICP exam. In this new book, Michael Brooks bridges the gap between theory and practice. He describes an original approach--Feedback Strategy--that builds on the strengths of previous planning theories with one big difference: it not only acknowledges but welcomes politics--the bogeyman of real-world planning. Don't hold your nose or look the other way, Brooks advises planners, but use politics to your own advantage. Brooks admits that most of the time planning theory doesn't have much to do with planning

practice. These ideas rooted in the planner's real world are different. This strategy employs everyday political processes to advance planning, trusts planners' personal values and professional ethics, and depends on their ability to help clients articulate a vision. Planning Theory for Practitioners will encourage not only veteran planners searching for a fresh approach, but also students and recent graduates dismayed by the gap between academic theory and actual practice.

[Russian Energy and Security up to 2030](#) CRC Press

Featuring updates and revisions to reflect rapid changes in an increasingly globalized world, Readings in Planning Theory remains the definitive resource for the latest theoretical and practical debates within the field of planning theory. Represents the newest edition of the leading text in planning theory that brings together the essential classic and cutting-edge readings Features 20 completely new readings (out of 28 total) for the fourth edition Introduces and defines key debates in planning theory with editorial materials and readings selected both for their accessibility and importance Systematically captures the breadth and diversity of planning theory and puts issues into wider social and political contexts without assuming prior knowledge of the field

Advanced Quantitative Research Methods for Urban Planners Readings in Planning Theory

It has become increasingly evident that effective planning for sustainable communities, environments and economies pivots on the ability of planners to see the possibilities for culture in comprehensive social, historical and environmental terms and to more fully engage with the cultural practices, processes and theorisation that comprise a social formation. Planning Theory for Practitioners Blekinge Institute of Technology

Dialogues in Urban and Regional Planning 5 is a selection of some of the best scholarship in urban and regional planning from around the world. The internationally recognized authors of these award-winning papers take up a range of salient issues from the theory and practice of planning. The topics they address include the effects of globalization on world cities, metropolitan planning in France and Australia, and new research in pedestrian and traffic design. The breadth of the topics covered in this book will appeal to all those with an interest in urban and regional planning, providing a springboard for further debate and research. The papers focus particularly on themes of inclusion, urban transformation, metropolitan planning, and urban design. The Dialogues in Urban and Regional Planning (DURP) book series is published in association with the Global Planning Education Association Network (GPEAN) and its member national and transnational planning schools associations.
