This text aims to present and discuss the innovative Volvo Uddevalla plant, comparing it to other plants - Japanese lean ones and others. The starting point for the book is Volvo's dramatic decision to close its Uddevalla and Kalmar plants, and the debate that followed this decision, both in Sweden and abroad. Both plants were pioneers of the possibilities to unite productivity and the good work, but, following the announcement of their closure, researchers and practitioners in the field of industrial organization from many countries asked why they closed, how they compared with other production concepts, and whether we now see an end of an alternative to Japanese lean production.

Nation's Business

This is the first book to explain how the fundamentals of marketing strategy must change in response to this broad-based increase in wealth The authors specifically addresses how to fine tune a mass marketing approach that captures the value created from greater consumer affluence. After years of expensive and largely ineffective attempts at one-to-one marketing and other complex varieties of microsegmentation, the business environment is ripe for a switch back to the relative simplicity of a mass marketing mindset Flouts conventional wisdom: the authors in-depth research uncovered that today's moneyed masses are completely different than the mass market of decades past in terms of how much they have to spend and what they are willing to spend it on. Reveals the mass marketing strategies a range of companies have already successfully used to hit pay dirt with products ranging from oral care to laundry detergent to exotic automobiles.

The Washingtonian

'Shourie has the anecdotal reasoning of Nirad Chaudhuri married to the writing style of Robert Ludlum. Both are in ample evidence in this book.' - India Today In this incisive commentary, Arun Shourie documents the ways in which our history textbooks have been doctored by leftist historians. Thoroughly researched and riveting, this study brings to light the techniques and frauds that a cabal of some of our best-known academicians has used to promote themselves, and to acquire control over institutions. And then to put these supposedly academic institutions to use. Shourie shows how, in the process, this cabal has perverted India's historical narrative, and thereby vitiated the country's public discourse. Two new chapters bring to light recent developments in the field: how, with their holy scriptures having been repudiated in their holy cities, these 'historians' strive to retain their perches by dominating niche domains; how these efforts are bound to fail; but how their trajectory holds vital lessons for those who seek to replace them. A must read for every Indian who has an interest in the country's history and a stake in its future.

Used Car Buying Guide, 1993

Lightweight Electric/Hybrid Vehicle Design, covers the particular automotive design approach required for hybrid/electrical drive vehicles. There is currently huge investment world-wide in electric vehicle propulsion, driven by concern for pollution control and depleting oil resources. The radically different design demands of these new vehicles requires a completely new approach that is covered comprehensively in this book. The book explores the rather dramatic departures in structural configuration necessary for purpose-designed electric vehicle including weight removal in the mechanical systems. It also provides a comprehensive review of the design process in the electric hybrid drive and energy storage systems. Ideal for automotive engineering students and professionals Lightweight Electric/Hybrid Vehicle Design provides a complete introduction to this important new sector of the industry. comprehensive coverage of all design aspects of electric/hybrid cars in a single volume packed with case studies and applications in-depth treatment written in a text book style (rather than a theoretical specialist text style)
